- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
- Driver Version 6.05.00.
- Single HBA zoning is required regardless of the switch being utilized.
- Host must be offline for interfamily Symmetrix microcode upgrade.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from http://www.qlogic.com.
- Requires BIOS 1.34 available from QLogic at http://www.qlogic.com.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from http://www.emulex.com.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Driver Version 1.23a.
- FCCode value 1.63a2.
- Firmware Version 1.01a2.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)

19. No MirrorView or SnapView used on boot LUNs.
20. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
21. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
22. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
23. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
24. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
25. Firmware Version 1.80a3.
26. Firmware Version 3.90a7.

1. For FC-AL hub connection not supported for boot device.

2. EMC required Sun patches for Solaris 8:

- 108528-26 SunOS 5.8: kernel update patch.
- 108974-36 SunOS 5.8: data, uata, dad, sd, and scsi patch.
- 109657-09 SunOS 5.8: isp driver patch (for X1062A and X1065A HBAs only).
- 109885-14 SunOS 5.8: glm driver patch (for X6541A HBA only).

3. FCode value 1.40a0.

4. EMC required Sun patches for Solaris 7:

- 106541-28 SunOS 5.7: kernel update patch.
- 106924-11 SunOS 5.7: /kernel/drv/isp and /kernel/drv/sparcvg/isp patch (for X1062A and X1065A HBAs only).
- 106925-09 SunOS 5.7: glm driver patch (for X5641A HBA only).

5. EMC required Sun patches for Solaris 9:

- 112233-08 Sun OS 5.9: kernel patch
- 112834-03 Sun OS 5.9: patch SCSI
- 113277-17 Sun OS 5.9: sd and ssd patch

6. Driver Version 4.1.5. If PowerPath is installed, minimum revision of 3.0.4 is required. Supports SNIA HBA API.

7. FCode value 3.9.

8. Driver Version 5.2.1. Supports SNIA HBA API.

9. Driver Version 4.13. Fcode should be loaded on all HBA's at the time of installation. All drivers and fcode can be downloaded from <http://www.qlogic.com>. Supports SNIA HBA API.

10. FCode value 2.00.01. Fcode should be loaded on all HBA's at the time of installation. All drivers and fcode can be downloaded from <http://www.qlogic.com>. Supports SNIA HBA API.

11. Driver Version 5.02b.

12. Firmware Version 3.91a3.

13. Firmware Version 1.01A2. Driver and firmware available at <http://www.emulex.com>. Supports SNIA HBA API.

14. Supports Dynamic Reconfiguration for Sun Fire 4800 and 6800 only. Minimum Solaris 8 recommended patch bundle 108528-21. Requires system controller firmware patch 112127-02 or higher.

15. FCode value 2.00.06. Fcode should be loaded on all HBA's at the time of installation. All drivers and fcode can be downloaded from <http://www.qlogic.com>. Supports SNIA HBA API.

16. Supports DR on Sun 12K and 15K.

17. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

18. Sun's QLogic cards are not supported due to proprietary drivers, fcode and firmware. Please see http://www.sun.com/service/servicelist/us/detail_ww_ss_hba.html

19. Driver Version 5.2.1.

20. 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.

21. EMC required Sun patches for Solaris 2.6:

- 105181-35 SunOS 5.6: kernel update patch
- 105356-23 SunOS 5.6: /kernel/drv/ssd and /kernel/drv/sd patch.
- 105580-19 SunOS 5.6: /kernel/drv/glm patch (for X6541 HBA only).

22. Firmware Version 3.90a7.
23. Mixing FC-SW and FC-AL on the same host using JNI HBAs is not supported.
24. Requires HBA Rev B, C, D, E, G, H and J.
25. For JNI HBAs FC-1063-EMC, FC64-1063-EMC, and FCI-1063-EMC, Tachyon driver 2.6.10 must be used with VxVM versions 3.1.1 or earlier.
26. Driver Version 2.6.13.
27. FCode value 13.5.7.
28. Use of the LP9002DC or QLA2342 requires FCO A0218-1 from Sun for HBA's to operate in 66mhz mode. Without this FCO the HBA's will only come up in 33mhz mode which could have an impact on performance.
29. Firmware Version 1.80a2.
30. Must add "ssd:ssd_max_throttle=20" in /etc/system for Clariion or Symmetrix attach. Must add "forceload drv/ssd" in the /etc/system when these HBA's are installed for Clariion or Symmetrix attach with PowerPath. Do not include the quotes on either entry. MpxIO is not currently supported with EMC storage
31. Driver Version SAN 4.2.
32. Firmware Version 1.14.01.
33. Requires RPQ

1. Hi Perform Short Wave
2. Firmware Version 20.032.
3. Hi Perform Fibre Copper
4. Hi Perform Long Wave
5. Fibre Copper
6. Fibre Short Wave
7. Multipath VSS requires Virtual Machine for Clearpath MCP Version 4.0 SR1 with PowerPath 3.0.0 B83 or higher and hardware Plateau 10.3 IC003.
8. Hardware and adapters similar to Unisys ES7000-100, ES7000-200.
9. The Libra 18x includes native MCP, and Virtual Machine for MCP (Windows MCPvm) partitions
10. Firmware Version 20.026.
11. Fibre Long Wave
12. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
13. Firmware Version 01.016.

- GAB disks (membership and service group heartbeat disks) are not supported.
- For configurations with PowerPath 3.0.1 use native names only, and no power devices.
- If all FC connectivity to the array is lost (without a server shutdown), then after connectivity is restored, the user must execute a vxctl enable command, before the VCS Oracle 9iRAC service group is brought back online.
- Requires minimum microcode level of 5669.45.24 for support of TimeFinder and/or SRDF.
- Requires Symmetrix 8000 Series, PowerPath 3.0.4 or later, VxVM 3.5 or later or Solstice Disk Suite (SDS) 4.2.1. Supported with Microcode 5568.52.18. 5567 code revisions supported are 5567.46.24 or 5567.53.30. 5567.53.30 requires the PGR Phase 4 E-pack. Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- Symmetrix SCSI-3 "PER" volume flag setting required for devices accessible through two or more paths.
- Veritas MP1 is required for clusters with more than 2 servers
- Also supports Fujitsu Technology Solutions Inc.
- FSC requires all patches for Solaris 7 be obtained through FSC in the form of a Solaris 7 PTF patch CD. The current patch CD is Solaris 7 PTF R03111.**
- The PRIMECLUSTER V3.0 family of software products consists of: Cluster Foundation (CF) 1.5, Reliant Monitor Services (RMS) 3.1, Scalable Internet Services (SIS) 2.5, Parallel Application Services (PAS) 1.0, Wizard Tools WT 3.3.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- 5-64 nodes on special release available via RPQ.
- For use in US/Europe only. Refer to Fujitsu Base Connectivity information for Asia Pacific/Japan.
- The PRIMECLUSTER V4.0 family of software products consists of the following components: Reliant Monitor Services RMS 4.0A, Cluster Foundation CF 4.0A, Wizard Tools WT 4.0A and Application Wizards AW, Scalable Internet Services SIS 4.0A, Parallel Application Services PAS 4.0A, Global File Services GFS 4.0, Global Disk Services GDS 4.0, Global Link Services GLS 4.0
- GDS requires Fujitsu PCL Fibre Channel driver PFCA2.2.1.

- FCAL on Symm 6 supported by direct attach only
- Symm6: 512 lun limit per FA port
- For HP–UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange –r N /dev/vg01/lvol1 or lvcreate –r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror–UX, then this flag should not be set.
- Symm 6 is qualified with: HP–UX 11i Support Plus Sept '02 bundle = GOLDAPPS11i June '02, GOLDBASE11i June '02 & HWEnable11i Sept '02.
- Refer to MC/Service Guard Release Notes at www.docs.hp.com for patch requirements.
- Can mix HP–UX 11.00 and HP–UX 11i in same cluster, all nodes must be MC/SG 11.09, 11.13 or later.
- Volume Managers Supported: LVM
- For driver versions refer to Base Connectivity Section
- Volume Managers Supported: LVM, VxVM 3.2
- Volume Managers Supported: LVM, VxVM 3.2, VxVM 3.5
- Number of nodes supported is dependent upon LVM, SLVM, VxVM, and CVM. Refer to EMC Host Connectivity Guide for HP–UX.
- Volume Managers Supported: LVM, SLVM
- HP–UX 11.0 and 11i: 64-bit only. Oracle RAC9i (9.0.1, 9.2). PowerPath 2.1.x and 3.0 Support. A SAN implementation with ISLs will observe significant delay in failover times if link failures non-contiguous to host HBA occur.
- Volume Managers Supported: LVM, SLVM, VxVM 3.2
- Volume Managers Supported: LVM, SLVM, VxVM 3.2, VxVM 3.5
- As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)

L2000 (product number A5191A)

N4000 Revision A (product number A3639A)

N4000 Revision B (product number A3639B)

17. PA–8700 processors: Initial support with HP–UX 11.0 Sept 2001, HP–UX 11i Sept 2001.

18. Symm 6 is qualified with: HP–UX 11.00 Support Plus Sept '02 bundle = QPK1100 Sept '02 & HWE1100 Sept '02

19. On HP–UX 11.00 LVM support only – no VxVM

20. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.

21. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24, 5568.58.12 or 5x69

22. GAB disks (membership and service group heartbeat disks) are not supported.

23. Review the single attach table for supported PowerPath versions and volume manager restrictions.

24. MC/ServiceGuard 11.15 is supported on HP–UX 11i v1.0 and HP–UX 11i v2.0 only

25. Minimum microcode revision level 5670.23.25.
5568 and 5669 are on a RPQ basis at this time.

- TruCluster V5.x support with Symmetrix DMX requires minimum microcode version 5669.45.24.
- Tru64 V5.1 latest qualified Patch Kit-0006 (T64V51B20AS0006-20030210).
- V5.x: 255 LUNs/Symmetrix Fibre director port (LUNs 000-0FE valid) on Symmetrix DMX Series, requires OVMS director bit setting, LUN 000 must be mapped to a Symmetrix device, the LUN 000 device can be used as a normal disk device by the Tru64 host.
- TruCluster V5.x Persistent Reservation support with 5669 microcode requires minimum 5669.45.24, Symm "PER" Volume flag, and "ubyte[0] = 8" in /etc/addr.dbase EMC entry. Configurations that cannot support Persistent Reservation must set "ubyte[0] = 25" to enable alternate barrier patch and direct access devices.
- Tru64 V5.1A latest qualified Patch Kit 6 (T64V51AB24AS0006-20031031).
- Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).
- AlphaServer GS1280,ES80,ES47: Minimum Tru64 V5.1B with Patch Kit 1 (T64V51BB1AS0001-20021229)
- AlphaServer SC systems have special Tru64 UNIX operating system and AlphaServer SC System Software requirements.
- Requires RPK
- Tru64 V4.0F BL13 Patch Kit 2 may introduce problems with KZPBA adapters. Tru64 V4.0F latest qualified Patch Kit 8 (DUV40FB22AS0008-20030730).
- TruCluster V1.6 SCSI requires shared buses with 'Y' cables or HPQ (Compaq) Ultra SCSI hubs DS-DWZZH-03, DS-DWZZH-05. Straight cables used only as interconnects, Cables: 038-001-537 (6M), 038-001-538 (12M), 038-001-539(20M). Maximum bus length must not exceed 25 meters. Fibre configs require additional zoning for hba-to-hba cluster ping. Refer to EMC Host Connectivity Guide for Tru64 UNIX, P/N 300-000-616, for more details.
- Tru64 V4.0G latest qualified Patch Kit 4 (T64V40GB22AS0004-20030731).

- IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server. 6227 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6228 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6239 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte
- Requires minimum HACMP IY07313, concurrent resource groups not supported with HACMP 4.3 or 4.3.1; For HACMP 4.4.0 and 4.4.1 concurrent resource groups supported with APAR IY14528. Requires minimum AIX APAR IY08960, IY03872, IY06844. Requires minimum Symmetrix microcode level 5265.48.30.
- For all PCI–based hosts only: See http://www-1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf for appropriate HBA placement guidelines.
- For IBM AIX 4.3.3: requires Oracle RAC9i (9.0.1), HACMP/ES 4.4.x. PowerPath 2.1 or greater is supported. Symmetrix microcode 5566/5567/5568. A SAN implementation with ISLs will observe significant delay in failover times if link failures non–contiguous to host HBA occur. For IBM AIX 5.1: requires Oracle RAC9i (9.2), HACMP/ES 4.4.x. PowerPath 3.0.1 or greater is supported. Symmetrix microcode 5566/5567/5568. A SAN implementation with ISLs will observe significant delay in failover times if link failures non–contiguous to host HBA occur.
- Requires minimum AIX APAR IY05369. Requires minimum EMC ODM fileset support (4.3.3.0 IBM Fibre Channel interface support for Symmetrix). Supported adapter firmware, 3.22A1.
- Requires minimum AIX APAR IY08960, IY03872. Requires minimum EMC ODM fileset support (4.3.3.1 IBM Fibre Channel interface support for Symmetrix). Supported adapter firmware, 3.22A1.
- Requires minimum Symmetrix microcode level 5265.39.25. Requires minimum AIX APAR IY05369. Requires minimum EMC ODM fileset support (4.3.3.0 IBM Fibre Channel interface support for Symmetrix).
- Latest APAR for PSSP 3.1.1 is IY17870.
- Latest APAR for PSSP 3.2 is IY17872.
- The following link provides detailed data for all 9076–SP2 models and feature codes:
http://www1.ibm.link.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSR4n1USenGnN9332&xhi=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product
- For fibre channel boot support with HACMP the luns containing rootvg cannot be shared between hosts.
- This configuration includes support for fibre channel boot. See the single host section of the EMC Support Matrix for fibre channel boot specific requirements.
- Requires minimum AIX 4.3.3 with APAR IY22024. Requires PSSP 3.4 with APAR IY32625
- Refer to Primus case #1.0.128870403.2749464 for configuration instructions.
- Requires minimum EMC ODM fileset support (4.3.3.1 IBM Fibre Channel interface support for Symmetrix). Device driver df1000f9 is distributed by IBM.
- Requires minimum AIX 4.3.3 with maintenance level 08 and adapter firmware 3.82a1. Requires minimum HACMP IY07313. Concurrent resource groups not supported with HACMP 4.3 or 4.3.1; For HACMP 4.4.0 and 4.4.1 concurrent resource groups supported with APAR IY14528. Requires minimum Symmetrix microcode level 5265.48.30.
- Requires minimum EMC ODM fileset support (4.3.3.1 IBM Fibre Channel interface support for Symmetrix).
- AIX 5.1 supported with 32/64–bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
- AIX 5.1 32/64 bit Kernel supported. Minimum PowerPath Version 2.1.2 supported. Requires minimum EMC ODM fileset support 5.0.0.0.
- Minimum PowerPath 2.1.2 supported.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.

22. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
23. AIX 5.1 supported with 32-bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
24. Requires minimum HACMP APAR IY07313. Latest APAR for PSSP 3.1.1 is IY17870. Requires minimum RVSD APAR IY07130.
25. IBM 6227 and 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server.
26. GAB disks (membership and service group heartbeat disks) are not supported.
27. Minimum PowerPath 3.0.2 is supported.
28. PowerPath is supported with LVM and JFS
29. VxVM and VxFS are not currently supported with PowerPath in this configuration.
30. For installation with Powerpath Versions 3.0.3 and 3.0.4 see Primus ID EMC69100 which contains additional requirements for support.
31. Requires minimum PSSP 3.4 APAR IY33448.
32. FC-SW and FC-AL are supported on the same server.
33. Requires minimum AIX5.1 with maintenance level 03 APAR IY32749.
34. AIX 5.1 supported with 32/64 bit kernel.
35. Requires minimum PSSP APAR IY38509
36. See http://www.rs6000.ibm.com/resource/hardware_docs/sa38-0538/380538.pdf for appropriate HBA placement guidelines
37. Requires minimum ODM fileset support (5.0.0.0 EMC Symmetrix Fibre Channel support software).
38. IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC-AL and FC-SW are supported on the same server.
6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ;
6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
39. Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.
40. AIX 5.1 32/64 bit Kernel supported. Requires minimum EMC ODM fileset support 5.0.0.0.
41. **AIX 5.2 requires Operating System APAR# IY36782, IY37744 and IY37746 for support with HACMP and HACMP/ES version 4.5 and PSSP 3.5.**
42. Minimum Powerpath version 3.0.2 is supported.
43. HACMP 4.5 when installing under AIX 5.2 requires HACMP 4.5 APAR# IY36938.
44. When installing under AIX 5.2 HACMP/ES 4.5 APAR# IY36938, HACMP/ES 4.5 APAR# IY36933, HACMP/ES 4.5 APAR# IY36626 and RSCT 2.3 APAR# IY36626 are required.
45. AIX 5.1-32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
46. Requires minimum IBM APAR IY43999
47. Requires a minimum of three nodes in the cluster.
48. **Supported with VCS 3.5 Maintenance Patch 1**
49. **Native names only. Power devices are not supported in a cluster configuration.**
50. **PowerPath supports LVM with JFS, and VxVM 3.2.2 with VxFS 3.4.4.**
51. **Minimum Powerpath version 3.0.3 is supported.**
52. **PSSP 3.5 supports a 32 or 64 bit kernel.**
53. **AIX 5.2 32/64 bit kernel supported. Requires Minimum EMC ODM fileset support 5.0.0.0.**
54. **Requires AIX APAR IY48995**

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiiON non-disruptive upgrades for Windows systems booting from CLARiiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
- 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- 3) External storage director failures including failed lasers on Fibre Channel directors.
- 4) External storage power failure.
- 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
- 6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

2	AViiON: AV1400, AV2800, AV3800	Microsoft Windows 2000 Advanced Server: SP2 ⁴ , SP4 ⁴	Legato Automated Availability Manager (LAAM) 5.0 (Base) ^{1, 2, 3}	HA: 4	Emulex: LP8000-EMC ⁵ , LP850-EMC, LP9002-E (LP9002L-E); QLogic: QLA2200F-EMC, QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	

1. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
2. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
3. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24, 5568.58.12 or 5x69
4. EMC recommends that HBAs of different vendors not be used in the same host server.
5. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
6. EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
7. Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
8. MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.

- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24, 5568.58.12 or 5x69
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Must use standard PCI 32bit/33MHz slot for SCSI
- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- GAB disks (membership and service group heartbeat disks) are not supported.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24, 5568.58.12 or 5x69
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

10. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
11. **Supported by direct attach only**
12. Includes both Pentium PRO and XEON models
13. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
14. The HP D8602B Tachlite Fibre Channel HBA does not come standard with a GBIC. An optional shortwave optical GBIC, HP part number D6975A, must be ordered separately from HP.
15. HP NetServer LC2000 is only supported with two processors. Uni-Processor configurations are not supported
16. (HBA-5101BK-01)
17. GAB disks (membership and service group heartbeat disks) are not supported.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24, 5568.58.12 or 5x69
- This HBA is equivalent to the qLogic QLA2340.
- This HBA is equivalent to the qLogic QLA2310.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- (QLA2200) For IBM xSeries and Netfinity servers only.
- Supported by direct attach only
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0
. VxVm not supported. PowerPath 3.0 supported.
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
VxVM not supported.
PowerPath 3.0 supported.
- GAB disks (membership and service group heartbeat disks) are not supported.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
- EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.

1. EMC recommends that HBAs of different vendors not be used in the same host server.
2. Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.

By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.

By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.

The workaround is to perform "symcfg discover" after rebooting.

3. EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- Supported by direct attach only

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiON non-disruptive upgrades for Windows systems booting from CLARiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- Lost connection to external storage (pulled or damaged cable connection).
- External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- External storage director failures including failed lasers on Fibre Channel directors.
- External storage power failure.
- Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
- Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- HP LXR-PRO8 support has been discontinued.
- V1.0 is only qualified on Windows NT 4.0 SP3.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

- HP LXR-PRO8 support has been discontinued.
- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- V1.0 is only qualified on Windows NT 4.0 SP3.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- (HHBA-5101BK-01)
- The HP D8602B Tachlite Fibre Channel HBA does not come standard with a GBIC. An optional shortwave optical GBIC, HP part number D6975A, must be ordered separately from HP.

14. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- HP LXR–PRO8 support has been discontinued.

- Maximum number of NWFS volumes that can be mounted is 64.
- Powerpath & ATF supported.
- Novell Storage Services supported.
- HP NetServer LC2000 is only supported with two processors. Uni-Processor configurations are not supported
- Requires NWPA.NLM V.3.07A update from Novell website.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- Requires HBA firmware 1.79.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**

1. Watchdog Timer should be disabled in ocmargs.ora
2. Supported with QLogic driver v6.05.00.
3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
4. OCFS (Oracle Cluster File System) is not supported.
5. Supported with QLogic driver v6.04.02.
6. Configuration information available on EMC PowerLink and Avator: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiON Storage Arrays" in the EMC Networked Storage Topology Guide.
7. QLogic driver is available with Dell/Oracle CC kit.
8. An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
9. Host must be offline for interfamily Symmetrix microcode upgrade.
10. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
11. requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
12. Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
13. Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
14. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
15. Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
16. PowerPath is not supported.
17. GAB disks (membership and service group heartbeat disks) are not supported.
18. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
19. Review single attach VxVM notes for PowerPath and DMP restrictions.
20. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.

21. This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- Must use standard PCI 32bit/33MHz slot for SCSI
- Single HBA zoning is required regardless of the switch being utilized.**
- Host must be offline for interfamily Symmetrix microcode upgrade.**
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.**
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
- Emulex driver and BIOS available from <http://www.emulex.com>.**
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPO.
- Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
- Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
- Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
- Host must be offline for interfamily Symmetrix microcode upgrade.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Watchdog Timer should be disabled in ocmargs.ora
- Supported with QLogic driver v6.04.02.
- OCFS (Oracle Cluster File System) is not supported.
- Supported with QLogic driver v6.05.00.
- Includes both Pentium PRO and XEON models
- GAB disks (membership and service group heartbeat disks) are not supported.
- When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
- Review single attach VxVM notes for PowerPath and DMP restrictions.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
- Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
- PowerPath is not supported.

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPO.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Supports PowerPath v3.0.4 b12 only.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
- PowerPath supported. ATF/CDE not supported.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.

- PowerPath supported. ATF/CDE not supported.
- Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
- Compaq servers that are rack–mountable (designated by Compaq with an "R") are supported.
- Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
- Includes both Pentium PRO and XEON models

IBM

IBM – SuSE Linux						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Comments
1	eServer BladeCenter HS20 (Model 8678) ^{10, 11}	SuSE Linux SLES 8 SP2a (v2.4.19–SuSE.304) ^{2, 3}	Microsoft MSCS ^{4, 5, 6, 7}	HA: 4	IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ^{12, 13} , Optical Pass–thru Module 02R9080 ^{8, 9}	See ¹

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi–clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- Powerpath 3.0.5 supported with MSCS clusters on Windows 2003.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (http://www.microsoft.com/hwtest/hcl).
- EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
- Dual–port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.

- Update 6.
- GAB disks (membership and service group heartbeat disks) are not supported.
- For configurations with PowerPath 3.0.1 use native names only, and no power devices.
- Symmetrix SCSI-3 "PER" volume flag setting required for devices accessible through two or more paths.
- If all FC connectivity to the array is lost (without a server shutdown), then after connectivity is restored, the user must execute a vxctl enable command, before the VCS Oracle 9iRAC service group is brought back online.
- Requires minimum microcode level of 5669.45.24 for support of TimeFinder and/or SRDF.
- Requires Symmetrix 8000 Series, PowerPath 3.0.4 or later, VxVM 3.5 or later or Solstice Disk Suite (SDS) 4.2.1. Supported with Microcode 5568.52.18. 5567 code revisions supported are 5567.46.24 or 5567.53.30. 5567.53.30 requires the PGR Phase 4 E-pack. Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- Review VERITAS Database Edition/Advanced Cluster 3.5 for Oracle9i RAC Release Notes for supported Oracle Database releases.
- Veritas MP2 is required for clusters with more than 2 servers**
- 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
- Fcode should be loaded on all HBA's at the time of installation. All drivers and fcode can be downloaded from <http://www.qlogic.com>. Supports SNIA HBA API.
- LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
- For configurations with PowerPath 3.0.1 (or above) use native names only, and no power devices.
- For all Sun Cluster 3.x configurations where TimeFinder or SRDF are being used, please refer to the white papers EMC Symmetrix with Sun Cluster 3.x on Avatar and PowerLink.
- Requires Symmetrix DMX series, ucode revision 5669.44.23. PowerPath 3.0.4 or later or 5670.24.25 and PowerPath 4.0.3, VxVM 3.2 or Solstice Disk Suite (SDS) 4.2.1 or Solaris Volume Manager (SVM). Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- OPS and RAC configurations running VxVM 3.2 VxVM 3.2 P03.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Requires Sun patch 113277-09.
- Review single attach VxVM notes for PowerPath and DMP coexistence rules and restrictions.
- Requires Symmetrix DMX series, ucode revision 5669.45.24. PowerPath 3.0.4 minimum or 5670.24.25 and PowerPath 4.0.3, VxVM 3.5 or later, or Solstice Disk Suite (SDS) 4.2.1. Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- Requires Symmetrix DMX series, ucode revision 5669.45.24. PowerPath 3.0.4 minimum or 5670.24.25 and PowerPath 4.0.3. VxVM 3.2 or 3.5 or Solaris Volume Manager (SVM), Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- Use of the LP9002DC or QLA2342 requires FCO A0218-1 from Sun for HBA's to operate in 66mhz mode. Without this FCO the HBA's will only come up in 33mhz mode which could have an impact on performance.**

Fibre Connectivity: Switch

Fanout represents the maximum initiators (host adapters) per array port. Fanin represents the number of array ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see the Connectrix Enterprise Storage Network Planning Guide, EMC Networked Storage Topology Guide, and CLARiiON Open Systems Configuration Guide. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.

- For the DMX1000 and DMX2000, the only supported board in this configuration is the DMX-FC8M02. For the DMX800, the only supported boards are the DMX-FE-8M02 and DMX-FE-4M02.
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA): 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port. 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/ Fanin of 12:1/1:12 and Netware using the QLA2200F, which has a Fanout/Fanin of 6: 1/1:6. The Fanout/Fanin is restricted to 6:1/1:6. 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information. 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information. 5. Microcode level 5x66 and above.
- Addressable from Data Mover. Constrained by the number of targets addressable through a Symmetrix FA port.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.

- HP-UX Tachyon TL Fibre Channel Driver patch PHSS_26798 required
- Maximum of two hops between any two nodes belonging to the same Service Guard Cluster
- Boot device can not be located more than two hops from initiator utilized for booting
- Execute "ioscan -fn" following zone configuration changes on all affected servers in order for the changes to be recognized by the servers.
- The Powerpath path must be removed from the Powerpath configuration for all paths deleted from a zone configuration utilizing non-hardware enforced WWN zoning in order to prevent accessibility to the paths deleted from the zone configuration.
- Initiators from servers running HP-UX 11.0 and initiators from servers running HP-UX 11i v1.0 (HP-UX 11.11) may share the same FA port.
- Maximum LUNs per server 4096
- Maximum devices per server 2048
- For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/ivol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
- Minimum driver revision for HP-UX 11i v1.0 (HP-UX 11.11) is PCI/HSC Fibre Channel Driver B.11.11.09.
- Minimum driver revision for HP-UX 11.0 is PCI/HSC Fibre Channel Driver B.11.00.10.
- As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)

L2000 (product number A5191A)

N4000 Revision A (product number A3639A)

N4000 Revision B (product number A3639B)

- minimum firmware revision v3.0.2m or later EMC qualified firmware revision
- Domain value 8 can not be utilized when attaching HP-UX initiators (hba's)
- The switch port a hba is attached to which is utilized for HP-UX boot or dump processes must be configured for G_port lock.
- Single initiator zoning recommended.
- HP-UX initiators currently support only Volume Set Addressing method, Volume Logix required to set Volume Set Addressing for HP-UX initiators if port sharing configured with non-HP-UX initiators
- Maximum of 512 visible LUNs per hba supported with HP-UX 11i v1.0 (HP-UX 11.11) HA and non-HA configurations
- Maximum of 512 visible LUNs supported with HP-UX 11.0 non-HA configurations
- Maximum of 320 visible LUNs per hba supported with HP-UX 11.0 HA configurations
- minimum firmware revision v2.6.0d or later EMC qualified firmware revision
- minimum firmware revision v4.0.2a or later EMC qualified firmware revision
- Boot support Minimum fw.v4.0.2a
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- Switch support can be QuickLoop dedicated to any HP hosts in table titled "Clarion CX600/CX400 Base Connectivity" or heterogeneous fabric with HP FC-SW (fabric) hosts in that table. For FC4700, one port on each SP may be used for QuickLoop when the other port is used for FC-SW. QuickLoop support requires chargeable model DSBQLP-0D.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- QuickLoop is not supported with Brocade 3900/12000 or ED-12000B.
- minimum firmware revision 04.01.00 or later EMC qualified firmware revision
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- HP-UX Tachyon TL Fibre Channel Driver patch PHSS_26799 required
- Maximum devices per server 4096
- Maximum LUNs per server 8192
- Supported server models: rp7400 PDC 42.06
- Supported server model: rp7400 PDC 43.08
- During initial switch configuration with fw 1.2 or earlier, in an HP-UX environment, the Persistent FC IDs must be enabled on the Vsan that contains any HP HBAs. The N_Port Area IDs must be manually configured to be unique, static, and persistent on the Vsan that contains any HP HBAs, the target storage array's N_Port ID must also be set to persistent and static. See MDS 9000 Family Configuration Guide for details.
- Minimum PDC for server model rp7400, PDC 42.06
- Maximum of 320 visible LUNs per hba supported with HP-UX 11.0 HA configurations.
- During initial switch configuration with firmware 1.2 or earlier, in an HP-UX environment, the Persistent FC IDs must be enabled on the Vsan that contains any HP HBAs. The N_Port Area IDs must be manually configured to be unique, static, and persistent on the Vsan that contains any HP HBAs. The target storage array's N_Port ID must also be set to persistent and static. See MDS9000 Family Configuration Guide for details.
- Required Patch PHKL_28569, PHKL_26938 and 2port 2Gig driver version 11.11.01.
- See HBA for min Driver version

HPQ Open VMS

- Open VMS is supported as of April 17, 2000, and requires a minimum Symmetrix microcode level of 5265.48.30, 5266.23.19s, or 5566.26.19s.
- Open VMS 7.3 FC-SW requires console firmware 5.6 or later and patch VMS73_update-V0100 or patch VMS73_fibre_SCSI-V0200.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Open VMS 7.2-2 FC-SW requires console firmware 5.6 or later and patch VMS722_fibre_SCSI-V0100.
- The 200-561-9XX, and 200-563-9XX FA director families support a total of 256 LUNs per FA port. (Hewlett Packard Alpha Tru64 supports 255 LUNs.)
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.

- Tru64 V5.1 latest qualified Patch Kit-0006 (T64V51B20AS0006-20030210).
- V5.x: 255 LUNs/Symmetrix Fibre director port (LUNs 000-0FE valid) on Symmetrix DMX Series, requires OVMS director bit setting, LUN 000 must be mapped to a Symmetrix device, the LUN 000 device can be used as a normal disk device by the Tru64 host.
- Requires the Heterogeneous Host Configuration feature in EMC Solutions Enabler SYMCLI Device Masking Component Version 5.x
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Tru64 V5.1A latest qualified Patch Kit 6 (T64V51AB24AS0006-20031031).
- Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- Tru64 V4.0F BL13 Patch Kit 2 may introduce problems with KZPBA adapters. Tru64 V4.0F latest qualified Patch Kit 8 (DUV40FB22AS0008-20030730).
- If sharing port with Tru64 UNIX V5 hosts, use the Heterogeneous Host Configuration feature in EMC Solutions Enabler SYMCLI Device Masking Component V5.x (minimum 5568 microcode), or use Tru64 UNIX V5 director bit settings (with OVMS director bit set, the resulting LUN 000 array controller device will not be usable as a disk device by the Tru64 hosts).
- V4.0F, V4.0G: 8 LUNs/Symmetrix Fibre director port (LUNs 000-007 valid).
- Tru64 V4.0G latest qualified Patch Kit 4 (T64V40GB22AS0004-20030731).
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- For all PCI-based hosts only: See http://www-1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf for appropriate HBA placement guidelines.
- The 200-561-9XX, and 200-563-9XX FA director families support a total of 256 LUNs per FA port. (Hewlett Packard Alpha Tru64 supports 255 LUNs.)
- The IBM 2032-001 is the McData ED-5000.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- IBM SAN FC S08 (8-port) and S16 (16-port). Firmware level is 2.1.3. S08SAN FC switch includes four shortwave optical GBIC ports, and the option to add an additional 4 (8 total) longwave or shortwave ports to the S08. The S08 8-port switch is a single power entry. S16 SAN FC switch includes four shortwave optical GBIC ports, and the option to add an additional 12 (16 total) longwave or shortwave ports to the S16. The S16 is dual-powered. S08 & S16: 1) Shortwave GBIC: Feature Code=2010; 2) Longwave GBIC: Feature Code=2020; 3) Fibre Channel Cable Multimode optical 50.0u, 5m: Feature Code=5805; 4) Fibre Channel Cable Multimode optical 50.0u, 25m: Feature Code=5825.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Fibre Channel device driver distributed and supported by Bull.
- Firmware revision levels distributed and supported by Bull. Please see appropriate Bull documentation.
- This is a Brocade Silkworm 2800 (16 ports)
- This is a Brocade Silkworm 3800 (16 port, 2 Gb/s)
- This is a Brocade Silkworm 3200 (8 ports, 2 Gb/s)

- EMC recommends that HBAs of different vendors not be used in the same host server.
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA): 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port. 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/ Fanin of 12:1/1:12 and Netware using the QLA2200F, which has a Fanout/Fanin of 6: 1/1:6. The Fanout/Fanin is restricted to 6:1/1:6. 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information. 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information. 5. Microcode level 5x66 and above.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- EMC recommends that HBAs of different vendors not be used in the same host server.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA): 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port. 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/ Fanin of 12:1/1:12 and Netware using the QLA2200F, which has a Fanout/Fanin of 6: 1/1:6. The Fanout/Fanin is restricted to 6:1/1:6. 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information. 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information. 5. Microcode level 5x66 and above. (QLA2200) For IBM xSeries and Netfinity servers only.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

1. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
2. Maximum number of NWFS volumes that can be mounted is 64.
3. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
4. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA):
 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port.
 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information, Table 138 on page 345.
 5. Microcode level 5x66 and above.
5. NetWare 5.00 NSS has a 120 LUNs per port limitation. If NSS is used, the maximum LUNs per Symm-Port/HBA is 120/120.
6. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
7. EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
8. ED-64 and ED-1032 not supported for FC5300.
9. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
10. For IBM Netfinity and xSeries Intel servers only.
11. (QLA2200) For IBM xSeries and Netfinity servers only.
12. This HBA is equivalent to the qLogic QLA2310.
13. This HBA is equivalent to the qLogic QLA2340.
14. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA):
 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port.
 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and Netware using the QLA2200F, which has a Fanout/Fanin of 6: 1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information.
 5. Microcode level 5x66 and above.
15. Requires NWPA.NLM V.3.07A update from Novell website.
16. Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
17. Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- All adapters must be the same type except with HP-UX.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Single HBA zoning is required regardless of the switch being utilized.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Requires Connectrix microcode v2.0.1 or later or v2.2 or later.
- Requires Brocade firmware v2.5.1b or later.
- Requires Brocade firmware v3.0.2a or later.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Host must be offline for interfamily Symmetrix microcode upgrade.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a Symmetrix FA port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for No means this host cannot share an FA port with any different OS/HBA): 1. ESN Manager is required to prevent sharing Symmetrix devices between Operating Systems on a single FA port. 2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/ Fanin of 12:1/1:12 and Netware using the QLA2200F, which has a Fanout/Fanin of 6: 1/1:6. The Fanout/Fanin is restricted to 6:1/1:6. 3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information. 4. Reference the Heterogeneous FA Port Sharing section of Director Bit Information. 5. Microcode level 5x66 and above.
- The Sun Solaris sd driver is unable to configure a lun addresses greater than 255.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- No boot support at this time.

2. Symm6: 512 lun limit per FA port
3. For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
4. On HP-UX 11.00 LVM support only - no VxVM
5. Symm 6 is qualified with: HP-UX 11i Support Plus Sept '02 bundle = GOLDAPPS11i June '02, GOLDBASE11i June '02 & HWEnable11i Sept '02.
6. For driver versions refer to Base Connectivity Section
7. With PowerPath 3.0.1 and later, HP-UX 11i, Symm6 support: VxVM 3.2 is supported; VxVM 3.5 currently not supported.
8. As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)
L2000 (product number A5191A)
N4000 Revision A (product number A3639A)
N4000 Revision B (product number A3639B)

9. Symm 6 is qualified with: HP-UX 11.00 Support Plus Sept '02 bundle = QPK1100 Sept '02 & HWE1100 Sept '02
10. Supported with HP-UX 11.0, 11i only
11. **Required Patch PHKL_28569, PHKL_26938 and 2port 2Gig driver version 11.11.01.**
12. **Host must be configured as a 64Bit operating system.**

- EMC recommends that HBAs of different vendors not be used in the same host server.
- ATF/CDE and PowerPath cannot co-exist in the same server.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- (HHBA-5101BK-01)
- (QLA2200) For IBM xSeries and Netfinity servers only.
- The HP D8602B Tachlite Fibre Channel HBA does not come standard with a GBIC. An optional shortwave optical GBIC, HP part number D6975A, must be ordered separately from HP.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- This HBA is equivalent to the qLogic QLA2340.
- Stratus ftServer OS release 2.1 or greater required for Stratus ftServers.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- PowerPath Base is supported on the FC4500 and CX200 only.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- Host must be offline for interfamily Symmetrix microcode upgrade.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- CLARiiON and Symmetrix can co-exist in the SAN with the same server.**

SuSE Linux

SuSE Linux			
No.	Operating System	Host Bus Adapter	Application Software
1	SuSE Linux SLES 8 SP2a (v2.4.19-SuSE.304) ^{1,2}	Emulex: LP10000-E ^{3,4,5,6} , LP10000DC-E ^{3,4,5,6} , LP1050-E ^{3,4,5,6,10,12} , LP1050DC-E ^{3,4,5,6,10,12} , LP9002-E (LP9002L-E) ^{3,4,5,6,9} , LP9002DC-E ^{3,4,5,6,8} , LP9802-E ^{3,4,5,6} , LP9802DC-E ^{3,4,5,6,8} , LP982-E ^{3,4,5,6,10,11}	PowerPath 3.0.4 b012 ⁷

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- PowerPath 3.0.3 b065 needs to be installed with the RPM "--noscripts" option prior to installing PowerPath 3.0.4 b012.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Host must be offline for interfamily Symmetrix microcode upgrade.**
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**

- EAN bit set for 2 Gb FA support.
- Direct connect only, no hubs.
- Subject to IBMs limitations per host model.
- Sites with PowerPath 2.0 or later already running with the D-bit enabled do not require the D-bit to be disabled.
- D Bit required with PowerPath 1.5.x or earlier.
- Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).**
- Tru64 V5.1A latest qualified Patch Kit 6 (T64V51AB24AS0006-20031031).**
- Tru64 V5.1 latest qualified Patch Kit-0006 (T64V51B20AS0006-20030210).
- Open VMS 7.3 FC-SW requires console firmware 5.6 or later and patch VMS73_update-V0100 or patch VMS73_fibre_SCSI-V0200.
- Open VMS 7.2-2 FC-SW requires console firmware 5.6 or later and patch VMS722_fibre_SCSI-V0100.
- OpenVMS 7.2-1, 7.2-1H1 FC-SW requires console firmware 5.6 or later and patch VMS721_fibre_SCSI-V0400. Available from <http://ftp1.support.compaq.com/public/>
- Open VMS 7.1-2 requires console firmware 5.6 or later and patch VMS712_SCSI-V0300.
- C + D Bits with Veritas DMP.
- For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
- A4S bit when sharing AS/400 drives on this port (direct connect only).
- Requires OV/K/0041.3
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- D Bit for multiple vendor platforms; if only NCR hosts, set IMPL flag A010.
- E Bit: if Windows NT OS is used with TNT, set the FBA Environmental Sense key to 4, else set it to 6.
- Limited support available for MPARS 3.01.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- Maximum number of NWFS volumes that can be mounted is 64.
- D Bit with Cluster.
- Requires NWPA.NLM V.3.07A update from Novell website.
- C Bit required for VERITAS VxVM DMP functionality.
- VCM for VCM configurations only
- Set bit for HP (e.g.: D8602A, D8602B / Agilent (e.g.: HHBA-5101B, HHBA-5101C) controllers only.
- C Bit with Sun Cluster 3.0.
- Enabling the D-bit for DMP is recommended but not required for VxVM 3.1 and higher. The D-bit is not required for VxVM 3.1 and higher.
- C + D + SCL Bits with SUN Cluster 1.x, 2.x.
- D Bit is not required for VCS 2.0 or later.
- These settings refer to the configuration in the Switch section (see FA Port Sharing column) Note: operating environments that have required director bit settings other than these are not supported.
- Note: With the introduction of EMC Solution Enabler 5.0, FA ports need not use the 'Heterogeneous FA Port Sharing' flags. Instead, users can use the CLI function 'Heterogeneous Host Configuration' to set the director flags for each initiator.
- FSC requires that all patches for Solaris 9 be obtained through FSC in the form of a Solaris 9 PTF patch CD. The current patch CD is Solaris 9 PTF R03111.**
- VCM for Volume Logix configurations only

5670 Settings

There are no specific director bit settings required for iSCSI except the VCM bit with the following condition: VCM bit is required to enable Volume Logix functionality and for Challenge Handshake Authentication Protocol (CHAP).

- D Bit for multiple vendor platforms; if only NCR hosts, set IMPL flag A010.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- A4S bit when sharing AS/400 drives on this port (direct connect only).
- VCM for VCM configurations only
- Set bit for HP (e.g.: D8602A, D8602B / Agilent (e.g.: HHBA-5101B, HHBA-5101C) controllers only.
- C Bit required for VERITAS VxVM DMP functionality.
- Sites with PowerPath 2.0 or later already running with the D-bit enabled do not require the D-bit to be disabled.
- D Bit required with PowerPath 1.5.x or earlier.
- C + D Bits with Veritas DMP.
- D Bit is not required for VCS 2.0 or later.
- C Bit with Sun Cluster 3.0.
- C + D + SCL Bits with SUN Cluster 1.x, 2.x.
- E Bit: if Windows NT OS is used with TNT, set the FBA Environmental Sense key to 4, else set it to 6.
- Limited support available for MPARS 3.01.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- Maximum number of NWFS volumes that can be mounted is 64.
- D Bit with Cluster.
- Requires NWPA.NLM V.3.07A update from Novell website.
- No longer available
- Requires OV/K/0041.3
- Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).**
- Tru64 V5.1A latest qualified Patch Kit 6 (T64V51AB24AS0006-20031031).**
- Tru64 V5.1 latest qualified Patch Kit-0006 (T64V51B20AS0006-20030210).
- Tru64 V4.0G latest qualified Patch Kit 4 (T64V40GB22AS0004-20030731).**
- Tru64 V4.0F BL13 Patch Kit 2 may introduce problems with KZPBA adapters. Tru64 V4.0F latest qualified Patch Kit 8 (DUV40FB22AS0008-20030730).**
- Subject to IBM's limitations per host model.
- EAN bit set for 2 Gb FA support.
- Direct connect only, no hubs.
- For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
- Minimum microcode revision level 5670.23.25.
5568 and 5669 are on a RPK basis at this time.
- Open VMS 7.3 FC-SW requires console firmware 5.6 or later and patch VMS73_update-V0100 or patch VMS73_fibre_SCSI-V0200.
- Open VMS 7.2-2 FC-SW requires console firmware 5.6 or later and patch VMS722_fibre_SCSI-V0100.

33. OpenVMS 7.2-1, 7.2-1H1 FC-SW requires console firmware 5.6 or later and patch VMS721_fibre_SCSI-V0400. Available from <http://ftp1.support.compaq.com/public/>
34. Open VMS 7.1-2 requires console firmware 5.6 or later and patch VMS712_SCSI-V0300.

- For Symmetrix 8000 series: 5x66/ 5x67 patch 12160 OR minimum code levels 5267.24, 5567.31, 5266.39, or 5566.40.
- Nortel Optera Metro 5200 VLAN.
- VLAN Nortel BGS switches with 200 km single mode fiber spool using one of the wavelengths of a Cisco ADVA DWDM configuration.
- EMC recommends a minimum of 1GB RAM for servers in clusters. EMC requires that servers have a minimum of 512MB or RAM.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- MSCS 1.0 supported Host platforms supported
- Refer to Microsoft Windows Cluster table for information on supported host servers and qualified HBAs
- See Fibre Channel SRDF Connectivity Options table & Extended Distance Connectivity Devices table.
- Requires minimum microcode level of 5669.45.24 for Symmetrix DMX storage arrays.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- Must use standard PCI 32bit/33MHz slot for SCSI
- Upgrading Geospan servers from Windows 2000 to Windows 2003 is supported. EMC requires that Powerpath be uninstalled from Windows 2000 server before performing OS upgrade to Windows 2003 to prevent upgrade failures.

- Refer to Microsoft Windows Cluster table for information on supported host servers and qualified HBAs
- VLAN Nortel BGS switches with 200 km single mode fiber spool using one of the wavelengths of a Cisco ADVA DWDM configuration.
- Nortel Optera Metro 5200 VLAN.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- EMC recommends a minimum of 1GB RAM for servers in clusters. EMC requires that servers have a minimum of 512MB or RAM.
- Majority Node Set quorum configurations by RPQ only.
- Maximum 8 nodes in the topology supported by RPQ only.
- Requires minimum microcode level of 5669.45.24 for Symmetrix DMX storage arrays.
- For Symmetrix DMX series, minimum supported Widesky Solutions Enabler version is 5.1.
- Upgrading Geospan servers from Windows 2000 to Windows 2003 is supported. EMC requires that Powerpath be uninstalled from Windows 2000 server before performing OS upgrade to Windows 2003 to prevent upgrade failures.
- For Symmetrix 8000 series: 5x66/ 5x67 patch 12160 OR minimum code levels 5267.24, 5567.31, 5266.39, or 5566.40.
- For Symmetrix 8000 series, minimum version of Solutions Enabler is 4.2. Symmetrix 8000 series also supports Widesky Solutions Enabler at a minimum version of 5.1.

1. See Fibre Channel SRDF Connectivity Options table in Fibre Channel SRDF Connectivity section and Fibre Channel Extended Distance Solutions table in Distance Extension Solutions section.
2. See Legato User Guide Section G: EMC/SRDF Module (<http://www.legato.com>).
3. Solaris 7 and 8 using QLogic HBA requires RPQ.
4. SymmSockets HeartBeat not supported at this time.
5. Automatic Failover not supported at this time.
6. Optional Mount Agent Script Change on mount failure to shutdown the host recommended.
7. See Release Notes (<http://www.integratus.com>) for details.
8. See Fibre Channel SRDF Connectivity Options table & Extended Distance Connectivity Devices table.
9. See Fibre Channel Connectivity Symmetrix.
10. See HP Cluster Section for available Hosts
11. Synch. mode only
12. Asynch. mode requires RPQ.
13. Maximum 8 nodes in the topology
14. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5x66.26.19s.
15. LAAM (Legato Cluster) with SRDF integration requires minimum microcode level 5567.46.24 or 5568.58.12
16. Supported with microcode 5x65 and 5x66.
17. Supported with Symmetrix 4.8 and 5.0
18. This version does not support QLogic HBAs.
19. Jaycor HBA & driver must set failover parameter to greater than 0.
20. See EMC Release Notes for important configuration information.
21. Multiple RA groups are not supported.
22. Supported with microcode versions 5x66, 5x67, 5x68
23. Supported with Symmetrix models 4.8, 5.x
24. Supported with Symmetrix 5.x and DMX
25. Supported with 5x67, 5x68, and 5x69 microcode revisions.

CLARiiON FC5300 and FC4500

For CLARiiON FC5300 and FC4500 support, look at the FC4700 section and check the footnotes for model/microcode compatibility.

CLARiiON FC4700

Base Connectivity

- For more information see <http://athena.europe.dg.com>
- The release notice for DG/UX (included with the software release at path: "/usr/release/dgux*.m) lists supported platforms.
- FC4700 is only supported on DG/UX 4.20 MU07.
 - Maximum of 2 fabrics, each with a maximum of 4 switches.
 - Maximum of 4 FC4700s per fabric.
 - Maximum of 16 HBAs per fabric.
 - Maximum of 32 HBAs per FC4700 SP.
 - Maximum of 6 DG/UX servers per FC4700.
 - Maximum of 4 HBAs per AV3750 server (2 per fabric).
 - Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments).
- DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed.
- Only the Brocade FC switch connection is supported. Connectrix FC switch is not supported.
- DS–8B or DS–16B switches only; qualified with firmware v2.1.4a, v2.2, and v2.3.
- FC4700 clusters must use FC–SW mode and switches.
- Support for FC4500, FC4700, and FC5300.
- AViiON 25000/35000 servers are not supported for direct server connections to FC4700.
- ClarAlert is available to support FC4700 on AViiONs. ClarAlert is not compatible with other AViiON management software on the Navisphere management workstation.
- The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
- All installations currently require an RPQ with diagrams and revisions noted. Support for Core Array software is frozen at v8.42.10/60 for DG/UX systems.
- Firmware Version 3.20x4.

1. Dlx90, Rlx90 servers support a maximum of 2 A6684A HBAs. The first must be installed in the turbo slot 10/12 and the second in any HSC slot.

2. Dlx90, Rlx90 require minimum PDC firmware 41.35 or higher.
3. For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N/dev/vg01/lvol1 or lvcreate -r N/dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
4. With HP-UX 11.0, a failed-over LUN is not automatically restored to its parent SP following LCC removal and replacement on an FC4702 array. After the LCC has powered back up, the LUN can be restored by deactivating and activating the associated volume group using the command vgchange -a. During other types of failover (disabling/reenabling SP ports on switch, etc.), the LUN "is" automatically restored.
5. Driver Version 11.00.10.
6. Driver Version 11.11.09.
7. The Brocade (Brocade, EMC, or HP models) switch port the HBA involved in a FC-SW topology boot process or FC-SW topology dump process is attached to, is required to be locked as G port when the boot or dump volume resides on the Symmetrix. This can be accomplished by executing the "portCfgGport port_number,1" command from a telnet session on the Brocade switch. The boot device can not be located more than two hops from the initiator involved in the boot process.
8. See Technical Bulletin T010820 for supported patch levels.
9. Requires minimum PDC firmware 42.10.
10. See Technical Bulletin T010820 for LVM supported patch levels.
11. Required dependent FCMS patches are required (patches may be superseded or have co-dependencies as defined by HP): HP-UX 11.0, PHKL_21834 HP-UX 11i: PHKL_23626. NOTE: These patches must be installed before installing the driver, available at <http://us-support2.external.hp.com>, HSC Tachlite driver available at <http://www.software.hp.com>, under "drivers" and locate Fibre Channel HSC Tachlite adapter (A6684A or A6685A). For HP-UX 11i, the driver is under "hp tachyon tl fibre channel adapter" which enables support for A6684A/A6685A/A5158A.
12. HP-UX 11.0 minimum driver revision B.11.00.06. HP-UX 11i minimum driver revision B.11.11.06.
13. Dlx90, Rlx90 require minimum PDC firmware 41.35 or higher to support boot.
14. For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC Symmetrix devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N/dev/vg01/lvol1 or lvcreate -r N/dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set. No additional patches are required for this option in HP-UX 11.0, HP-UX 11.11 and forward, however in HP-UX 10.x the "N" flag option was introduced with the following patches are required to be installed or patches which supercede or replace these in order to configure the logical volumes residing on Symmetrix devices in this manner: For all HP/UX 10.xx versions install the following Bad Block Reallocation Patch Pair: 10.01: PHKL_11294, PHKL_11890, PHCO_11288 (patches may be superseded or have co-dependencies as defined by HP). 10.10: PHKL_11816, PHCO_11817 (patches may be superseded or have co-dependencies as defined by HP). 10.20: PHKL_11086, PHKL_11903, PHCO_10964 (patches may be superseded or have co-dependencies as defined by HP). For HP/UX 10.20 Driver J3630BA is required for A3404A, A3591A/B, A3740A, A6684A and A6685A adapters.
15. FC-AL
16. Symm 6 is qualified with: HP-UX 11.00 Support Plus Sept '02 bundle = QPK1100 Sept '02 & HWE1100 Sept '02
17. Qualified with only CX600, CX400, FC4500 and FC4700 with the switches listed in connectivity table, fabric or QuickLoop.
18. FC-AL, FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
19. Requires minimum PDC firmware 41.33.
20. The A6685A is not supported in slots 10/0 and 10/8 of the K570 and K580. In the K570 and K580, there are restrictions for the number of A6685A HBA cards supported when graphics cards are installed.
21. HP-UX 10.20 requires patches (patches may be superseded or have co-dependencies as defined by HP): PHKL_16751, PHKL_17590, PHSS_23581
NOTE: These patches must be installed before installing the driver, available at <http://us-support2.external.hp.com>. HSC Tachlite driver available at <http://www.software.hp.com>, under "drivers" and locate Fibre Channel HSC Tachlite adapter (A6684A or A6685A). Depending on the patch level of the system, the following patches may be required:
PHKL_16957PHKL_21595PHCO_16591PHSS_20999
PHKL_17858PHKL_21661PHCO_18563PHNE_19936
PHKL_20611PHKL_23419PHCO_21186
Installation instructions available at:
http://www.software.hp.com/cgi-bin/swdepot_parser.cgi/cgi/displayProductInfo.pl?productNumber=A6685A&oper=install
22. HP-UX 11.00 minimum driver revision B.11.00.06.
HP-UX 11i minimum driver revision B.11.11.06.
HP-UX 10.20 minimum driver revision B.10.20.01.
23. Qualified with only CX600, CX400, FC4500 and FC4700 with the switches listed in Table 112 on page 293, fabric or QuickLoop.
24. HP A5158A FC-SW software requirement: FC-AL and FC-SW requires the HP A5158A Tachlite PCI Fibre Channel Adapter. The A5158A FC-SW software fabric driver version "AP0301", for HP-UX 11i is now available for download from HP's software depot site, <http://www.software.hp.com> under "drivers". It is referred to as the "hp pci tachyon tl fibre channel adapter", and requires the installation of dependent patch PHKL_22874 prior to installing the fabric driver, patches may be superseded or have co-dependencies as defined by HP.
25. QuickLoop only or direct attach only.
26. FC-AL boot with PDC rev TSSW 3.2.1, PDC_ENTRY version: 4.3.4.0 or higher.
FC-SW boot with PDC rev TSSW 3.2.1 or higher, PDC_ENTRY version: 4.3.4.0 or higher.
27. N-Class: Arbitrated loop boot with PDC rev 40.04 or higher. Fabric boot with PDC rev 40.25 or higher.
28. Virtual Partitions (VPAR) is supported on the N-class/rp7400 server.
VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 42.06 or later. Powerpath support on Virtual Partitions has to be RPQ'd at this time.
29. As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)
L2000 (product number A5191A)
N4000 Revision A (product number A3639A)
N4000 Revision B (product number A3639B)
30. FC-AL direct attach 2-Gbit boot using A6795A is not supported.
FC-SW 2-Gbit boot and/or dump using A6795A requires Auto-Negotiation flag to be enabled on the switch port the HBA is attached to.
31. Boot initialization negotiation at 1 Gb mode for Brocade switches.
FC-SW - HBA port on the switch must be locked as a "G" port and locked in auto-negotiation mode.
32. FC-AL direct attach boot support only at 1 Gb. Requires the boot device port to be configured for 1 Gb operation.
33. PDC firmware 41.39 or higher; Arbitrated Loop (direct attach) or FC-SW
34. For HP/UX 11.00, minimum driver revision B.11.00.06.
35. Switched fabric (FC-SW) first supported on FC4500, requires Core Software 6.32.05 or higher, Navisphere Agent 4.3 or higher, and Access Logix enabled (data access control enabled).
36. Minimum driver version for SNIA HBA API support with HP-UX 11.0 is B.11.00.10. Minimum driver version for SNIA HBA API support with HP-UX 11.11 is B.11.11.09.
37. Supported with CX600, CX400, FC4700. FC4700-2 supports 1 and 2 Gb modes. Restrictions apply in boot environments.
38. HP-UX 11.0 ACE required patch: PHKL_23939
HP-UX 11i required patch: PHKL_23626
NOTE: These patches must be installed before installing the driver.
39. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
QuickLoop is not supported with Brocade 3900/12000, or ED-12000B.
Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
40. All switch ports participating in the QuickLoop must be set to 1 Gbit speed.
41. Supported with HP-UX 11i (64-bit only). FC4700-2 minimum code level 8.44.x1.
42. L-Class requires minimum PDC firmware 40.26 or higher.
43. rp5405, rp5430, rp5470, rp7400: (PA-8700 processors): Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001.
44. Excludes the rp5470 (PA-8700).
45. PA-8700 processors: Initial support with HP-UX 11.0 Sept 2001, HP-UX 11i Sept 2001.
46. Virtual Partitions (VPAR) is supported on the L-class/rp5470 server.
VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 41.02 or later.
47. For HP/UX 11.00 minimum driver revision B.11.00.06.
For HP/UX 11i minimum driver revision B.11.11.06.
48. HP A5158A FC-SW software requirements: FC-AL and FC-SW requires the HP A5158A Tachlite PCI Fibre Channel Adapter. The A5158A FC-SW software fabric driver version "AP0301", for HP-UX 11i is now available for download from HP's software depot site, <http://www.software.hp.com> under "drivers". It is referred to as the "hp pci tachyon tl fibre channel adapter", and requires the installation of dependent patch PHKL_22874 prior to installing the fabric driver, patches may be superseded or have co-dependencies as defined by HP.
49. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in Table 112 on page 293.
The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
QuickLoop is not supported with Brocade 3200/3800/12000, DS-16B2 or ED-12000B.
Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
50. FC-AL, FC-SW
51. Qualified on FC4500 and later. Requires Access Logix 6.32.11 (FC4500) or 8.42.5x (FC4700) or higher with data access control enabled and Navisphere Agent 5.2 or higher.
52. Fabric SAN boot supported.
53. Requires minimum PDC firmware 42.09.

54. Requires minimum PDC firmware 32.2 and PDHC 7.3 or higher
55. HP-UX 11.00 minimum driver revision B.11.00.06.
HP-UX 11i minimum driver revision B.11.11.06.
56. Requires minimum PDC firmware 35.4 and PDHC 7.8 or higher
57. HP-UX required patches: HP-UX 11.0 ACE: PHKL_23939, HP-UX 11i : PHKL_23626
58. Supported with CX600, CX400, FC4500 and FC4700. FC4700-2 supports both 1GB and 2GB modes. Restrictions apply in a boot environment.
59. Requires PDC firmware rp7400 (PA-8700) requires PDC firmware 41.36.
60. Qualified with only CX600, CX400, FC4500 and FC4700 with the switches listed in connectivity section, fabric or QuickLoop.
61. PDC 40.26 or later
62. Requires minimum PDC firmware 42.06.
63. Qualified with only CX600, CX400, FC4500 and FC4700 with the switches listed connectivity table, fabric or QuickLoop.
64. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
65. 1Gbit Quickloop supported beginning at firmware release v3.0.2h, all switch ports participating in the Quickloop must be set to 1 Gbit speed.
66. HP-UX 11i minimum driver revision B.11.11.06.
67. Virtual Partitions (VPAR) is supported on the N-class/rp7400 server.
VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later, server PDC firmware 42.06 or later.
68. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
QuickLoop is not supported with Brocade 3200/3800/12000, DS-16B2 or ED-12000B.
Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
69. QuickLoop support: HP A5223A/AZ, HP A5224A/AZ using parameters outlined in connectivity table.
The A6795A HBA is capable of supporting both 1 and 2 Gb speeds.
QuickLoop is not supported with Brocade 3900/12000, or ED-12000B.
Auto-sensing capability on the HBA is permanently enabled. There is no option to disable auto-sensing on the HBA.
70. PDC firmware 15.5 or later
71. HP-UX driver requirements: HP-UX 11.0 : A6684A/A6685A/A5158A/A6795A HP PCI Tachyon TL/XL2 Fibre Channel driver B.11.00.10 or later release which supports this HBA.
72. Virtual Partitions (VPAR) is supported on the rp8400 server with the Clarion CX600 and FC4700.
FC-AL only support, Requires PDC 16.009 or later. Fabric boot with PDC 16.12 or later

VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later.
73. Virtual Partitions (VPAR) is supported on the rp8400 server with the Clarion CX600 and FC4700.
FC-AL only support, Requires PDC 16.009 or later. Fabric boot with PDC 16.12 or later

VPAR supported only with HP-UX 11i v1.0 (HP-UX 11.11) Dec 2001 release or later.
Requirements: Minimum VPAR product release of A.02.01.00 or later, Partition Manager B.11.11.01.05 or later, Online Diagnostic revision B.11.11.07.23 or later
74. 1Gbit Quickloop supported beginning at firmware release v3.0.3h, all switch ports participating in the Quickloop must be set to 1 Gbit speed.
75. HP-UX 11i v2.0 (HP-UX 11.23) is a IA-64 release and only runs on the HP Integrity rx family server.
76. Driver Version 1.01a9. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
77. Firmware Version 1.01a2.

HPQ Tru64 UNIX HPQ

- Includes support for FC4700, FC4700–2, CX600, CX400.
- Requires adapter firmware 3.22A1, CLArrayS3.4.3.0.x fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
- IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server.
6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ;
6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
- FC–SW and FC–AL are supported on the same server.
- Firmware Version 3.22A1. Minimum supported level.
- System/Service processor combined microcode Version 20020920 dated 11/19/2002 or later.
- Booting from a PowerPath device is supported with FC–SW topology only.
- Minimum AIX 4.3.3 ML9, APAR IY22024
- Minimum Powerpath version 3.0.2. For Powerpath patches 3.0.x, the bootfix.sh script is required for boot support. See the EMC Primus case ID emc58038 for more details and the PowerPath Release Notes for installation
Obtain the EMC CLARiiON and AIX Fibre boot document from avatar.eng.emc.com for installation and configuration instructions.
- For Powerpath version 3.0.3, minimum CLArray S3.4.3.0.8 version is required.
- Fibre boot when used under AIX 4.3 requires APAR IY42989 which can be obtained from IBM at <https://techsupport.services.ibm.com/server/fixes?view=pSeries>.
- System microcode CL020407 or later.
- System/Service processor combined microcode Version SST01256/SS010614 dated 10/23/2001 or later.
- System/Service processor combined microcode Version L02113/ag010611 or later.
- System microcode CM020407 or later.
- System microcode MM020407 or later.
- System/Service processor combined microcode Version NAN02066/SC020308 dated 03/29/2002 or later.
- System/Service processor combined microcode Version SPH02254/sh020307 dated 11/20/2002 or later.
- The following link provides detailed data for all 9076–SP2 models and feature codes:
http://www1.ibm.link.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSRi4n1USenGnN9332&xh=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product
- AIX 5.1–32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
- Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.
- AIX 5.1 ML1, APAR IY21957 or higher.
- For Powerpath version 3.0.3, minimum CLArray S3.5.1.0.6 version is required.
- Fibre boot when used under AIX 5.1 requires APAR IY40885 which can be obtained from IBM at <https://techsupport.services.ibm.com/server/fixes?view=pSeries>.
- AIX 5.1 supported only with 32–bit kernel.
- IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server.
6227 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte ;
6228 Filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f9.diag, devices.pci/df1000f9.rte
- No support for the CX400 or CX600. Supports FC4500, FC4700, FC4700–2
- Requires CLARiiON proprietary fibre channel driver version 4.0.5.0 and HBA firmware 3.82A1
- See the EMC price book for vendor ordering information. This HBA is not sold by EMC. The EMC 4.0.5 driver is on UTIL–AIX.
- Requires a host PCI bus capable of supplying 3.3 VDC bus power. PCI slot can be either 3.3 VDC or 5.0 VDC signaling interface.
- The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
- Requires CLARiiON proprietary fibre channel driver version 4.0.5.0 and HBA firmware 3.20x4.
- Firmware Version 3.82A1. Minimum supported level.
- IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server. 6227 filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1000f7.rte; 6228 filesets: devices.pci/df1000f7.com, devices.pci/df1000f7.diag, devices.pci/df1080f9.diag, devices.pci/df1080f9.rte
- Requires minimum HBA firmware 3.82A1, CLArrayS3.4.3.0.x fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
- System/Service processor combined microcode Version CLT02066/ct020307 dated 04/04/2002 or later.
- Requires minimum HBA firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
- System/Service processor combined microcode Version RH020413 dated 05/22/2002 or later.
- System/Service processor combined microcode Version RR020822 dated 09/19/2002 or later.
- Requires minimum AIX 5.1 maintenance level 02.
- Requires adapter firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx.
- System/Service processor microcode Version RK021120 dated 12/11/2002 or later.
- Requires AIX 5.1 with minimum maintenance level 03 APAR 1Y32749.
- 32–bit kernel support only with AIX 5.1.
- For all PCI–based hosts only: see HBA placement guidelines in the IBM document PCI Adapter Placement Reference SA38–0538–6, available at http://www-1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf
- Requires CLArrayS3.5.2.0.6
- Fibre boot when used under AIX 5.2 requires APAR IY41028 which can be obtained from IBM at <https://techsupport.services.ibm.com/server/fixes?view=pSeries>.
- System/Service processor combined microcode Version RK030206 dated 03/31/2003 or later.
- Minimum microcode levels RH0 20413 dated 05/22/2002 or later.
- Firmware Version 1.00X5. Minimum supported level.
- Requires AIX 5.1 with minimum maintenance level 04 APAR IY44478.
- Requires CLArrayS3.5.1.0.6 or higher
- Requires CLArrayS3.5.2.0.7
- Requires AIX 5.2 with minimum maintenance level 01 APAR IY44479.
- For all PCI–based hosts only: See http://www-1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf for appropriate HBA placement guidelines.
- See http://www.rs6000.ibm.com/resource/hardware_docs/sa38-0538/380538.pdf for appropriate HBA placement guidelines
- Requires minimum ODM fileset support (5.0.0.0 EMC Symmetrix Fibre Channel support software).
- IBM 6227 and 6228 adapters are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server.
- AIX 5.2 32/64 bit kernel supported. Requires Minimum EMC ODM fileset support 5.0.0.0.
- AIX 5.2 requires Operating System APAR# IY36782, IY37744 and IY37746 for support with HACMP and HACMP/ES version 4.5 and PSSP 3.5.
- Requires AIX APAR IY48995

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiiON non-disruptive upgrades for Windows systems booting from CLARiiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
 - 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
 - 3) External storage director failures including failed lasers on Fibre Channel directors.
 - 4) External storage power failure.
 - 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
 - 6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements.
- Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

1. EMC recommends that HBAs of different vendors not be used in the same host server.
2. **Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
3. QLogic SANSurfer/SANBlade Manager is not supported.
4. Driver Version 8.2.3.21.
5. For FC-AL, only direct attach is supported.
6. FC-SW applies only to CX600, CX400, FC4500, FC4700, and FC5300. FC5300 with FC-SW available from selected channels.
7. CLARiiON FC4500 array is also supported for these configurations.
8. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
9. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
10. Driver Version 2.21a7.

1. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
2. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
3. CLARiiON FC4500 array is also supported for these configurations.
4. EMC recommends that HBAs of different vendors not be used in the same host server.
5. Driver Version 2.21a7.
6. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
7. Firmware Version 1.01a2.
8. The Emulex LP9xxx HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
9. Supported by direct attach only
10. Driver Version 8.2.3.21.
11. If using ATF/CDE, requires 2.1.6 or greater.
12. PowerPath supported. ATF/CDE not supported.
13. **Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
16. Firmware Version 1.80a3.
17. **Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- CLARiiON FC4500 array is also supported for these configurations.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Not supported with Emulex LP8000-EMC HBA.
- Driver Version 2.21a7.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- If using ATF/CDE, requires 2.1.6 or greater.
- Driver Version 8.2.3.21.
- Supported by direct attach only
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- If using Dell PERC Controller, requires PERC 3 with OpenManager 3.0 and Array Manager 3.1. The afamgt.sys must be version 2.6.0.3486 (or above)..
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.1.20.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- CLARiiON FC4500 array is also supported for these configurations.
- Driver Version 2.21a7.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- If using ATF/CDE, requires 2.1.6 or greater.
- Driver Version 8.2.3.21.
- Supported by direct attach only

12. PowerPath supported. ATF/CDE not supported.
 13. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
 14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
 15. Firmware Version 1.80a3.
 16. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
 17. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.

- CLARiON FC4500 array is also supported for these configurations.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Driver Version 2.21a7.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supported by direct attach only
- Driver Version 8.2.3.21.
- If using ATF/CDE, requires 2.1.6 or greater.
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Requires minimum BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supports BIOS 1.34. Supports SNIA HBA API. Driver and BIOS available at <http://www.qlogic.com>.**
- Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.

NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

- Firmware Version 3.90a7.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.1.20.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**
- Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. Supports SNIA HBA API.**
- EMC does not support the Emulex equivalent of the FCA2101 (LP952.) Use EMC supported driver for LP9002 from <http://www.emulex.com>.**
- Firmware Version 3.90a7. Contact HPQ for supported firmware versions for this HBA.

- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- CLARiiON FC4500 array is also supported for these configurations.
- Driver Version 2.21a7.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- If using ATF/CDE, requires 2.1.6 or greater.
- Driver Version 8.2.3.21.
- Supported by direct attach only
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
-

For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: <http://www-3.ibm.com/pc/support/site.wss/document.do?Indocid=MIGR-39723>

- 18. This HBA is equivalent to the qLogic QLA2310.
- 19. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- 20. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- 21. This HBA is equivalent to the qLogic QLA2340.
- 22. If using ATF/CDE, requires 2.0.9 or greater.
- 23. Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
- 24. **Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
- 25. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- 26. Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
- 27. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
- 28. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- 29. Driver Version 8.2.1.20.
- 30. Driver Version 8.1.5.20.
- 31. For IBM Netfinity and xSeries Intel servers only.
- 32. (QLA2200) For IBM xSeries and Netfinity servers only.
- 33. Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- 34. Firmware Version 3.90a7.
- 35. Firmware Version 1.80a3.
- 36. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- 37. **Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)**
- 38. **Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.**
- 39. **Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- 1. EMC recommends that HBAs of different vendors not be used in the same host server.
- 2. **Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- 3. Driver Version 2.21a7.
- 4. Firmware Version 1.01a2.
- 5. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- 6. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- 7. PowerPath supported. ATF/CDE not supported.
- 8. Driver Version 8.2.3.21.
- 9. Supported by direct attach only
- 10. If using ATF/CDE, requires 2.1.6 or greater.
- 11. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- 12. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- 13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- 14. Firmware Version 3.90a7.
- 15. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- 16. Firmware Version 1.80a3.
- 17. **Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- Qlogic SANSurfer/SANBlade Manager is not supported.
- For FC-AL, only direct attach is supported.
- FC-SW applies only to CX600, CX400, FC4500, FC4700, and FC5300. FC5300 with FC-SW available from selected channels.
- CLARiiON FC4500 array is also supported for these configurations.
- Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.

By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.

- Driver Version 8.2.3.21.
- Driver Version 2.21a7.
- Firmware Version 3.90a7.
- Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.

NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.

- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Qlogic SanBlade Manager is not supported.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.1.20.
- Supported by direct attach only
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
- Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.
- Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.

- Supported by direct attach only
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

Stratus

Stratus – Microsoft Windows 2000							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	ftServer 6500 ^{8, 11, 19, 20, 21}	PCI	Microsoft Windows 2000 Advanced Server SP ^{3,1,2,3}	QLogic QLA2310F-E-SP ^{4,12}	FC-AL, FC-SW	N	See ^{5,6}
2	ftServer: 3210 ^{7,8,9,10,11} , 3220 ^{7,8,9,10,11} , 3300 ^{11,16,17,18} , 5200 ^{9,13,14,15}	PCI	Microsoft Windows 2000 Advanced Server: SP ^{2,1,2,3} , SP ^{3,1,2,3} , SP ^{4,1}	QLogic QLA2310F-E-SP ^{4,12}	FC-AL, FC-SW	N	See ^{5,6}
3	ftServer: 5240 ^{8,11,19,20,21} , 5600 ^{11,22} , 6600 ^{11,22}	PCI	Microsoft Windows 2000 Advanced Server: SP ^{3,1,2,3} , SP ^{4,1}	QLogic QLA2310F-E-SP ^{4,12}	FC-AL, FC-SW	N	See ^{5,6}

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Qlogic SANSurfer/SANBlade Manager is not supported.
- FC-SW applies only to CX600, CX400, FC4500, FC4700, and FC5300. FC5300 with FC-SW available from selected channels.
- CLARiiON FC4500 array is also supported for these configurations.
- Supports Stratus OS 1.2.2.X through 2.1.X.
- Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
- Requires Stratus ftServer OS 1.4.x or greater.
- ftServer OS 1.4.x requires PowerPath 3.0.2.
- ftServer OS 2.1.x requires PowerPath 3.0.5 or greater.
- Driver Version 8.2.3.21.
- Supports Stratus OS 1.2.2.X through 1.4.X.
- Requires Stratus ftServer OS 1.4.x.
- Requires PowerPath 3.0.2.
- Supports Stratus OS 2.0.X through 2.1.X.
- Requires Stratus ftServer OS 2.0.x or greater.
- ftServer OS 2.0.x requires PowerPath 3.0.2.
- Supports Stratus OS 1.3.X through 2.1.X.
- ftServer OS 1.4 requires PowerPath 3.0.2.
- Requires Stratus ftServer OS 1.4.x or 2.1.x.
- Requires Stratus ftServer OS 2.1.x.

1. EMC recommends that HBAs of different vendors not be used in the same host server.
 2. PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
 3. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
 4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

5. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
6. Firmware Version 3.90a7.
7. Driver Version 2.21a7.
8. CLARiiON FC4500 array is also supported for these configurations.
9. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
10. If using ATF/CDE, requires 2.1.6 or greater.
11. Driver Version 8.2.3.21.
12. Supported by direct attach only
13. The LP9002-E now ships with the LP9002L-E low profile adapter.
14. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
15. Firmware Version 1.01a2.
16. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
17. Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.

- NOTE: LP8000/850 HBAs without –EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
18. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
 19. Hardware and adapters similar to Unisys ES7000-100, ES7000-200.
 20. The Libra 18x includes native MCP, and Virtual Machine for MCP (Windows MCPvm) partitions
 21. Firmware Version 1.80a3.
 22. **Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiiON non-disruptive upgrades for Windows systems booting from CLARiiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
- 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- 3) External storage director failures including failed lasers on Fibre Channel directors.
- 4) External storage power failure.
- 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
- 6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

Bull

Bull – Microsoft Windows 2003						
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot
1	Express 5800: 320Lb, 320Lb-R, 330Mb-R ^{11, 12} , 340Ha-R	PCI	Microsoft Windows 2003: Enterprise Edition (Advanced Server) ⁷ , Standard Edition (Server) ⁷	QLogic QLA2310F-E-SP ^{8, 9} , 10	FC-AL, FC-SW	N

1. QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
2. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
3. Emulex driver and BIOS available from <http://www.emulex.com>.
4. PowerPath requires driver 1.01x1 with Firmware 1.01A2 and StorPORT fix Q823728
5. Driver Version Emulex StorPORT driver v1.01x1.
6. Driver Version Emulex SCSI port driver v2.21a7.
7. EMC recommends that HBAs of different vendors not be used in the same host server.
8. Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
9. Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
10. Qlogic SANSurfer/SANBlade Manager is not supported.
11. Supports Stratus OS 1.3.X through 2.1.X.
12. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.

1. No EMC Layered Applications supported on IA64 server platforms
2. Driver Version 1.01x1. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
3. Firmware Version 1.01a2.
4. Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
5. Firmware Version 1.80a3.
6. Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
7. EMC recommends that HBAs of different vendors not be used in the same host server.
8. This HBA is equivalent to the QLogic QLA2340.
9. This HBA is equivalent to the QLogic QLA2310.
10. Firmware Version 3.90a7.
11. Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
12. Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
13. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
14. Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
15. Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
16. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
17. Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
 18. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 19. Driver Version 8.2.3.21.
 20. Driver Version 8.2.3.27. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
 21. Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
 22. Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.

1. No EMC Layered Applications supported on IA64 server platforms
2. Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
3. This HBA is equivalent to the QLogic QLA2340.
4. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
5. This HBA is equivalent to the Emulex LP982.
6. Driver Version 1.01x1. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
7. Firmware Version 1.01a2.
8. CX200 available through selected channels.
9. Qlogic SanBlade Manager is not supported.
10. Qlogic SANSurfer/SANBlade Manager is not supported.
11. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
12. Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.

By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.

13. EMC recommends that HBAs of different vendors not be used in the same host server.
14. Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
15. Firmware Version 3.90a7.
16. Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
17. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
18. Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
19. Firmware Version 1.80a3.
20. Supports Stratus OS 1.3.X through 2.1.X.
21. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
22. EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.
23. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.

Samsung

Samsung – Microsoft Windows 2003

3. Firmware Version 1.01a2.
4. Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
5. EMC recommends that HBAs of different vendors not be used in the same host server.
6. Firmware Version 3.90a7.
7. Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
8. Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
11. Firmware Version 1.80a3.

Microsoft Windows NT

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiON non-disruptive upgrades for Windows systems booting from CLARiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
- 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- 3) External storage director failures including failed lasers on Fibre Channel directors.
- 4) External storage power failure.
- 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.

6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- CLARiiON FC4500 array is also supported for these configurations.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- Driver Version 2.20a12.
- Firmware Version 1.01a2.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Firmware Version 3.90a7.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- HBA BIOS is 1.34.
- If using ATF/CDE, requires 2.0.9 or greater.
- Driver/BIOS are available at <http://www.qlogic.com>
- Driver Version 8.1.5.21.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Requires BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- Driver Version 2.20a12. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- Driver Version 2.20a12.
- CLARiON FC4500 array is also supported for these configurations.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Firmware Version 3.90a7.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Driver Version 8.1.5.21.
- HBA BIOS is 1.34.
- If using ATF/CDE, requires 2.0.9 or greater.
- Driver/BIOS are available at <http://www.qlogic.com>
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: <http://www-3.ibm.com/pc/support/site.wss/document.do?indocid=MIGR-39723>
- It is recommended that the QLogic QLA2340 is not installed in Slot 1.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- This HBA is equivalent to the qLogic QLA2310.
- This HBA is equivalent to the qLogic QLA2340.
- The LP9002-E now ships with the LP9002L-E low profile adapter.

- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Supports eight (8) hosts per array.
- FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
- Remote boot not supported with PERC controllers enabled in system BIOS.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
- PowerPath and ATF supported.
- NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.

15. Maximum number of NWFS volumes that can be mounted is 64.
16. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
17. **Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.**
18. Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
19. Novell Storage Services supported.
20. Powerpath & ATF supported.
21. CLARiiON FC4500 array is also supported for these configurations.
22. Driver Version 6.51a.
23. **DOS boot device maximum accessible capacity is 2GB. Netware SYS volume must be in LUN 0.**
24. **Edit config.sys with the following: Files=100 Buffers=99**
25. **When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.**
26. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
27. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
28. **Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
29. Driver Version v6.51a.
30. PowerPath supported. ATF/CDE not supported.
31. Requires NetWare patches: NWPAPT2A and NSS5J.
32. **PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.**
33. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
34. **Requires HBA bios 1.83.**
35. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
36. **Requires HBA firmware revision 1.83, available at <http://www.qlogic.com> Requires SP4 or higher for NetWare 5.00.**
37. (QLA2200) For IBM xSeries and Netfinity servers only.
38. **BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
39. Driver Version 6.v. Supports persistent binding and only supports Class 3.
40. Driver Version 6.50v.
41. This HBA is equivalent to the qLogic QLA2310.
42. For ATF on Pre CX series, Multipath support or connections to the secondary port are not supported at this time. One path per SP, 2 HBAs per host.
43. FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
44. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
45. Firmware Version 1.34.
46. **Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
47. **PowerPath not currently supported.**
48. **Requires BIOS version 2.02e.**
49. Driver Version 3.90a7.
50. **Requires NWPA.NLM V.3.07A update from Novell website.**

1. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
2. Maximum number of NWFS volumes that can be mounted is 64.
3. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
4. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
5. Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
6. Must use standard PCI 32bit/33MHz slot for SCSI
7. Driver Version 6.51a.
8. PowerPath not currently supported.
9. Requires BIOS version 2.02e.
10. Driver Version 3.90a7.
11. Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
12. Driver Version v6.51a.
13. Edit config.sys with the following: Files=100 Buffers=99
14. When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
15. To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT.C: partition will.
16. NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
17. Requires NWPA.NLM V.3.07A update from Novell website.

- FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Supports eight (8) hosts per array.
- FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
- PowerPath and ATF supported.
- NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
- Maximum number of NWFS volumes that can be mounted is 64.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- Requires HBA bios 1.83.
- Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
- Novell Storage Services supported.
- CLARiiON FC4500 array is also supported for these configurations.
- Powerpath & ATF supported.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Driver Version 6.51a.
- Edit config.sys with the following: Files=100 Buffers=99
- When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
- Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Driver Version v6.51a.
- PowerPath supported. ATF/CDE not supported.

30. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
31. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
32. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
33. Includes both Pentium PRO and XEON models
34. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
35. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
36. Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.
37. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
38. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
39. QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
40. Firmware Version 1.34.
41. Requires BIOS version 2.02e.
42. Driver Version 3.90a7.
43. PowerPath not currently supported.
44. Requires NWPA.NLM V.3.07A update from Novell website.

- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- Maximum number of NWFS volumes that can be mounted is 64.
- Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.
- Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
- Novell Storage Services supported.
- Powerpath & ATF supported.
- CLARiiON FC4500 array is also supported for these configurations.
- Driver Version 6.51a.
- Driver installation with NetWare 5.0 SP6A: Do not load cpmpmk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Driver Version v6.51a.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
- (QLA2200) For IBM xSeries and Netfinity servers only.

18. BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
19. Driver Version 6.v. Supports persistent binding and only supports Class 3.
20. Driver Version 6.50v.
21. **Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.**
22. This HBA is equivalent to the qLogic QLA2310.
23. **Requires BIOS 1.34 available from Qlogic at <http://www.qlogic.com>.**
24. This HBA is equivalent to the qLogic QLA2340.
25. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
26. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
27. PowerPath and ATF supported.
28. Driver installation with NetWare 5.0 SP6A: Do not load cpmpmk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
29. **Requires HBA bios 1.83.**
30. **QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
31. Firmware Version 1.34.
32. **PowerPath not currently supported.**
33. **Requires BIOS version 2.02e.**
34. Driver Version 3.90a7.
35. **Requires NWPA.NLM V.3.07A update from Novell website.**

- Requires v6.2.1 or higher Navisphere host agent/CLI.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- Not available for FC5700
- PowerPath supported. ATF/CDE not supported.
- CLARiiON FC4500 array is also supported for these configurations.
- An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.
- Requires v6.05 or higher Navisphere host agent/CLI.
- Requires BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires QLogic driver 4.47.18 and BIOS 1.83.
- Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
- Driver Version v6.05.00.
- Driver Version v6.x series. Supports persistent binding and only supports Class 3.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Single HBA zoning is required regardless of the switch being utilized.

- 35. Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- 36. Driver Version v6.04.01.
- 37. Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- 38. Driver Version 1.23a.
- 39. FCode value 1.63a2.
- 40. Emulex driver and BIOS available from <http://www.emulex.com>.
- 41. **QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- 42. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- 43. The LP9002–E now ships with the LP9002L–E low profile adapter.
- 44. FC–AL and FC–SW can run concurrently on separate HBAs on the same Host.
- 45. Firmware Version 3.90a7.
- 46. FCode value 1.63a.
- 47. Linux v2.4.x Kernels support a maximum of 128 devices per system.
- 48. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
- 49. Firmware Version 1.80a2.
- 50. Driver Version v1.22e.
- 51. Firmware Version v3.90a7.
- 52. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- 53. Firmware Version 1.02a0.
- 54. Firmware Version 1.80a3.
- 55. **Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.**

- Requires v6.2.1 or higher Navisphere host agent/CLI.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- Not available for FC5700
- PowerPath supported. ATF/CDE not supported.
- CLARiiON FC4500 array is also supported for these configurations.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.

18. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
19. For any CLARiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
20. **Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
21. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
22. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
23. Includes both Pentium PRO and XEON models
24. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
25. **QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
26. Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
27. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
28. Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
29. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
30. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
31. Requires QLogic driver 4.47.18 and BIOS 1.83.
32. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
33. **BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
34. Driver Version v6.05.00.
35. Driver Version v6.x series. Supports persistent binding and only supports Class 3.
36. Single HBA zoning is required regardless of the switch being utilized.
37. **Requires BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
38. The kernel version listed is included in the corresponding standard distributed release.
39. Requires v6.05 or higher Navisphere host agent/CLI.
40. For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
41. Requires QLogic driver v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
42. This HBA is equivalent to the qLogic QLA2310.
43. Driver Version v6.04.02.
44. (QLA2200) For IBM xSeries and Netfinity servers only.
45. Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
46. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
47. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
48. **QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
49. Emulex driver and BIOS available from <http://www.emulex.com>.
50. Driver Version 1.23a.
51. FCode value 1.63a2.
52. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
53. Driver Version v6.04.01.
54. This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
55. The LP9002-E now ships with the LP9002L-E low profile adapter.
56. FCode value 1.63a.
57. Firmware Version 3.90a7.
58. Linux v2.4.x Kernels support a maximum of 128 devices per system.
59. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
60. Firmware Version 1.80a2.
61. Firmware Version 1.01a2.
62. Firmware Version 1.02a0.
63. Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.
64. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
65. PowerPath v3.02 not supported on this system.
66. Driver Version v1.22e.
67. Firmware Version v3.90a7.
68. Driver Version v6.04.01. Supports persistent binding and only supports Class 3.
69. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
70. Firmware Version 1.80a3.

- Requires v6.2.1 or higher Navisphere host agent/CLI.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- Not available for FC5700
- PowerPath supported. ATF/CDE not supported.
- CLARiiON FC4500 array is also supported for these configurations.
- PowerPath v3.02 not supported on this system.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.

23. PowerPath v3.0.2 b069 is not supported on this system.
24. This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
25. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
26. Driver Version v6.05.00.
27. Driver Version v6.04.02.
28. Driver Version v6.x series. Supports persistent binding and only supports Class 3.
29. (QLA2200) For IBM xSeries and Netfinity servers only.
30. **BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
31. This HBA is equivalent to the qLogic QLA2310.
32. This HBA is equivalent to the qLogic QLA2340.
33. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
34. The kernel version listed is included in the corresponding standard distributed release.
35. Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
36. **QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
37. Requires QLogic driver 4.47.18 and BIOS 1.83.
38. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
39. Requires QLogic driver v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
40. For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
41. Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
42. Driver Version v6.04.01.
43. This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
44. The LP9002-E now ships with the LP9002L-E low profile adapter.
45. Emulex driver and BIOS available from <http://www.emulex.com>.
46. **QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
47. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
48. FCode value 1.63a2.
49. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
50. Driver Version 1.23a.
51. Single HBA zoning is required regardless of the switch being utilized.
52. This HBA is equivalent to the QLogic QLA2200.
53. Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
54. Firmware Version 3.90a7.
55. FCode value 1.63a.
56. Linux v2.4.x Kernels support a maximum of 128 devices per system.
57. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
58. Firmware Version 1.80a2.
59. Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
60. Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
61. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
62. **Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
 63. Driver Version 6.04.01.
 64. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 65. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
 66. Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.
 67. Driver Version v1.22e.
 68. Firmware Version v3.90a7.
 69. **Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)**
 70. **Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.**
 71. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
 72. Firmware Version 1.02a0.
 73. Firmware Version 1.80a3.
 74. **Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.**

1. This kernel is limited to 110 devices, not 128.
2. Requires QLogic driver 4.47.18 and BIOS 1.83.
3. Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
4. Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
5. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
6. No MirrorView or SnapView used on boot LUNs.
7. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
8. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
9. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
10. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
11. Requires v6.2.1 or higher Navisphere host agent/CLI.
12. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
13. Supported with QLogic driver v6.05.00.
14. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
15. **BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
16. Requires v6.0.5 or higher Navisphere host Agent/CLI.
17. Not available for FC5700
18. PowerPath supported. ATF/CDE not supported.
19. CLARiiON FC4500 array is also supported for these configurations.

20. Driver Version v6.x series. Supports persistent binding and only supports Class 3.
21. Driver Version v6.05.00.
22. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
23. Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
24. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
25. **Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
26. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
27. This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
28. Driver Version v6.04.01.
29. Single HBA zoning is required regardless of the switch being utilized.
30. Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
31. **QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
32. Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
33. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
34. **QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
35. Emulex driver and BIOS available from <http://www.emulex.com>.
36. Driver Version 1.23a.
37. FCode value 1.63a2.
38. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
39. The LP9002-E now ships with the LP9002L-E low profile adapter.
40. Firmware Version 3.90a7.
41. FCode value 1.63a.
42. Linux v2.4.x Kernels support a maximum of 128 devices per system.
43. Firmware Version 1.80a2.
44. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
45. Firmware Version v3.90a7.
46. Driver Version v1.22e.
47. Firmware Version 1.02a0.
48. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
49. Firmware Version 1.80a3.
50. **Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.**
51. **Supports Stratus OS 2.0.X through 2.1.X.**
52. **Supports Stratus OS 1.3.X through 2.1.X.**
53. **Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.**

1. Uses native HBA driver and firmware.
2. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
3. PCI-FC-1P-OPT-B supports a data rate of 2 Gb/sec.
4. No support for CX600, CX400, and FC4700.
5. FC5500 and Origin 2000 only.
6. CX600, CX400, FC4700, and FC5500 only.
7. Field support for FC5500, requires minimum Flare revision 2.04.42; no new shipments.
8. No cable with kit; order separately.
9. A MIA is required for FC5500.
10. CX600, CX400, and FC4700 do not require a MIA and are both FC-AL and FC-SW.

- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPK.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from [ftp://ftp.emc.com/pub/elab/linux](http://ftp.emc.com/pub/elab/linux).
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from <http://www.qlogic.com>.
- Driver Version 6.05.00.
- Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- Requires BIOS 1.34 available from QLogic at <http://www.qlogic.com>.
- FCode value 1.63a2.
- Firmware Version 1.01a2.
- Driver Version 1.23a.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Firmware Version 1.80a3.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Firmware Version 3.90a7.

- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiON–attached hosts available from [ftp://ftp.emc.com/pub/elab/linux](http://ftp.emc.com/pub/elab/linux).
- Driver Version 6.05.00.
- Compaq servers that are rack–mountable (designated by Compaq with an "R") are supported.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from <http://www.qlogic.com>.
- Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- Includes both Pentium PRO and XEON models
- HPQ Proliant servers that are rack–mountable (designated with an "R") are supported.
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32–bit, this shielding prohibits 64–bit HBAs from properly seating in the PCI slots. To accommodate 64–bit HBAs, this shielding must be removed, or modified to allow the 64–bit HBA to fully seat in the 32–bit slots.

13. Requires BIOS 1.34 available from QLogic at <http://www.qlogic.com>.
14. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
15. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
16. FCode value 1.63a2.
17. Firmware Version 1.01a2.
18. Driver Version 1.23a.
19. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
20. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
21. Emulex driver and BIOS available from <http://www.emulex.com>.
22. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
23. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
24. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
25. No MirrorView or SnapView used on boot LUNs.
26. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
27. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
28. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
29. For any CLARiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
30. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
31. Firmware Version 1.80a3.
32. Firmware Version 3.90a7.

- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPK.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from http://www.qlogic.com.
- Driver Version 6.05.00.
- Supports BIOS 1.83. Available at http://www.qlogic.com. Supports SNIA HBA API.
- This server only supports 5 Volt HBAs: QLogic 22XX family (if applicable), QLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- Requires BIOS 1.34 available from Qlogic at http://www.qlogic.com.
- EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
- Supports IBM BIOS 1.35. Available at http://www.qlogic.com.
- Due to the HS20's embedded FC–SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPK.
- Dual–port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from http://www.emulex.com.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Driver Version 1.23a.
- Firmware Version 1.01a2.
- FCode value 1.63a2.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Firmware Version 1.80a3.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNS.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.
- PowerPath v3.0.2 b069 is not supported on this system.
- PowerPath v3.02 not supported on this system.
- Firmware Version 3.90a7.

- Sun "clone" hosts are not supported
- Veritas DMP coexistence with EMC CLARiiON failover packages:
VERITAS DMP can be enabled and coexist on the same host with ATF or PowerPath. VERITAS Volume Manager 3.5 is the currently recommended version. VERITAS DMP, as part of Volume Manager 3.2, can be used to manage CLARiiON arrays without ATF or PowerPath by using CLR-ASL.
- Emulex LP8000-EMC/LP9002-E/LP9002L-E/LP9002DC-E/LP9802-E requires fcode 1.40a0. Emulex LP9002S-E requires fcode 2.40a0.
- Support for FC-AL or FC-SW.
- EMC required Sun patches for Solaris 9:**
112233-08 Sun OS 5.9: kernel patch
112834-03 Sun OS 5.9: patch SCSI
113277-17 Sun OS 5.9: sd and ssd patch
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC.
- Mixing JNI and Emulex SBUS HBAs on the same host connected to the same storage system is not supported. If there is a business reason to do so, submit an RPQ.
- Dynamic Reconfiguration is supported (Enterprise 10000 SBus only); requires ATF v3.1.2 or higher.
- Driver Version 5.02c.
- Firmware Version 3.91a3.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- FC-SW applies only to CX600, CX400, FC4500 and FC4700
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC required Sun patches for Solaris 2.6:
105181-35 SunOS 5.6: kernel update patch
105356-23 SunOS 5.6: /kernel/drv/ssd and /kernel/drv/sd patch.
105580-19 SunOS 5.6: /kernel/drv/glm patch (for X6541 HBA only).
- For new installations, core software minimum requirement with CX600
Array software – Access Logix 02.02.1.60.5.005
Array software – Non-Access Logix 02.02.0.60.5.005
CX400
Array software – Access Logix 02.02.1.40.5.006
Array software Non-Access Logix 02.02.0.40.5.006
Driver Version 5.02b.
- The Emulex LP9002L-F2 HBA requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can be either 3.3 VDC or 5.0 VDC signaling interface.
- FCode value 2.00.06.
- Driver Version 4.13.
- Requires at least Rev 03 of LP8000-N1 HBA (part # 118031355-03)
- PCI Boot support is from 1 or 2 servers for FC-AL and from 1 to 4 servers for FC-SW.
- Note: Boot through DS-8B/DS-16B switches using 2.2.1a or 2.3 switch firmware requires HBA fcode v1.12a1 or higher.
- EMC required Sun patches for PCI at Solaris 7: 106541-27 SunOS 5.7: kernel update patch
- Firmware Version 1.01a2.
- QCP2202F-E-SP/QLA234x-E-SP requires fcode v2.00.06. Fcode should be loaded on all HBA's at the time of installation.
- EMC required Sun patches for Solaris 8:**
108528-26 SunOS 5.8: kernel update patch.
108974-36 SunOS 5.8: data, uata, dad, sd, and scsi patch.
109657-09 SunOS 5.8: isp driver patch (for X1062A and X1065A HBAs only).
109885-14 SunOS 5.8: glm driver patch (for X6541A HBA only).
- 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
- The LP9002-E now ships with LP9002L-E low profile adapter. The older full form factor LP9002-E will not fit into the Sun Fire 12K or 15K.
- Supports DR on Sun 12K and 15K.
- Support for FC4500, FC4700, and FC5300.
- Requires driver rev 2.07.17 or higher and fcode 13.3.8.02C
- EMC required Sun patches for SBUS at Solaris 7: 106541-27 SunOS 5.7: kernel update patch
- Requires at least HBA firmware 13.3.8C.
Boot through DS-08B or DS-16B switch requires minimum HBA firmware 13.3.8.01C.
Boot through DS-16M, DS-32M, ED-64M, ED-140M or ED-1032 switches requires switch firmware v1.2.0 or higher.
- No longer available
- If ATF is used, requires at least v3.3.0 ATF.
- Driver Version 4.14.
- FCode value 2.00.06. QCP2202F-E-SP/QLA234x-E-SP requires fcode v2.00.06. Fcode should be loaded on all HBA's at the time of installation.
- Use of the LP9002DC or QLA2342 requires FCO A0218-1 from Sun for HBA's to operate in 66mhz mode. Without this FCO the HBA's will only come up in 33mhz mode which could have an impact on performance.**
- Firmware Version 1.80a2.
- FCode value 1.40a0.
- Requires RPQ

Clustered Host DG DG/UX DG

- Maximum of 2 HBAs per NUMA block (1 per fabric) in clustered environments.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- DS-8B or DS-16B switches only; qualified with firmware v2.1.4a, v2.2, and v2.3.
- FC4700 clusters must use FC-SW mode and switches.
- Support for FC4500, FC4700, and FC5300.
- FC4700 is only supported on DG/UX 4.20 MU07. Maximum of 2 fabrics, each with a maximum of 4 switches. Maximum of 4 FC4700s per fabric. Maximum of 16 HBAs per fabric. Maximum of 32 HBAs per FC4700 SP. Maximum of 6 DG/UX servers per FC4700. Maximum of 4 HBAs per AV3750 server (2 per fabric). Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments). 2. FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
- The release notice for DG/UX (included with the software release at path: /usr/release/dgux*.m) lists supported platforms.
- DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed. Current DG/UX R4.20MU06 OS supported firmware is V3.20x1 and BIOS

8. FC-AL support requires LP8000 BIOS version DB1.60A7 and firmware version DS3.20x4.
 9. For more information see <http://athena.europe.dg.com>

- See Technical Bulletin T010820 for supported patch levels.
- For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
- 2-node clusters require special configurations. See Support Note S010106A on Customer Service web site.
- Refer to MC/Service Guard Release Notes at www.docs.hp.com for patch requirements.
- Can mix HP-UX 11.00 and HP-UX 11i in same cluster, all nodes must be MC/SG 11.09, 11.13 or later.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- HP-UX 11.0: MC/SG 11.13 and 11.14 LVM only.
HP-UX 11i: MC/SG 11.13 and 11.14 can be used with LVM, VxVM 3.1 and VxVM 3.2. No DMP node failover supported at this time.
- rp5470, rp7400: (PA-8700 processors) : Initial support with HP-UX 11.0 Sept 2001, 11i Sept 2001.
- HP A5158A is enabled in March 2000 HWCR Bundle XSWHWR1100.48. Additional patches may be required for support.
- Supported with CX600, CX400, FC4500 and FC4700.
- As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)

L2000 (product number A5191A)

N4000 Revision A (product number A3639A)

N4000 Revision B (product number A3639B)

Patch PHSS_21996 or patches replaced or superseded by are required with HP-UX 11i.

FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.

Switched fabric (FC-SW) first supported on FC4500, requires Core Software 6.32.05 or higher, Navisphere Agent 4.3 or higher, and Access Logix enabled (data access control enabled).

PA-8700 processors: Initial support with HP-UX 11.0 Sept 2001, HP-UX 11i Sept 2001.

Supported with cx600, cx400, fc4500, fc4700

MC/ServiceGuard 11.15 is supported on HP-UX 11i v1.0 and HP-UX 11i v2.0 only**Minimum microcode revision level 5670.23.25. 5568 and 5669 are on a RPQ basis at this time.**

1. Supported with the FC4700-2 only.
2. FC4700: Minimum AccessLogix 8.45.5x and Navisphere Manager 6.0.5.4.x.
3. Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).
4. Identical to KGPSA-DA.
5. Tru64 UNIX V5.1A minimum requirement for ES45.
6. Tru64 UNIX V5.1A minimum requirement for DS25.
7. KGPSA-BC/KGPSA-CA supported ONLY.
8. AlphaServer GS1280,ES80,ES47: Minimum Tru64 V5.1B with Patch Kit 1 (T64V51BB1AS0001-20021229)

- Includes support for FC4700, FC4700–2, CX600, CX400.
- Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700–2 with minimum Flare code 8.46.xx.
- Minimum Powerpath version 3.0.2 is supported.
- FC–SW and FC–AL are supported on the same server.
- Minimum PowerPath 3.0.2 is supported.
- Minimum CLArrayS3.4.3.0.x fileset is supported. Supports FC4700, FC4700–2, with minimum Flare code 8.46.xx.
- This configuration for HACMP when used in conjunction with Fibre Channel boot requires RPQ approval.
- Minimum Powerpath version 3.0.2 is supported
- Includes support for the FC4700, FC4700–2, CX600, CX400.
- Includes support for FC4500, FC4700, FC4700–2. Requires EMC 4.0.5.0 Fibre Channel driver. FC–AL for FC4700 requires base software or Access Logix 8.42.xx or higher.
- For IBM AIX 4.3.3: requires Oracle RAC9i (9.0.1), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
A SAN implementation with ISLs will observe significant delay in failover times if link failures non–contiguous to host HBA occur.
For IBM AIX 5.1: requires Oracle RAC9i (9.2), HACMP/ES 4.4.x. PowerPath 3.0.2 or greater is supported.
A SAN implementation with ISLs will observe significant delay in failover times if link failures non–contiguous to host HBA occur.
- AIX 5.1–32/64 bit kernel supported. Requires CLArrayS3.5.1 fileset support.
- For installation with Powerpath Versions 3.0.3 and 3.0.4 see Primus ID EMC69100 which contains additional requirements for support.
- The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
- Requires minimum AIX 4.3.3 with APAR IY22024, Requires PSSP 3.4 with APAR IY32625
- Refer to Primus case #1.0.128870403.2749464 for configuration instructions.
- Minimum AIX 4.3.3 ML9, APAR IY22024
- Requires minimum PSSP 3.4 APAR IY32625, IY31025
- AIX 4.3.3 ML9, APAR IY22024
- Requires minimum PSSP 3.2 APAR IY18172, IY31012
- The following link provides detailed data for all 9076–SP2 models and feature codes:
http://www1.ibm.link.ibm.com/cgi-bin/master?request=salesmanual&parms=SMS&xh=NTZH*daEMSRi4n1USenGnN9332&xhi=usa.main%7Csalesmanual%5E&type=D&search=9076&title=T&product
- Requires minimum AIX 4.3.3 APAR IY22024.
- Requires minimum PSSP 3.4 APAR IY33448.
- Requires minimum PSSP 3.2 APAR IY18172
- AIX 5.1 supported with 32–bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
- Supported in SMP and LPAR modes.
- GAB disks (membership and service group heartbeat disks) are not supported.
- PowerPath is supported with LVM and JFS
- AIX 5.1 supported with 32/64 bit kernel.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Requires adapter firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx.
- Requires AIX 5.1 with minimum maintenance level 03 APAR 1Y32749.
- For minimum Powerpath version 3.0.3, minimum CLArray S3.5.1.0.6 version is required.
- Requires minimum AIX5.1 with maintenance level 03 APAR IY32749.
- Minimum Powerpath version 3.0.3 is supported.
- Requires minimum PSSP APAR IY38509
- PSSP 3.5 supports a 32 or 64 bit kernel.
- IBM Native Fibre Channel drivers with feature code 6227 and with feature code 6228 are supported on the same server. Feature 6228 and 6239 are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server. 6227 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte; 6228 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte; 6239 filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1080f9.diag, devices.pci.df1080f9.rte
- AIX 5.1 supported only with 32–bit kernel.
- Requires adapter firmware 3.22A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum flare code 8.46.xx.
- AIX 5.2 requires Operating System APAR# IY36782, IY37744 and IY37746 for support with HACMP and HACMP/ES version 4.5 and PSSP 3.5.**
- When installing under AIX 5.2 HACMP/ES 4.5 APAR# IY36938, HACMP/ES 4.5 APAR# IY36933, HACMP/ES 4.5 APAR# IY36626 and RSCT 2.3 APAR# IY36626 are required.
- HACMP 4.5 when installing under AIX 5.2 requires HACMP 4.5 APAR# IY36938.
- AIX 5.1 supported with 32/64–bit kernel. Requires minimum EMC ODM fileset support 5.0.0.0.
- AIX 5.1 32/64 bit Kernel supported. Minimum PowerPath Version 2.1.2 supported . Requires minimum EMC ODM fileset support 5.0.0.0.
- Requires minimum IBM APAR IY43999
- Requires a minimum of three nodes in the cluster.
- See http://www.rs6000.ibm.com/resource/hardware_docs/sa38–0538/380538.pdf for appropriate HBA placement guidelines
- Requires minimum ODM fileset support (5.0.0.0 EMC Symmetrix Fibre Channel support software).
- IBM 6227 and IBM 6228 adapters are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server. Mixed FC–AL and FC–SW are supported on the same server. 6227 Filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f7.rte ; 6228 Filesets: devices.pci.df1000f7.com, devices.pci.df1000f7.diag, devices.pci.df1000f9.diag, devices.pci.df1000f9.rte
- For all PCI–based hosts only: See http://www–1.ibm.com/servers/eserver/pseries/library/hardware_docs/sa38/380538.pdf for appropriate HBA placement guidelines.
- Requires minimum HBA firmware 3.82A1, CLArrayS3.5.1 fileset support. Supports FC4700 with minimum Flare code 8.46.xx .
- AIX 5.2 32/64 bit kernel supported. Requires Minimum EMC ODM fileset support 5.0.0.0.**
- Requires AIX APAR IY48995**
- Minimum PowerPath 3.0.3 supported.**
- Requires minimum of CLArrayS3.5.2.0.7**

Microsoft Windows 2000

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiiON non-disruptive upgrades for Windows systems booting from CLARiiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
- 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- 3) External storage director failures including failed lasers on Fibre Channel directors.
- 4) External storage power failure.
- 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
- 6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- CLARiiON FC4500 array is also supported for these configurations.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Supported by direct attach only
- GAB disks (membership and service group heartbeat disks) are not supported.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- PowerPath supported. ATF/CDE not supported.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- If using ATF/CDE, requires 2.1.6 or greater..
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
VxVM not supported.
PowerPath 3.0 supported.
PowerPath not supported. ATF is supported.
- RPQ required for PowerPath support.
- An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.02

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- CLARiiON FC4500 array is also supported for these configurations.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- Supported by direct attach only
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- GAB disks (membership and service group heartbeat disks) are not supported.
- If using ATF/CDE, requires 2.1.6 or greater..
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- LP8000 no longer has removable GBICs for copper cable support.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- Includes both Pentium PRO and XEON models
- HP NetServer LC2000 is only supported with two processors.Uni-Processor configurations are not supported
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
VxVM not supported.
PowerPath 3.0 supported.
Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- CX600 only.
- PowerPath not supported. ATF is supported.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0
. VxVm not supported. PowerPath 3.0 supported.
- Supports BIOS 1.34. Supports SNIA HBA API. Driver and BIOS available at <http://www.qlogic.com>.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\]:823728](http://support.microsoft.com/default.aspx?scid=kb;[LN]:823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.02

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
 - CLARiiON FC4500 array is also supported for these configurations.
 - Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
 - The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
 - EMC recommends that HBAs of different vendors not be used in the same host server.
 - IBM xSeries Servers only:
 - This HBA is equivalent to the qLogic QLA2310.
 - Supported by direct attach only
 - GAB disks (membership and service group heartbeat disks) are not supported.
 - FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
 - If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
 - PowerPath supported. ATF/CDE not supported.
 - If using ATF/CDE, requires 2.1.6 or greater.
 - Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
 - This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
 - Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.
 - VxVM not supported.
 - PowerPath 3.0 supported.
 - This HBA is equivalent to the qLogic QLA2340.
 - For CX200 direct-connect only, boot from array for clusters not supported.
 - If using ATF/CDE, requires 2.1.6 or greater.
 - When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
 - Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
 - EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 - Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- CLARiiON FC4500 array is also supported for these configurations.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Supported by direct attach only
- GAB disks (membership and service group heartbeat disks) are not supported.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- PowerPath supported. ATF/CDE not supported.
- If using ATF/CDE, requires 2.1.6 or greater..

- 12. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- 13. PowerPath not supported. ATF is supported.
- 14. FC4500, FC4700 only.

Microsoft Windows 2003

EMC recommends shutting down the host server during maintenance procedures that could cause the boot disk to become unavailable to the host. If the paging file is unavailable to the operating system for a minimum of 10 seconds, a crash can occur. (NOTE: EMC does not support online microcode upgrades for Windows systems booting from Symmetrix. EMC also does not support CLARiiON non-disruptive upgrades for Windows systems booting from CLARiiON arrays. Windows servers should be temporarily shut down during online microcode upgrades and NDUs as the procedures prevent access to all disks for short periods of time.) Events that could cause a system to crash when booting from external storage are:

- 1) Lost connection to external storage (pulled or damaged cable connection).
- 2) External storage service/upgrade procedures such as online microcode upgrades and/or configuration changes.
- 3) External storage director failures including failed lasers on Fibre Channel directors.
- 4) External storage power failure.
- 5) Storage area network failures such as Fibre Channel switches, switch components, and switch power failures.
- 6) Storage area network service/upgrade procedures such as firmware upgrades or hardware replacements. Windows NT/Windows 2000/2003 Servers (Fibre Channel/SCSI) Boot CAUTION: Microsoft Windows NT uses virtual memory paging files that reside on the boot disk by default. Please refer to the information contained in Microsoft Knowledge Base article Q305547. The article explains how Microsoft supports booting Windows systems through a SAN (storage area network.) Although this article specifically mentions Windows 2000, the information also pertains to Windows NT 4.0 systems booting through a SAN.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- CLARiiON FC4500 array is also supported for these configurations.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
- LP8000 no longer has removable GBICs for copper cable support.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.

9. HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
10. If using ATF/CDE, requires 2.0.9 or greater.
11. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
12. Includes both Pentium PRO and XEON models
13. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.

1. Novell Storage Services supported.
2. Powerpath & ATF supported.
3. CLARiiON FC4500 array is also supported for these configurations.
4. Maximum number of NWFS volumes that can be mounted is 64.
5. Requires NetWare patches: NWPAPT2A and NSS5J.
6. FC-AL for CX200 requires the following:
 - 1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 - 2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
7. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
8. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
9. Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.

- Novell Storage Services supported.
- Powerpath & ATF supported.
- CLARiiON FC4500 array is also supported for these configurations.
- Maximum number of NWFS volumes that can be mounted is 64.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- FC–AL for CX200 requires the following:
 - QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 - If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.

- Novell Storage Services supported.
- Powerpath & ATF supported.
- CLARiiON FC4500 array is also supported for these configurations.
- Maximum number of NWFS volumes that can be mounted is 64.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- FC-AL for CX200 requires the following:
 - QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 - If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- This HBA is equivalent to the qLogic QLA2340.
- If using ATF/CDE, requires 2.1.6 or greater.
- Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**

- CLARiiON FC4500 array is also supported for these configurations.
- Watchdog Timer should be disabled in ocmargs.ora
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- OCFS (Oracle Cluster File System) is not supported.
- Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- QLogic driver is available with Dell/Oracle CC kit.
- An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- PowerPath is not supported.
- requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
- Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
- Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
- Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
- GAB disks (membership and service group heartbeat disks) are not supported.
- When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
- Review single attach VxVM notes for PowerPath and DMP restrictions.
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.03
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- RPQ required for PowerPath support.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
- Emulex driver and BIOS available from <http://www.emulex.com>.**
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- CLARiiON FC4500 array is also supported for these configurations.
- Watchdog Timer should be disabled in ocmargs.ora
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- OCFS (Oracle Cluster File System) is not supported.
- Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
- Includes both Pentium PRO and XEON models
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
- Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
- GAB disks (membership and service group heartbeat disks) are not supported.
- Review single attach VxVM notes for PowerPath and DMP restrictions.
- When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.03
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- Single HBA zoning is required regardless of the switch being utilized.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- RPQ required for PowerPath support.

25. requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
26. Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
27. PowerPath is not supported.
28. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
29. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
30. Emulex driver and BIOS available from <http://www.emulex.com>.
31. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.

1. CLARiiON FC4500 array is also supported for these configurations.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
4. Supports PowerPath v3.0.4 b12 only.
5. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
6. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
7. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
8. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
9. Single HBA zoning is required regardless of the switch being utilized.
10. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
11. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
12. Emulex driver and BIOS available from <http://www.emulex.com>.
13. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
14. PowerPath supported. ATF/CDE not supported.
15. RPQ required for PowerPath support.

1. CLARiiON FC4500 array is also supported for these configurations.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
4. Supports PowerPath v3.0.4 b12 only.
5. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
6. Single HBA zoning is required regardless of the switch being utilized.
7. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
8. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
9. Emulex driver and BIOS available from <http://www.emulex.com>.
10. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
11. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.

12. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
13. PowerPath supported. ATF/CDE not supported.
14. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
15. Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
16. RPQ required for PowerPath support.
17. Includes both Pentium PRO and XEON models

IBM

IBM – SuSE Linux						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Comments
1	eServer BladeCenter HS20 (Model 8678) ^{10, 11}	SuSE Linux SLES 8 SP2a (v2.4.19–SuSE.304) ^{3, 4}	Microsoft MSCS ^{5, 6, 7}	HA: 4	IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ^{12, 13} , Optical Pass-thru Module 02R9080 ^{8, 9}	See ^{1, 2}

1. EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
 2. CLARiiON FC4500 array is also supported for these configurations.
 3. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
 4. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
 5. Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
 6. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
 7. Powerpath 3.0.5 supported with MSCS clusters on Windows 2003.
 8. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
9. **Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
 10. Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
 11. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 12. **Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)**
 13. **Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.**

- Support for FC4500, FC4700 and FC5300, FC5500, FC5700.
- PowerPath support for Sun Cluster 2.2 with Solaris 8 only FC4700 with Flare level 08.45 only. ODS is not available at this time.
- No longer available
- Requires driver rev 2.07.17 or higher and fcode 13.3.8.02C
- JNI FC64-1063 HBA's cannot be connected directly to an FC4500 storage array in a multi-host environment. Hubs or switches must be used.
- Mixing JNI and Emulex SBUS HBAs on the same host connected to the same storage system is not supported. If there is a business reason to do so, submit an RPQ.
- Support for FC4500, FC4700, and FC5300.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- FC-AL and FC-SW topologies can co-exist on the same server but not on the same HBA, provided that the different topologies are attached to different HBAs
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- FC-SW applies only to CX600, CX400, FC4500 and FC4700
- No OPS support for Solaris 7.
- Dynamic Reconfiguration is supported (Enterprise 10000 SBus only); requires ATF v3.1.2 or higher.
- Cluster with more than 4 nodes requires VCS patch P2 and VxVM v3.1 patch P4
- GAB disks (membership and service group heartbeat disks) are not supported.
- Supported on CX600, CX400, FC4500, FC4700 Only
- Clusters with more than 4 nodes require VCS patch P2 and VxVM v3.1 patch P4
- Requires Solaris 8 update 7 or later.
- Veritas HA clusters are supported with FC-SW only
- Supported with Powerpath 3.x configuration only. Native names only, no "power devices". Review the ESN topology guide section on Oracle DBED/AC case studies for configuration restrictions.
- Review the ESN Topology Guide section on Oracle DBED/AC Case Studies for configuration restrictions.
- If all FC connectivity to the array is lost (without a server shutdown), then after connectivity is restored, the user must execute a vxctl enable command, before the VCS Oracle 9iRAC service group is brought back online.
- Requires Symmetrix 8000 Series, PowerPath 3.0.4 or later, VxVM 3.5 or later or Solstice Disk Suite (SDS) 4.2.1. Supported with Microcode 5568.52.18
5567 code revisions supported are 5567.46.24 or 5567.53.30. 5567.53.30 requires the PGR Phase 4 E-pack.
Symmetrix "PER" volume flag for Persistent Reservation support for devices accessible through more than two paths.
- Veritas MP1 is required for clusters with more than 2 servers
- Review VERITAS Database Edition/Advanced Cluster 3.5 for Oracle 9i RAC Release Notes for supported Oracle Database releases.
- 64-bit HBAs will not fit into the 32-bit slot due to a physical obstruction.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- See the EMC price book for HBA vendor ordering information. This HBA is not sold by EMC.
- FC4700 Core software minimum requirements
Array software – Access Logix 08.50.55
Array software – Non-Access Logix 08.50.05
- Solaris 8:
Requires PowerPath 3.0.4.
Support for Veritas Volume Manager VxVM 3.2 with Patch 04 and SDS 4.2.1 with patch 108693-16 or later.
- OPS, RAC, or greater than 2-node HA are supported with FC-SW only.
- Supported with VCS only.
- Supported on CX600, CX400 and FC4700-2 only.
- Supported with VCS 3.5 Maintenance Patch 1
- Please review Veritas support pages for latest patch information.
- EMC required Sun patches for Solaris 9:**
112233-08 Sun OS 5.9: kernel patch
112834-03 Sun OS 5.9: patch SCSI
113277-17 Sun OS 5.9: sd and ssd patch
- Solaris 9:
Requires PowerPath 3.0.4.
Support for Veritas Volume Manager VxVM 3.2 (Patch 04 required) and Solaris Volume Manager.
Requires patches 112563-10 or later, and 114176-02 or later.
- Requires PowerPath 3.0.4.
Supported only on VxVM 3.2 P04, VxVM 3.5 MP1 or later, and SDS 4.2.1 with patch 108693-16 or later.
- Core software minimum requirement with
CX600
Array software – Access Logix 02.05.1.60.5.009
Array software – Non-Access Logix 02.05.0.60.5.009
CX400
Array software – Access Logix 02.05.1.40.5.008
Array software – Non-Access Logix 02.05.0.40.5.008
- Requires PowerPath 3.0.4.
Supported only on VxVM 3.5 MP1 or later and SVM.
- 42.

Use of the LP9002DC or QLA2342 requires FCO A0218-1 from Sun for HBA's to operate in 66mhz mode. Without this FCO the HBA's will only come up in 33mhz mode which could have an impact on performance.

Fibre Connectivity: Hub

Please refer to the Cables and Connectors section for more information. Please refer to the Base Connectivity Interoperability Application for details concerning kernel versions, minimum driver and BIOS / firmware revisions. Fanout represents the maximum initiators (host adapters) per array port. Fanin represents the number of array ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see the Connectrix Enterprise Storage Network Planning Guide, EMC Networked Storage Topology Guide, and CLARiiON Open Systems Configuration Guide. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.

HPQ HP-UX

HPQ HP-UX									
No.	Operating System	Host Bus Adapter	Hub	Fanin	FC-Fanout	FC-Luns/Storage Port	Luns/HBA	Luns/Loop	Comments
1	HPQ HP-UX 11.0: 990P ⁴ , ACE ⁴ ; HPQ HP-UX: 11.0 ⁴ , 11i v1.0 (HP-UX 11.11) ⁴	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A ⁸	Gadzoos FCL1063TW; HPQ: A3724A/AZ ⁷ , A4839A/AZ ⁷	4	15 ⁵ , 32 ⁶	223	256	128	See ^{1, 2, 3}

3. Luns Per Array (FC-AL)

CX600 256
CX400 256
FC4700 223
FC4500 223

4. For HP-UX systems only: LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/vo1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.

5. with 08.41.xx or lower microcode

6. with 08.42.xx or higher microcode

7. HP optical Hubs (HP models A3724A and A4839A) have been qualified, but are not sold by EMC.

8. As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)
L2000 (product number A5191A)
N4000 Revision A (product number A3639A)
N4000 Revision B (product number A3639B)

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Single HBA zoning is required regardless of the switch being utilized.
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
- Booting from EMC storage arrays is NOT supported with PowerPath.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.

1. with 08.41.xx or lower microcode
2. with 08.42.xx or higher microcode
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

Fibre Connectivity: Switch

Fanout represents the maximum initiators (host adapters) per array port. Fanin represents the number of array ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see the Connectrix Enterprise Storage Network Planning Guide, EMC Networked Storage Topology Guide, and CLARiON Open Systems Configuration Guide. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.

CX400 256
FC4700 223
FC4500 223

3. Luns Per Array (FC-SW)

CX600 1024 (256 LUNs per storage group, 32 LUNs maximum per RAID group, 32 RAID groups maximum.

CX400 512
FC4700 223
FC4500 223

4. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
5. Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
6. Switch support can be QuickLoop dedicated to any HP hosts in Table 84 on page 226 or heterogeneous fabric with HP FC-SW (fabric) hosts in that table. For FC4700, one port on each SP may be used for QuickLoop when the other port is used for FC-SW. QuickLoop support requires chargeable model DSBQLP-0D.
7. Requires at least v5.11.09 of FC5700 Core Software (a.k.a. Flare), v5.32.01 of FC4500 Core Software or v5.24.00 of FC5300 Core Software.
8. **with 08.41.xx or lower microcode**
9. **with 08.42.xx or higher microcode**
10. **Switch support can be QuickLoop dedicated to any HP hosts in table titled "Clariion CX600/CX400 Base Connectivity" or heterogeneous fabric with HP FC-SW (fabric) hosts in that table. For FC4700, one port on each SP may be used for QuickLoop when the other port is used for FC-SW. QuickLoop support requires chargeable model DSBQLP-0D.**
11. EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
12. CX600 Fanout/in 32:1/1:4
CX400 Fanout/in 32:1/1:4
FC4700 Fanout/in 32:1/1:4
FC4500 Fanout/in 15:1/1:4
13. **QuickLoop is not supported with Brocade 3900/12000 or ED-12000B.**
14. FC4700-2 supported at 1 Gb and 2 Gb.
15. EMC DS-16B2 for "Extended Fabric License" , use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
16. EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
17. QuickLoop is not supported with Brocade 3200/3800/12000 or DS-16B2, ED-12000B.
18. Boot support Minimum fw.v4.0.2a
19. As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)
L2000 (product number A5191A)
N4000 Revision A (product number A3639A)
N4000 Revision B (product number A3639B)
NDU base: 08.49.51
20. supported sever model: rp5470 PDC 42.06
22. **During initial switch configuration with fw 1.2 or earlier, in an HP-UX environment, the Persistent FC IDs must be enabled on the Vsan that contains any HP HBAs. The N_Port Area IDs must be manually configured to be unique, static, and persistent on the Vsan that contains any HP HBAs. the target storage array's N_Port ID must also be set to persistent and static. See MDS 9000 Family Configuration Guide for details.**
23. Minimum microcode revision: 08.49.51
24. Supported on CX600, CX400 and FC4700-2 only.
25. The 200-561-9XX, and 200-563-9XX FA director family support a total of 256 LUNs per FA port. (Hewlett Packard Alpha Tru64 supports 255 LUNs.)
26. "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
1. Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
2. Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
3. See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
27. Maximum of 320 visible LUNs per hba supported with HP-UX 11.0 HA configurations
28. Maximum of 512 visible LUNs per hba supported with HP-UX 11i v1.0 (HP-UX 11.11) HA and non-HA configurations
29. Maximum of 512 visible LUNs per hba supported with HP-UX 11.0 non-HA configurations
30. Maximum of 320 visible LUNs per hba supported with HP-UX 10.20 HA configurations.
31. Maximum of 320 visible LUNs per hba supported with HP-UX 11.0 HA configurations.
32. Maximum of 512 visible LUNs supported with HP-UX 11.0 non-HA configurations
33. Maximum of 512 visible LUNs per hba supported with HP-UX 10.20 non-HA configurations

- Supported with the FC4700-2 only.
- Tru64 V5.1B latest qualified Patch Kit 3 (T64V51BB24AS0003-20030929).
- with 08.42.xx or higher microcode
- with 08.41.xx or lower microcode
- CX600/CX400: 255 LUNs/HBA --- FC4700 223 LUNs/HBA
- Firmware v3.0.2d or later is required with the DS-16B2 switch.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- Requires at least v5.11.09 of FC5700 Core Software (a.k.a. Flare), v5.32.01 of FC4500 Core Software or v5.24.00 of FC5300 Core Software.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- ED-64 and ED-1032 not supported for FC5300.
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- Multipath support or connections to the secondary port are not supported at this time.

10. EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
 11. The 200-561-9XX, and 200-563-9XX FA director families support a total of 256 LUNs per FA port. (Hewlett Packard Alpha Tru64 supports 255 LUNs.)

- EMC recommends that HBAs of different vendors not be used in the same host server.
 - Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
 - The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
 - with 08.41.xx or lower microcode
 - with 08.42.xx or higher microcode
 - "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
 - Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSXFAB-0D.
 - EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
 - EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
 - EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
 - (QLA2200) For IBM xSeries and Netfinity servers only.
 - Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
 - When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
 - Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- Maximum number of NWFS volumes that can be mounted is 64.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- ED-64 and ED-1032 not supported for FC5300.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- For IBM Netfinity and xSeries Intel servers only.
- This HBA is equivalent to the qLogic QLA2340.
- This HBA is equivalent to the qLogic QLA2310.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Firmware 3.0.2a or later required.
- Firmware v2.5.1b or later required
- Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
- Requires NWPANL.M V.3.07A update from Novell website.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSXFAB-0D.
- Firmware v2.5.1b or later required
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- Firmware 3.0.2a or later required.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Single HBA zoning is required regardless of the switch being utilized.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
- ED-64 and ED-1032 not supported for FC5300.

SGI IRIX

SGI IRIX								
No.	Operating System	Host Bus Adapter	Switch	Fanin	FC-Fanout	FC-Luns/Storage Port	Luns/HBA	Port sharing
1	SGI IRIX: 6.5.11, 6.5.12	SGI PCI-FC-1P-OPT-A	Brocade Silkworm: 12000 ¹ , 3200 ¹ , 3800 ¹ , 6400 ¹ ; EMC Connectrix: DS-16B ^{2, 8} , DS-16M ^{2, 6} , DS-24M ^{2, 6} , DS-32M ^{2, 6} , ED-12000B ^{1, 7} , ED-140M ¹ , ED-64M ^{1, 6} ; McDATA: ED-6064 ^{1, 6} , ED-6140 ¹ , ES-3216 ^{1, 6} , ES-3232 ^{1, 6} , ES-4500 ¹	4	15 ³ , 32 ²	223	256 ⁵	Y ⁴
2	SGI IRIX: 6.5.13, 6.5.14, 6.5.15, 6.5.16, 6.5.17, 6.5.18	SGI PCI-FC-1P-OPT-A, PCI-FC-1P-OPT-B	Brocade Silkworm: 12000 ¹ , 3200 ¹ , 3800 ¹ , 6400 ¹ ; EMC Connectrix: DS-16B ^{2, 8} , DS-16M ^{2, 6} , DS-24M ^{2, 6} , DS-32M ^{2, 6} , ED-12000B ^{1, 7} , ED-140M ¹ , ED-64M ^{1, 6} ; McDATA: ED-6064 ^{1, 6} , ED-6140 ¹ , ES-3216 ^{1, 6} , ES-3232 ^{1, 6} , ES-4500 ¹	4	15 ³ , 32 ²	223	256 ⁵	Y ⁴

- Refer to the Switched Fabric Topology Parameters Table (formerly Table 71 on Page 202 of the ESM) for single-vendor and mixed vendor switched fabrics and supported switch firmware.
- with 08.42.xx or higher microcode
- with 08.41.xx or lower microcode
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "Y" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
- This is the maximum number of LUNs supported by IRIX on a single CLARiiON, independent of the number of ports on the array.
- FC4700 only with Access Logix 8.42.5x or higher.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from [ftp://ftp.emc.com/pub/elab/linux](http://ftp.emc.com/pub/elab/linux).
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- with 08.41.xx or lower microcode
- with 08.42.xx or higher microcode
- Firmware 3.0.2a or later required.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- Firmware v2.5.1b or later required
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Single HBA zoning is required regardless of the switch being utilized.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- with 08.42.xx or higher microcode
- with 08.41.xx or lower microcode
- "Port Sharing" allows any OS/HBA designated with a "Y" (for Yes) to safely share a CLARiiON port with any other OS/HBA designated with a "N" provided all of the following requirements are met (Note: "N" for NO means this host cannot share an FA/SP port with any different OS/HBA):
 - Access Logix is required to prevent sharing CLARiiON devices between Operating Systems on a single FA port.
 - Fanout/Fanin is restricted to the lowest Host/HBA support as called out in this table. Example: Windows 2000 using the QLA2200F, which has a Fanout/Fanin of 12:1/1:12 and NetWare using the QLA2200F, which has a Fanout/Fanin of 6:1/1:6. The Fanout/Fanin is restricted to 6:1/1:6.
 - See appropriate host matrices for approved drivers, BIOS, firmware, boot and cluster information.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- ED-64 and ED-1032 not supported for FC5300.
- No boot support at this time.

iSCSI to FC Routing

No.	Operating System	Network Interface Card	Driver	Network Configuration	Bridge	Firmware Revision	Comments
1	Microsoft Windows 2000: Advanced Server SP4 ⁵ , Server SP4 ⁵ ; Microsoft Windows 2003: Enterprise Edition (Advanced Server) ⁵ , Standard Edition (Server) ⁵	Generic NIC 10/100, Generic NIC GE	Microsoft 1.01 ¹ , 2, 3, 4	LAN Only ^{6, 7}	Nishan IPS 3300, Nishan IPS 4300	4.1	See ^{8, 9, 10}

- Booting over iSCSI is not supported.
- Clusters are not supported.
- Microsoft Dynamic Disks are not supported.
- The maximum number of iSCSI LUNs supported per host system is 128.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Layer 2 or single subnet TCP/IP LAN
- Requires a dedicated network for iSCSI storage only. The network should be design to have no packet loss or packet duplication.
- This configuration requires completion of a Pre-Sales Questionnaire (PSQ).
- PowerPath 3.0.5 is supported with different subnets for each path.
- A maximum of 12:1 fan-in is supported.

Application Software DG DG/UX

DG DG/UX				
No.	Operating System	Host Bus Adapter	Application Software	Comments
1	DG DG/UX R4.20MU07 ^{2, 3, 4}	Emulex: LP8000-EMC ⁷ , LP8000-F1 ^{5, 6}	MirrorView 1.25.01; Navisphere: Agent/CLI 5.1.0, Analyzer 6.2.0, Integrator 6.9, Manager, Event Monitor 6.2.1 ⁸	See ¹

- All installations currently require an RPQ with diagrams and revisions noted. Support for Core Array software is frozen at v8.42.10/60 for DG/UX systems.
- The release notice for DG/UX (included with the software release at path: "/usr/release/dgux*.m) lists supported platforms.
- FC4700 is only supported on DG/UX 4.20 MU07.
 - Maximum of 2 fabrics, each with a maximum of 4 switches.
 - Maximum of 4 FC4700s per fabric.
 - Maximum of 16 HBAs per fabric.
 - Maximum of 32 HBAs per FC4700 SP.
 - Maximum of 6 DG/UX servers per FC4700.
 - Maximum of 4 HBAs per AV3750 server (2 per fabric).
 - Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments).
 - FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
- Support for core software is frozen at v8.42.10/60 for DG/UX systems.
- DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed.
- Only the Brocade FC switch connection is supported. Connectrix FC switch is not supported.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.

Fujitsu Technology Solutions Solaris

Fujitsu Technology Solutions Solaris			
No.	Operating System	Host Bus Adapter	Application Software
1	Fujitsu Technology Solutions Solaris: 2.6, 7, 8, 9	Emulex: LP8000-EMC ¹ , LP9002-E (LP9002L-E)	PowerPath: 3.0.3, 3.0.4, 4.0.3 ^{2, 3}

- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- ATF/CDE and PowerPath cannot co-exist in the same server.
- Powerpath supported on FC4500, FC4700, CX600, and CX400. CLARiiON and Symmetrix can co-exist in the SAN with the same server.

HPQ HP-UX

HPQ HP-UX				
No.	Operating System	Host Bus Adapter	Application Software	Comments
1	HPQ HP-UX: 11.0 ² , 11i v1.0 (HP-UX 11.11) ²	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A ⁵	AccessLogix 08.50.5x ¹⁵ ; MirrorView 1.8 ⁶ ; Navisphere: Agent/CLI 6.5, Analyzer 6.5, Integrator 6.5 ⁷ , Manager, Event Monitor 6.5 ⁸ ; SAN Copy 1.1 ⁹ , 10, 11, 12, SnapView 2.2 ⁶ , 13, admsnap 2.2 ⁶ , 13, 14	
2	HPQ HP-UX: 11.0 ² , 11i v1.0 (HP-UX 11.11) ²	HPQ: A3404A, A3591B, A3740A, A5158A, A6684A, A6685A, A6795A ⁵	PowerPath 3.0.3 b 003 ^{3, 4}	See ¹

1. CLARiiON and Symmetrix can coexist in the SAN with the same server.
2. For HP-UX systems only:LVM Bad block reallocation (BBR) should be disabled and the LVM mechanism for marking blocks defective when a medium error is returned should be disabled for all HP LVM logical volumes residing on EMC devices. This can be accomplished by utilizing the upper case "N" flag when creating the logical volume or with the lvchange command. Examples: lvchange -r N /dev/vg01/lvol1 or lvcreate -r N /dev/vg01. The exception to this rule is if the logical volume is host mirrored using HP Mirror-UX, then this flag should not be set.
3. Supported with HP-UX 11.0, 11i only
4. Powerpath supported on FC4500, FC4700, CX600, and CX400.
5. As of April 2, 2003 the A6795A HBA is no longer supported on the following platforms as an add-on product. However HP will continue to support the A6795A HBA on existing installations.

L1000 (product number A5576A)

L2000 (product number A5191A)

N4000 Revision A (product number A3639A)

N4000 Revision B (product number A3639B)

6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
7. Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
8. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed.The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
9. SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported in and between CX series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3x30, Symmetrix 3x30, and Symmetrix 3700 arrays.
10. Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, and Linux
11. SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.
12. SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported with the following HP Storage Works RAID Array products (HSG80 controller): RA8000 with Firmware levels 8.5, 8.6 and 8.7, ESA12000 with Firmware levels 8.5, 8.6 and 8.7, MA8000 with Firmware levels 8.5, 8.6 and 8.7, EMA12000 with Firmware levels 8.5, 8.6 and 8.7, EMA16000 with Firmware levels 8.5, 8.6 and 8.7, and EVA3000 (HSV100 controller) and EVA5000 (HSV110 controller) with Firmware levels 2 and 3. Data movement is also supported with the following IBM storage arrays: FAST200 with Firmware level 5.30.09.00, FAST700 with Firmware level 5.21.01.02, and FAST900 with Firmware level 5.30.12.00; and with the Sun storage array StorEdge T3 with Firmware level 1.18.02.
13. A Snapshot must not be in a clustered Storage Group.
14. Admsnap is not qualified with VERITAS Volume Manager
15. AccessLogix 6.32.18 for FC4500; 6.24.08 for FC5300.

- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- ATF/CDE and PowerPath cannot co-exist in the same server.
- Powerpath supported on FC4500, FC4700, CX600, CX400, and CX200. PowerPath Base supported on FC4500, CX200 only. CLARiiON and Symmetrix can co-exist in the SAN with the same server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- This HBA is equivalent to the QLogic QLA2340.
- Stratus ftServer OS release 2.1 or greater required for Stratus ftServers.
- For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported in and between CX series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.
- Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, and Linux
- SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.
- Requires admHost software. See SAN Copy release notice for appropriate revision information.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported with the following HP Storage Works RAID Array products (HSG80 controller): RA8000 with Firmware levels 8.5, 8.6 and 8.7, ESA12000 with Firmware levels 8.5, 8.6 and 8.7, MA8000 with Firmware levels 8.5, 8.6 and 8.7, EMA12000 with Firmware levels 8.5, 8.6 and 8.7, EMA16000 with Firmware levels 8.5, 8.6 and 8.7, and EVA3000 (HSV100 controller) and EVA5000 (HSV110 controller) with Firmware levels 2 and 3. Data movement is also supported with the following IBM storage arrays: FAStT200 with Firmware level 5.30.09.00, FAStT700 with Firmware level**

- 5.21.01.02, and FAST900 with Firmware level 5.30.12.00; and with the Sun storage array StorEdge T3 with Firmware level 1.18.02.
16. A Snapshot must not be in a clustered Storage Group.
 17. Admsnap is not qualified with VERITAS Volume Manager
 18. AccessLogix 6.32.18 for FC4500; 6.24.08 for FC5300.
 19. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

20. Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
21. Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
22. EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.

Microsoft Windows 2003

No.	Operating System	Host Bus Adapter	Application Software
1	Microsoft Windows 2003: Enterprise Edition (Advanced Server) ^{1, 2} , Standard Edition (Server) ^{1, 2}	Emulex: LP10000-E, LP10000DC-E, LP1050-E, LP1050DC-E, LP8000-EMC ³ , LP9002-E (LP9002L-E), LP9802-E, LP9802DC-E, LP982-E; HPQ: A7298A (LP982), DS-KGPSA-CA (LP8000), DS-KGPSA-CB (LP8000), DS-KGPSA-CY (LP8000), Dual-port mezzanine controller card, FCA2101 (LP952), FCA2214 (QLA2340), FCA2214DC (QLA2342), FCA2354 (LP9002), FCA2355 (LP9002DC), FCA2384 (LP9802), FCA2404 (LP9802), FCA2404DC (LP9802DC), FCA2408 (LP982); IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ²² , Optical Pass-thru Module 02R9080 ^{20, 21} ; NEC: N8190-105 ²³ , N8803-031 (QLA2310F); QLLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	AccessLogix 08.50.5x ¹⁶ ; MirrorView 1.8 ⁶ ; Navisphere: Agent/CLI 6.5, Analyzer 6.5, Integrator 6.5 ⁷ , Manager, Event Monitor 6.5 ⁸ ; PowerPath 3.0.5 ^{3, 4} ; SAN Copy 1.1 ^{9, 10, 11, 12, 13} ; SnapView 2.2 ^{6, 14} ; admsnap 2.2 ^{6, 14, 15}
2	Microsoft Windows 2003: Enterprise Edition (Advanced Server) ^{1, 2} , Standard Edition (Server) ^{1, 2}	IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ²² , Optical Pass-thru Module 02R9080 ^{20, 21} ; NEC: N8190-105 ²³ , N8803-031 (QLA2310F); QLLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	VSS Hardware Provider 1.0 ^{17, 18, 19}

1. EMC recommends that HBAs of different vendors not be used in the same host server.
2. For Windows 2003 STORPort drivers, support is limited to the following configurations: 1 HBA with 1 path to 1 SP; 2 HBAs, one with a single path to SPA and the other with a single path to SPB. Refer to HBA guides for expected device behavior. [NOTE: Powerpath not currently supported with STORPort driver.]
3. Powerpath supported on FC4500, FC4700, CX600, CX400, and CX200.
PowerPath Base supported on FC4500, CX200 only.
CLARiiON and Symmetrix can co-exist in the SAN with the same server.
4. PowerPath is currently supported only with QLogic SCSI Port miniport drivers and the Emulex full port driver.
5. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
6. For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
7. Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
8. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
9. SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported in and between CX series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.
10. Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, and Linux
11. SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.
12. Requires admHost software. See SAN Copy release notice for appropriate revision information.
13. SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported with the following HP Storage Works RAID Array products (HSG80 controller): RA8000 with Firmware levels 8.5, 8.6 and 8.7, ESA12000 with Firmware levels 8.5, 8.6 and 8.7, MA8000 with Firmware levels 8.5, 8.6 and 8.7, EMA12000 with Firmware levels 8.5, 8.6 and 8.7, EMA16000 with Firmware levels 8.5, 8.6 and 8.7, and EVA3000 (HSV100 controller) and EVA5000 (HSV110 controller) with Firmware levels 2 and 3. Data movement is also supported with the following IBM storage arrays: FAST200 with Firmware level 5.30.09.00, FAST700 with Firmware level 5.21.01.02, and FAST900 with Firmware level 5.30.12.00; and with the Sun storage array StorEdge T3 with Firmware level 1.18.02.
14. A Snapshot must not be in a clustered Storage Group.
15. Admsnap is not qualified with VERITAS Volume Manager
16. AccessLogix 6.32.18 for FC4500; 6.24.08 for FC5300.
17. Requires Navisphere Agent/CLI 6.5.
18. VSS Hardware Provider is currently supported only with QLogic SCSI Port miniport drivers.
19. Shipped with SnapView on adm Snap media.
20. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

21. Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
22. Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
23. EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.

Microsoft Windows NT

Microsoft Windows NT			
No.	Operating System	Host Bus Adapter	Application Software
1	Microsoft Windows NT 4.0 SP6A ¹	Emulex: LP8000-EMC ³ , LP9002-E (LP9002L-E), LP9802-E, LP9802DC-E, LP982-E; HPQ FCA2404 (LP9802); IBM 24P0960(QLA2340) ⁴ ; QLLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	ATF/CDE 2.0.10 ² ; AccessLogix 08.50.5x ¹⁶ ; MirrorView 1.8 ⁶ ; Navisphere: Agent/CLI 6.5, Analyzer 6.5, Integrator 6.5 ⁷ , Manager, Event Monitor 6.5 ⁸ ; PowerPath: 3.0.2 ⁵ , 3.0.5 ⁵ ; SAN Copy 1.1 ^{9, 10, 11, 12, 13} ; SnapView 2.2 ^{6, 14} ; admsnap 2.2 ^{6, 14, 15}

1. EMC recommends that HBAs of different vendors not be used in the same host server.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- CLARiiON and Symmetrix can co-exist in the SAN with the same server.
- PowerPath Base is supported on the FC4500 and CX200 only.
- Single HBA zoning is required regardless of the switch being utilized.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- This kernel is supported with PowerPath v3.0.2 via RPQ only.
- For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
- Supported with QLogic driver v6.05.00.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported in and between CX series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.
- Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, and Linux
- SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported with the following HP Storage Works RAID Array products (HSG80 controller): RA8000 with Firmware levels 8.5, 8.6 and 8.7, ESA12000 with Firmware levels 8.5, 8.6 and 8.7, MA8000 with Firmware levels 8.5, 8.6 and 8.7, EMA12000 with Firmware levels 8.5, 8.6 and 8.7, EMA16000 with Firmware levels 8.5, 8.6 and 8.7, and EVA3000 (HSV100 controller) and EVA5000 (HSV110 controller) with Firmware levels 2 and 3. Data movement is also supported with the following IBM storage arrays: FASi200 with Firmware level 5.30.09.00, FASi700 with Firmware level 5.21.01.02, and FASi900 with Firmware level 5.30.12.00; and with the Sun storage array StorEdge T3 with Firmware level 1.18.02.**
- A Snapshot must not be in a clustered Storage Group.

- 24. Admsnap is not qualified with VERITAS Volume Manager
- 25. AccessLogix 6.32.18 for FC4500; 6.24.08 for FC5300.
- 26. **QLLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- ATF/CDE and PowerPath cannot co-exist in the same server.
- Powerpath supported on FC4500, FC4700, CX600, and CX400.
CLARiiON and Symmetrix can co-exist in the SAN with the same server.
- PowerPath supported as a migration path only. PowerPath Volume Manager not supported.
- The Volume Manager component of PowerPath 4.x does not currently support admSnap.
- ATF/CDE is not supported on CX200, CX400 or CX600 arrays. ATF/CDE and PowerPath cannot co-exist on the same server.
- The Volume Manager component of PowerPath 4.x is not currently supported with Sun SunCluster products.
- For FC4700, CX600, and CX400 only. SnapView and Mirrorview require Access Logix.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported in and between CX series arrays, FC4500, FC4700, FC4700-2, FC5300, Symmetrix 8000 series, Symmetrix DMX Series, Symmetrix 3832, Symmetrix 3x30, and Symmetrix 3700 arrays.
- Data movement between CLARiiON and Symmetrix requires Navisphere host agent attached to Symmetrix. Agents supported are Windows, SUN, HP/UX, AIX, and Linux
- SAN Copy Operational restrictions apply when using SAN Copy with Clusters and AIX Systems. Refer to the SAN Copy release notice for more information.
- SAN Copy installation is supported on CX600, CX400, FC4700, and FC4700-2 storage arrays. Data movement is supported with the following HP Storage Works RAID Array products (HSG80 controller): RA8000 with Firmware levels 8.5, 8.6 and 8.7, ESA12000 with Firmware levels 8.5, 8.6 and 8.7, MA8000 with Firmware levels 8.5, 8.6 and 8.7, EMA12000 with Firmware levels 8.5, 8.6 and 8.7, EMA16000 with Firmware levels 8.5, 8.6 and 8.7, and EVA3000 (HSV100 controller) and EVA5000 (HSV110 controller) with Firmware levels 2 and 3. Data movement is also supported with the following IBM storage arrays: FASSt200 with Firmware level 5.30.09.00, FASSt700 with Firmware level 5.21.01.02, and FASSt900 with Firmware level 5.30.12.00; and with the Sun storage array StorEdge T3 with Firmware level 1.18.02.**
- A Snapshot must not be in a clustered Storage Group.
- AccessLogix 6.32.18 for FC4500; 6.24.08 for FC5300.

CLARiiON CX200

Base Connectivity

Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device. CX200LC configurations are limited to direct attach configurations under the CX200 section. PowerPath and AccessLogix are not supported on CX200LC.

Egenera BladeFrame Egenera

Egenera – Egenera BladeFrame						
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot
1	BladeFrame cBlade-EP ⁴	PCI-X	Egenera BladeFrame 3.0 ^{1,2}	QLogic QLA2342-E-SP ^{3,5,6,7}	FC-AL, FC-SW	Y

1. Maximum of 423 LUNs are supported per BladeFrame.
2. pBlades are qualified with RedHat 2.1 Advanced Server v2.4.9-e.12, v2.4.9-e.16 and v2.4.9-e.25.
3. Supported with v4.47.18e QLogic driver included cBlade OS, BladeFrame 3.0, and BIOS v1.34.
4. PowerPath is not supported on Egenera. Egenera multi-pathing is supported on both Symmetrix and CLARiiON storage arrays.
5. Driver Version 4.47.18e5.
6. Firmware Version 3.01.13.
7. FCode value 1.34.

Microsoft Windows 2000 Bull

Bull – Microsoft Windows 2000						
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot
1	Express 5800: 320La, 320La-R, 320Lb, 320Lb-R, 330Ma-R, 330Mb-R, 340Ha-R	PCI	Microsoft Windows 2000 Advanced Server: SP ^{2,3} , SP ^{3,4}	QLogic QLA2310F-E-SP ^{8,9,10}	FC-AL, FC-SW	N
2	Express 5800 180Rb7	PCI	Microsoft Windows 2000 Advanced Server: SP ^{2,3} , SP ⁴ ; Microsoft Windows 2000 Server: SP ^{2,3} , SP ⁴	Emulex LP8000-EMC ^{3,4,5}	FC-AL, FC-SW	Y

1. EMC recommends that HBAs of different vendors not be used in the same host server.
2. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
3. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
4. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
5. Driver Version 2.21a7.
6. Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.
7. CX200 does not support fibre channel hubs or Quickloop. FC-AL connections are to be direct attach only.
8. Qlogic SANSurfer/SANBlade Manager is not supported.
9. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
10. Driver Version 8.2.3.21.

- CX200 available through selected channels.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Driver Version 2.21a7.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- If using ATF/CDE, requires 2.1.6 or greater.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.3.21.
- Supported by direct attach only
- PowerPath supported. ATF/CDE not supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- Firmware Version 1.01a2.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- Not supported with Emulex LP8000-EMC HBA.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- PowerPath not supported. ATF is supported only using Emulex 5-2.11a2 driver.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- If using Dell PERC Controller, requires PERC 3 with OpenManager 3.0 and Array Manager 3.1. The afamgt.sys must be version 2.6.0.3486 (or above)..

21. Driver Version 8.2.1.20.
22. Firmware Version 1.80a3.
23. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
24. **Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- CX200 available through selected channels.
 - PowerPath supported. ATF/CDE not supported.
 - Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
 - Driver Version 8.2.3.21.
 - EMC recommends that HBAs of different vendors not be used in the same host server.
 - If using ATF/CDE, requires 2.1.6 or greater.
 - Supported by direct attach only
 - The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
 - Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
 - Driver Version 2.21a7.
 - Firmware Version 1.01a2.
 - Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
 - The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
 - Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
 - QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
 - Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
 - The LP9002-E now ships with the LP9002L-E low profile adapter.
 - Requires minimum BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
 - This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
 - Includes both Pentium PRO and XEON models
 - HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
 - Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
 - Supports BIOS 1.34. Supports SNIA HBA API. Driver and BIOS available at <http://www.qlogic.com>.**
 - Firmware Version 3.90a7.
 - Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.
- NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
 - Driver Version 8.2.1.20.
 - Firmware Version 1.80a3.
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**
 - Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. Supports SNIA HBA API.**
 - EMC does not support the Emulex equivalent of the FCA2101 (LP952.) Use EMC supported driver for LP9002 from <http://www.emulex.com>.**
 - Firmware Version 3.90a7. Contact HPQ for supported firmware versions for this HBA.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- This HBA is equivalent to the qLogic QLA2310.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.3.21.
- CX200 available through selected channels.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supported by direct attach only
- PowerPath supported. ATF/CDE not supported.
- This HBA is equivalent to the qLogic QLA2340.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: <http://www-3.ibm.com/pc/support/site.wss/document.do?indocid=MIGR-39723>
- Firmware Version 1.01a2.
- Driver Version 2.21a7.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- If using ATF/CDE, requires 2.0.9 or greater.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- If using ATF/CDE, requires 2.1.6 or greater.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
- Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
 - EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 - Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
 - Driver Version 8.2.1.20.
 - Driver Version 8.1.5.20.
 - For IBM Netfinity and xSeries Intel servers only.
 - (QLA2200) For IBM xSeries and Netfinity servers only.
 - Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
 - Firmware Version 1.80a3.
 - Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
 - Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.

- CX200 available through selected channels.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Driver Version 2.21a7.
- Firmware Version 1.01a2.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- PowerPath supported. ATF/CDE not supported.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.**
- Driver Version 8.2.3.21.
- If using ATF/CDE, requires 2.1.6 or greater.
- Supported by direct attach only
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Firmware Version 3.90a7.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**

- EMC recommends that HBAs of different vendors not be used in the same host server.
- CX200 does not support fibre channel hubs or Quickloop. FC-AL connections are to be direct attach only.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Refer to the Stratus, Bull or NEC documentation for hardware, software and non-storage related setup and configuration.
- Qlogic SANSurfer/SANBlade Manager is not supported.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.**
- Driver Version 8.2.3.21.
- Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.

By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.

- Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.

NOTE: LP8000/850 HBAs without -EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.

- Driver Version 2.21a7.
- Firmware Version 3.90a7.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- CX200 available through selected channels.
- Qlogic SanBlade Manager is not supported.
- Driver Version 8.2.1.20.
- Supported by direct attach only
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Firmware Version 1.80a3.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.**
- Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.

7. Supports Stratus OS 1.2.2.X through 1.4.X.
8. Requires PowerPath 3.0.2.
9. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
10. Requires Stratus ftServer OS 1.4.x.
11. Driver Version 8.2.3.21.
12. Supports Stratus OS 1.2.2.X through 2.1.X.
13. ftServer OS 2.1.x requires PowerPath 3.0.5 or greater.
14. ftServer OS 1.4.x requires PowerPath 3.0.2.
15. Requires Stratus ftServer OS 1.4.x or greater.
16. Supports Stratus OS 2.0.X through 2.1.X.
17. Requires Stratus ftServer OS 2.0.x or greater.
18. ftServer OS 2.0.x requires PowerPath 3.0.2.
19. Supports Stratus OS 1.3.X through 2.1.X.
20. Requires Stratus ftServer OS 1.4.x or 2.1.x.
21. ftServer OS 1.4 requires PowerPath 3.0.2.
22. Requires Stratus ftServer OS 2.1.x.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- Driver Version 2.21a7.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.3.21.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supported by direct attach only
- The LP9002–E now ships with the LP9002L–E low profile adapter.
- Driver Version 2.11a2. Driver for use with ATF/CDE.
- Firmware Version 3.90a7.
- The LP8000–EMC HBA has a permanent GBIC, and does not have copper cable support.
- CX200 available through selected channels.
- PowerPath not supported. ATF is supported only using Emulex 5–2.11a2 driver.
- If using ATF/CDE, requires 2.1.6 or greater.
- Supports Boot BIOS 1.63a2. Emulex drivers are available at <http://www.emulex.com>. For Unisys servers, use driver available at <http://www.support.unisys.com>. Supports SNIA HBA API.

- NOTE: LP8000/850 HBAs without –EMC label must have minimum rev. dragonfly 2.0 of the Emulex ASIC.
- Hardware and adapters similar to Unisys ES7000–100, ES7000–200.
 - The Libra 18x includes native MCP, and Virtual Machine for MCP (Windows MCPvm) partitions
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
 - Firmware Version 1.80a3.
 - Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.

Microsoft Windows 2003 Bull

Bull – Microsoft Windows 2003							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	Express 5800: 320Lb, 320Lb–R, 330Mb–R ^{6, 7} , 340Ha–R	PCI	Microsoft Windows 2003: Enterprise Edition (Advanced Server) ² , Standard Edition (Server) ²	QLogic QLA2310F–E–SP ^{3, 4, 5}	FC–AL, FC–SW	N	See ¹
2	NovaScale: 4020 (Itanium2), 4040 (Itanium2), 5080 (Itanium2), 5160 (Itanium2)	PCI–X	Microsoft Windows 2003 64–Bit: Enterprise Edition (Advanced Server), Standard Edition (Server)	Emulex LP9802–E ^{8, 9, 10, 11, 12, 13}	FC–AL, FC–SW	N	

- CX200 does not support fibre channel hubs or Quickloop. FC–AL connections are to be direct attach only.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Qlogic SANSurfer/SANBlade Manager is not supported.
- Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- Supports Stratus OS 1.3.X through 2.1.X.
- Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- PowerPath requires driver 1.01x1 with Firmware 1.01A2 and StorPORT fix Q823728
- Driver Version Emulex SCSI port driver v2.21a7.
- Driver Version Emulex StorPORT driver v1.01x1.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- Firmware Version 3.90a7.
- Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Firmware Version 1.01a2.
- Firmware Version 1.80a3.
- Includes both Pentium PRO and XEON models
- Firmware Version 3.90a7. Contact HPQ for supported firmware versions for this HBA.
- Driver Version 2.21a7. EMC does not support the Emulex equivalent of the FCA2101 (LP952.) Use EMC supported driver for LP9002 from <http://www.emulex.com>.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.**
- No EMC Layered Applications supported on IA64 server platforms**
- Driver Version 1.01x1. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.
- This HBA is equivalent to the qLogic QLA2340.

5. This HBA is equivalent to the qLogic QLA2310.
6. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
7. Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
8. Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
9. Firmware Version 3.90a7.
10. Firmware Version 1.01a2.
11. Driver Version 8.2.3.27. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
12. **Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.**
13. **Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**
14. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
 Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
16. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
 17. Driver Version 8.2.3.21.
 18. Firmware Version 1.80a3.
 19. **Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM.)**
 20. **Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.**
 21. **No EMC Layered Applications supported on IA64 server platforms**
 22. Driver Version 1.01x1. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]

1. CX200 available through selected channels.
2. EMC recommends that HBAs of different vendors not be used in the same host server.
3. Qlogic SanBlade Manager is not supported.
4. Qlogic SANSurfer/SANBlade Manager is not supported.
5. QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
6. Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.

By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
 By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
 The workaround is to perform "symcfg discover" after rebooting.

7. Driver Version 8.2.3.21. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.

8. Driver Version 8.2.3.27. Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
9. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
10. Driver Version 2.21a7. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
11. Driver Version 1.01x1. Supports Boot BIOS 1.63a2. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
12. Firmware Version 3.90a7.
13. Firmware Version 1.01a2.
14. Firmware Version 1.80a3.
15. **No EMC Layered Applications supported on IA64 server platforms**
16. This HBA is equivalent to the qLogic QLA2340.
17. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
18. This HBA is equivalent to the Emulex LP982.
19. Driver Version 1.01x1. Available at <http://www.emulex.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
20. CX200 does not support fibre channel hubs or Quickloop. FC-AL connections are to be direct attach only.
21. Supports Stratus OS 1.3.X through 2.1.X.
22. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
23. **EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.**
24. Supports BIOS 1.34. Available at <http://www.qlogic.com>. NOTE: Powerpath is supported with this driver.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- Firmware Version 1.01a2.
- Driver Version 2.20a12.
- Driver Version 8.1.5.21.
- HBA BIOS is 1.34.
- Driver/BIOS are available at <http://www.qlogic.com>
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Requires BIOS v4.01 rev A (5/17/2002) for use with Emulex HBAs.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Firmware Version 3.90a7.
- If using ATF/CDE, requires 2.0.9 or greater.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- Includes both Pentium PRO and XEON models
- Driver Version 2.20a12. Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>. NOTE: Powerpath is supported with this driver.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- HBA BIOS is 1.34.
- Driver/BIOS are available at <http://www.qlogic.com>
- This HBA is equivalent to the qLogic QLA2310.
- Driver Version 8.1.5.21.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Drivers available at <http://www.emulex.com>.
- It is recommended that the QLogic QLA2340 is not installed in Slot 1.
- For IBM xSeries Servers running Windows NT and Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: <http://www-3.ibm.com/pc/support/site.wss/document.do?indocid=MIGR-39723>
- Firmware Version 1.01a2.
- Driver Version 2.20a12.
- This HBA is equivalent to the qLogic QLA2340.
- If using ATF/CDE, requires 2.0.9 or greater.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Supports Boot BIOS 1.63a2. ATF/CDE not supported with driver 2.21a0. For ATF/CDE, use driver 2.11a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Firmware Version 3.90a7.
- QLogic 23xx, and Emulex LP9xxx families for use in servers running Pentium II and faster CPUs only (PII, PIII, etc.).
- The LP9002-E now ships with the LP9002L-E low profile adapter.

- Edit config.sys with the following: Files=100 Buffers=99
- When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
- FC-SW applies only to CX600, CX400, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- Novell Storage Services supported.
- Powerpath & ATF supported.
- FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
- Remote boot not supported with PERC controllers enabled in system BIOS.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
- PowerPath and ATF supported.
- NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
- Maximum number of NWFS volumes that can be mounted is 64.
- Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
- Driver Version v6.51a.
- Driver Version 6.51a.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
- DOS boot device maximum accessible capacity is 2GB. Netware SYS volume must be in LUN 0.
- Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
- PowerPath supported. ATF/CDE not supported.
- Driver Version 6.50v.
- Driver Version 6.v. Supports persistent binding and only supports Class 3.
- This HBA is equivalent to the qLogic QLA2310.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
- (QLA2200) For IBM xSeries and Netfinity servers only.
- Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.**
- HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
- For ATF on Pre CX series, Multipath support or connections to the secondary port are not supported at this time. One path per SP, 2 HBAs per host.
- CX200 available through selected channels.
- Requires HBA bios 1.83.**
- 39.

Requires HBA firmware revision 1.83, available at <http://www.qlogic.com>
 Requires SP4 or higher for NetWare 5.00.

40. Driver installation with NetWare 5.0 SP6A: Do not load cpmpmk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-ESC>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
41. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
42. **FC-AL for CX200 requires the following:**
 If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
43. Requires NWPA.NLM V.3.07A update from Novell website.
44. PowerPath not currently supported.
45. Requires BIOS version 2.02e.
46. Driver Version 3.90a7.
47. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
48. **QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
49. Firmware Version 1.34.
50. FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

- Edit config.sys with the following: Files=100 Buffers=99
- When installing NetWare for fabric boot (when operating system is not installed in the local host) on the Symmetrix, create only one LUN and then perform the install. To install a second server that will be fabric boot, repeat the process by creating one additional LUN and then loading the operating system to it. Continue this process until the desired number of fabric boot servers have been reached. Conditions exist where several LUNs are initially created and you perform your first install, NetWare will sometimes acquire and stripe the operating system across several of the newly created LUNs.
- FC-SW applies only to CX600, CX200, FC4500, FC4700 and FC5300. FC5300 with FC-SW available from selected channels.
- Novell Storage Services supported.
- Powerpath & ATF supported.
- FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
- PowerPath and ATF supported.
- NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
- Maximum number of NWFS volumes that can be mounted is 64.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
- Driver Version v6.51a.
- Driver Version 6.51a.
- Requires HBA bios 1.83.**
- Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
- PowerPath supported. ATF/CDE not supported.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.**
- PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- FC-AL for CX200 requires the following:**
If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- Requires NWPA.NLM V.3.07A update from Novell website.
- PowerPath not currently supported.
- Requires BIOS version 2.02e.
- Driver Version 3.90a7.
- CX200 available through selected channels.
- Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
- Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
- Firmware Version 1.34.
- FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

- Maximum number of NWFS volumes that can be mounted is 64.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- Requires HBA bios 1.83. Driver and documentation available from www.qlogic.com.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Driver Version 6.v. Supports persistent binding and only supports Class 3.
- Driver Version 6.50v.
- Supported in "Shared HBA" topology. Single HBA may be zoned to more than one storage array. This included arrays of different types and/or models.
- Driver Version 6.51a.
- Driver installation with NetWare 5.0 SP6A: Do not load cpmpmk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
- Driver and documentation available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- Driver Version v6.51a.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- Support for CX600, CX400, FC4500, FC4700, and FC5300. (FC5300 requires copper to Fibre transceiver.)
- This HBA is equivalent to the qLogic QLA2310.

16. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
17. This HBA is equivalent to the qLogic QLA2340.
18. **Requires BIOS 1.34 available from Qlogic at <http://www.qlogic.com>.**
19. PCI-X servers must use single 5 volt PCI slot for Adaptec 2944 family.
20. This server only supports 5 Volt HBAs: qLogic 22XX family, Emulex LP8000, and Emulex LP850
21. HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
22. **FC-AL for CX200 requires the following:
If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.**
23. Requires NWPANLM V.3.07A update from Novell website.
24. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
25. PowerPath not currently supported.
26. Requires BIOS version 2.02e.
27. Driver Version 3.90a7.
28. Novell Storage Services supported.
29. CX200 available through selected channels.
30. Supports Boot BIOS 1.63a2. Supports SNIA HBA API. Available at <http://www.emulex.com>.
31. PowerPath and ATF supported.
32. Driver installation with NetWare 5.0 SP6A: Do not load cpqmpk.psm when prompted. At the point when you are to load idecd, ideata and scsihd, toggle to the Control prompt with <Alt-Esc>. Once at the system control, unload nwpa.nlm, then load nwpa.nlm version 3.07a 5/3/01. Once the new nwpa.nlm is loaded, toggle back to the install screen and continue with the install. When install is complete, down the server and copy nwpa.nlm version 3.07a 5/3/01 to the c:\nwserver directory and reboot.
33. **Requires HBA bios 1.83.**
34. **Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
35. Firmware Version 1.34.
36. FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RFP.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- Supported with QLogic driver v6.05.00.
- An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- Requires BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340-E-SP, and QLA2342-E-SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires v6.2.1 or higher Navisphere host agent/CLI.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Driver Version v6.05.00.
- Driver Version v6.x series. Supports persistent binding and only supports Class 3.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver 4.47.18 and BIOS 1.83.
- Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
- Requires v6.05 or higher Navisphere host agent/CLI.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
- FCCode value 1.63a2.
- Single HBA zoning is required regardless of the switch being utilized.
- Driver Version 1.23a.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Driver Version v6.04.01.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- FCCode value 1.63a.
- Firmware Version 3.90a7.
- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
- Firmware Version 1.80a2.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Driver Version v1.22e.

- 48. Firmware Version v3.90a7.
- 49. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- 50. Firmware Version 1.02a0.
- 51. Firmware Version 1.80a3.
- 52. **Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.**

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
- Driver Version v6.05.00.
- Driver Version v6.x series. Supports persistent binding and only supports Class 3.
- Compaq servers that are rack–mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32–bit, this shielding prohibits 64–bit HBAs from properly seating in the PCI slots. To accommodate 64–bit HBAs, this shielding must be removed, or modified to allow the 64–bit HBA to fully seat in the 32–bit slots.
- Supported with QLogic driver v6.05.00.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- HPQ Proliant servers that are rack–mountable (designated with an "R") are supported.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
- Requires v6.2.1 or higher Navisphere host agent/CLI.
- Single HBA zoning is required regardless of the switch being utilized.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.
- Requires QLogic driver 4.47.18 and BIOS 1.83.
- Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
- The kernel version listed is included in the corresponding standard distributed release.
- Requires v6.05 or higher Navisphere host agent/CLI.
- For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
- Requires QLogic driver v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
- This HBA is equivalent to the QLogic QLA2310.
- Driver Version v6.04.02.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- Dual port PCI–X fibre channel mezzanine card option is embedded. No PCI/PCI–X slots available.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**

44. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
45. Emulex driver and BIOS available from <http://www.emulex.com>.
46. Driver Version 1.23a.
47. FCode value 1.63a2.
48. This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
49. The LP9002-E now ships with the LP9002L-E low profile adapter.
50. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
51. Driver Version v6.04.01.
52. Firmware Version 3.90a7.
53. FCode value 1.63a.
54. Linux v2.4.x Kernels support a maximum of 128 devices per system.
55. Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
56. Firmware Version 1.80a2.
57. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
58. Firmware Version 1.01a2.
59. Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.
60. This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
61. PowerPath v3.02 not supported on this system.
62. Firmware Version 1.02a0.
63. Firmware Version v3.90a7.
64. Driver Version v1.22e.
65. Driver Version v6.04.01. Supports persistent binding and only supports Class 3.
66. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
67. Firmware Version 1.80a3.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- Supported with QLogic driver v6.05.00.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- Driver Version v6.05.00.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.**
- Driver Version v6.x series. Supports persistent binding and only supports Class 3.
- This server only supports 5 Volt HBAs: qLogic 22XX family, qLogic 23XX family, Emulex LP8000, and Emulex LP850
- PowerPath v3.02 not supported on this system.
- This system is supported with Red Hat 2.1 Advanced Server v2.4.9–E.3 and updated with v2.4.9–E.9, E.10, and E.12 RPMs.
- PowerPath v3.0.2 b069 is not supported on this system.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65**
- This HBA is equivalent to the qLogic QLA2310.
- Driver Version v6.04.02.
- Requires v6.2.1 or higher Navisphere host agent/CLI.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img-i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- This HBA is equivalent to the qLogic QLA2340.
- Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- For fabric boot support, install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
- Requires QLogic driver v6.05.00 and BIOS v1.83 for QLA2200F and BIOS v1.34 for QLA2310F, QLA2340–E–SP, and QLA2342–E–SP available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- Requires QLogic driver 4.47.18 and BIOS 1.83.
- Install with driver provided by RedHat Installer and upgrade to the EMC-approved driver after installation.
- The kernel version listed is included in the corresponding standard distributed release.
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Single HBA zoning is required regardless of the switch being utilized.
- Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Driver Version v6.04.01.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- Driver Version 1.23a.
- FCode value 1.63a2.
- This HBA is equivalent to the QLogic QLA2200.
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- The LP9002–E now ships with the LP9002L–E low profile adapter.
- Firmware Version 3.90a7.
- FCode value 1.63a.
- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
- Firmware Version 1.80a2.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
- Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
- Due to the HS20's embedded FC-SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**

61. Driver Version 6.04.01.
62. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
63. Install with driver provided by Red Hat 7.2 Installer and upgrade to the EMC-approved driver after installation.
64. Driver Version v1.22e.
65. Firmware Version v3.90a7.
66. Dual-port FC switch module. Can be used in place of Optical PassThru Module (OPM).
67. Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
68. Firmware Version 1.02a0.
69. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
70. Firmware Version 1.80a3.
71. Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.

- Requires v6.2.1 or higher Navisphere host agent/CLI.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- This kernel is limited to 110 devices, not 128.
- Requires QLogic driver 4.47.18 driver disk, dd.img–i686.gz and BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- Only one HBA is qualified for use in the Linux host when booting from the CLARiiON via fabric.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- Host must be offline for CLARiiON–licensed (Flare) upgrade and Storage Processor replacement.
- Requires BIOS 1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires v6.0.5 or higher Navisphere host Agent/CLI.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- BIOS v1.83 for QLA22xx and BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Driver Version v6.x series. Supports persistent binding and only supports Class 3.
- Driver Version v6.05.00.
- Requires QLogic driver 4.47.18 and BIOS 1.83.
- Install with driver provided by RedHat Installer and upgrade to the EMC–approved driver after installation.
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires QLogic driver v6.04.01 (included in 2.4.9–e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- FCode value 1.63a2.
- Driver Version 1.23a.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Driver Version v6.04.01.
- The LP9002–E now ships with the LP9002L–E low profile adapter.
- FC–AL and FC–SW can run concurrently on separate HBAs on the same Host.
- Firmware Version 3.90a7.
- FCode value 1.63a.
- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- Firmware Version 1.80a2.
- Boot BIOS 1.63a2 supported for external boot. Available at <http://www.emulex.com>.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Firmware Version v3.90a7.
- Driver Version v1.22e.
- Firmware Version 1.02a0.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Firmware Version 1.80a3.
- Requires Emulex BIOS 1.61a1 available from <http://www.emulex.com>.
- Supports Stratus OS 2.0.X through 2.1.X.
- Supports Stratus OS 1.3.X through 2.1.X.
- Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.

- BIOS v1.34 for QLA23xx available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- FC–AL and FC–SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- Driver Version Emulex Open Source driver v1.22e.

1. Linux v2.4.x Kernels support a maximum of 128 devices per system.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
4. Driver Version 6.05.00.
5. Single HBA zoning is required regardless of the switch being utilized.
6. QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
7. Requires BIOS 1.34 available from <http://www.qlogic.com>.
8. Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
9. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
10. Requires BIOS 1.34 available from QLogic at <http://www.qlogic.com>.
11. FCode value 1.63a2.
12. Firmware Version 1.01a2.
13. Driver Version 1.23a.
14. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
15. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
16. Emulex driver and BIOS available from <http://www.emulex.com>.
17. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
18. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
19. Firmware Version 1.80a3.

20. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
21. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
22. No MirrorView or SnapView used on boot LUNs.
23. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
24. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
25. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
26. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
27. An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
28. Firmware Version 3.90a7.

1. Linux v2.4.x Kernels support a maximum of 128 devices per system.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
4. Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
5. QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
6. Must use standard PCI 32bit/33MHz slot for SCSI
7. Driver Version 6.05.00.
8. Single HBA zoning is required regardless of the switch being utilized.
9. FC–AL and FC–SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
10. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
11. Emulex driver and BIOS available from <http://www.emulex.com>.
12. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
13. Driver Version 1.23a.
14. Firmware Version 1.01a2.
15. FCode value 1.63a2.
16. Firmware Version 3.90a7.
17. Firmware Version 1.80a3.

- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPK.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
- Driver Version 6.05.00.
- Compaq servers that are rack–mountable (designated by Compaq with an "R") are supported.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from http://www.qlogic.com.
- Supports BIOS 1.83. Available at http://www.qlogic.com. Supports SNIA HBA API.
- Includes both Pentium PRO and XEON models
- HPQ Proliant servers that are rack–mountable (designated with an "R") are supported.
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32–bit, this shielding prohibits 64–bit HBAs from properly seating in the PCI slots. To accommodate 64–bit HBAs, this shielding must be removed, or modified to allow the 64–bit HBA to fully seat in the 32–bit slots.
- Requires BIOS 1.34 available from Qlogic at http://www.qlogic.com.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPK.
- Dual port PCI–X fibre channel mezzanine card option is embedded. No PCI/PCI–X slots available.
- FCode value 1.63a2.
- Firmware Version 1.01a2.
- Driver Version 1.23a.
- FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from http://www.emulex.com.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
- Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
- Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
- No MirrorView or SnapView used on boot LUNs.
- EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
- Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
- Firmware Version 1.80a3.
- Firmware Version 3.90a7.

- Linux v2.4.x Kernels support a maximum of 128 devices per system.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON–attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
- Requires BIOS 1.34 available from <http://www.qlogic.com>.
- Driver Version 6.05.00.
- Supports BIOS 1.83. Available at <http://www.qlogic.com>. Supports SNIA HBA API.
- This server only supports 5 Volt HBAs: QLogic 22XX family (if applicable), QLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- Requires BIOS 1.34 available from Qlogic at <http://www.qlogic.com>.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supports IBM BIOS 1.35. Available at <http://www.qlogic.com>.
- Due to the HS20's embedded FC–SW design, EMC Access Logix is required to assign LUNS to each individual blade server.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
 - EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
 - Dual–port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
 - Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
 - FC–AL and FC–SW topologies can co–exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
 - The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
 - Emulex driver and BIOS available from <http://www.emulex.com>.
 - QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
 - Driver Version 1.23a.
 - Firmware Version 1.01a2.
 - FCode value 1.63a2.
 - QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
 - Firmware Version 1.80a3.
 - Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
 - Access Logic required, direct connect or fabric, (no booting through switch inter–switch links)
 - No MirrorView or SnapView used on boot LUNS.
 - EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.

32. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
33. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
34. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
35. This system is supported with Red Hat 2.1 Advanced Server v2.4.9-E.3 and updated with v2.4.9-E.9, E.10, and E.12 RPMs.
36. PowerPath v3.0.2 b069 is not supported on this system.
37. PowerPath v3.02 not supported on this system.
38. Firmware Version 3.90a7.

1. Linux v2.4.x Kernels support a maximum of 128 devices per system.
2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
3. Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from ftp://ftp.emc.com/pub/elab/linux.
4. Single HBA zoning is required regardless of the switch being utilized.
5. QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.
6. Requires BIOS 1.34 available from http://www.qlogic.com.
7. Driver Version 6.05.00.
8. Requires BIOS 1.34 available from Qlogic at http://www.qlogic.com.
9. Firmware Version 1.01a2.
10. Driver Version 1.23a.
11. FCode value 1.63a2.
12. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
13. The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
14. Emulex driver and BIOS available from http://www.emulex.com.
15. QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.
16. Optical cables apply to CX600, CX400, CX200, FC4700, FC4500, FC5300 with MIA.
17. Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
18. No MirrorView or SnapView used on boot LUNs.
19. EMC recommends boot LUN be RAID1 or RAID5. Be sure to monitor the loading on the boot LUN RAID group. Excessive loading on the boot LUN RAID group may degrade boot LUN performance and stability.
20. Refer to the Customer Service website or your EMC Service Personnel for the latest documentation.
21. Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
22. For any CLARiiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
23. QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.
24. Firmware Version 1.80a3.
25. Firmware Version 3.90a7.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.

1. EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.

2. EMC recommends that HBAs of different vendors not be used in the same host server.

3. PowerPath not supported. ATF is supported.

4. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.

5. Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.

6. Supported by direct attach only

7. Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0.

VxVM not supported.

PowerPath 3.0 supported.

8. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.

9. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.

10. Host must be offline for CLARiON-licensed (Flare) upgrade and Storage Processor replacement.

11. Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.

12. PowerPath supported. ATF/CDE not supported.

13. GAB disks (membership and service group heartbeat disks) are not supported.

14. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.

15. If using ATF/CDE, requires 2.1.6 or greater..

16. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
 17. An RPM from Dell may be used to install the QLogic v6.05.00 driver and may be obtained from the QLogic website at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 18. Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3, PowerPath 3.02

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- PowerPath not supported. ATF is supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- CX600 only.
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0. VxVM not supported. PowerPath 3.0 supported.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- Supported by direct attach only
- Host must be offline for CLARiON-licensed (Flare) upgrade and Storage Processor replacement.
- LP8000 no longer has removable GBICs for copper cable support.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
- GAB disks (membership and service group heartbeat disks) are not supported.
- PowerPath supported. ATF/CDE not supported.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- If using ATF/CDE, requires 2.1.6 or greater..
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- HP NetServer LC2000 is only supported with two processors.Uni-Processor configurations are not supported
- Includes both Pentium PRO and XEON models
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0 . VxVm not supported. PowerPath 3.0 supported.
- Supports BIOS 1.34. Supports SNIA HBA API. Driver and BIOS available at <http://www.qlogic.com>.
- Supports BIOS 1.34. Available at <http://www.qlogic.com>. This driver requires Microsoft STORPort hotfix Q823728. Please see [http://support.microsoft.com/default.aspx?scid=kb;\[LN\];823728](http://support.microsoft.com/default.aspx?scid=kb;[LN];823728) [NOTE: Powerpath not currently supported with STORPort driver.]
- BL20p (G2) is not supported in a direct attach cluster configuration w/ CLARiON CX200.
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.02

- GAB disks (membership and service group heartbeat disks) are not supported.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- Supported by direct attach only
- IBM xSeries Servers only:
- This HBA is equivalent to the qLogic QLA2310.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- PowerPath supported. ATF/CDE not supported.
- If using ATF/CDE, requires 2.1.6 or greater..
- Oracle Cluster File System not supported for 9i RAC 9.2.0.1.0. VxVM not supported.
- PowerPath 3.0 supported.
- This HBA is equivalent to the qLogic QLA2340.
- For CX200 direct-connect only, boot from array for clusters not supported.
- This server only supports 5 Volt HBAs: qLogic 22XX family (if applicable), qLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
- If using ATF/CDE, requires 2.1.6 or greater.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.**

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- PowerPath not supported. ATF is supported.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.**
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- PowerPath supported. ATF/CDE not supported.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If using ATF/CDE, requires 2.1.6 or greater..
- Supported by direct attach only
- GAB disks (membership and service group heartbeat disks) are not supported.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Powerpath 3.0.5 supported with MSCS clusters on Windows 2003.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- No EMC Layered Applications supported on IA64 server platforms**
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Powerpath 3.0.5 supported with MSCS clusters on Windows 2003.
- This HBA is equivalent to the qLogic QLA2310.
- This HBA is equivalent to the qLogic QLA2340.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
- No EMC Layered Applications supported on IA64 server platforms
- MSCS multi cluster configurations supported. If multi-clusters using Fibre Channel HBAs are configured to use a single FA port, use ESN Manager for LUN masking with the following minimum microcode: 5267.39, 5567.46, 5568.39.

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows NT Server 4.0 Enterprise Edition.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- Includes both Pentium PRO and XEON models
-

This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.

10. LP8000 no longer has removable GBICs for copper cable support.
11. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
12. If using ATF/CDE, requires 2.0.9 or greater.

1. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
2. Maximum number of NWFS volumes that can be mounted is 64.
3. Novell Storage Services supported.
4. Powerpath & ATF supported.
5. FC-AL for CX200 requires the following:
 - 1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 - 2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
6. PowerEdge 2550 supports a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
7. Requires NetWare patches: NWPAPT2A and NSS5J.
8. FC-AL for CX200 requires the following:
 - If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
 - Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
9. Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
10. FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

- Maximum number of NWFS volumes that can be mounted is 64.
- Requires NetWare patches: NWPAPT2A and NSS5J.
- Novell Storage Services supported.
- Powerpath & ATF supported.
- FC-AL for CX200 requires the following:
 - QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
 - If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNS is supported.
- HPQ Proliant servers with ATF and Powerpath requires use of SCSIHD in place of CPQSHD.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- HPQ Proliant servers that are rack-mountable (designated with an "R") are supported.
- This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accommodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
- Includes both Pentium PRO and XEON models
- FC-AL for CX200 requires the following:
 - If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
 - QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
- FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.

1. NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
2. Maximum number of NWFS volumes that can be mounted is 64.
3. Novell Storage Services supported.
4. Powerpath & ATF supported.
5. If using ATF/CDE, requires 2.1.6 or greater.
6. This HBA is equivalent to the QLogic QLA2340.
7. FC-AL for CX200 requires the following:
1) QLA2340 driver version 6.50v available at http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
2) If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
8. Requires NetWare patches: NWPA2A and NSS5J.
9. This server only supports 5 Volt HBAs: QLogic 22XX family (if applicable), QLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
10. FC-AL for CX200 requires the following:
If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
11. FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
12. QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.

1. Watchdog Timer should be disabled in ocmargs.ora

2. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPO.

3. OCFS (Oracle Cluster File System) is not supported.
4. Supported with QLogic driver v6.05.00.
5. Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiiON Storage Arrays" in the EMC Networked Storage Topology Guide.
6. Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
7. QLogic driver is available with Dell/Oracle CC kit.
8. An RPM from Dell may be used to install the QLogic v6.X driver. RPM may be obtained from the QLogic website.
9. requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
10. Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
11. Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
12. This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath.
13. Booting from EMC storage arrays is NOT supported with PowerPath.
14. OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
15. Driver v6.04.00 or above must be used with Qlogic HBAs for direct attach configurations.
16. FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
17. PowerPath is not supported.
18. GAB disks (membership and service group heartbeat disks) are not supported.
19. Review single attach VxVM notes for PowerPath and DMP restrictions.
20. When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
21. This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
22. Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.03
23. **QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
24. Single HBA zoning is required regardless of the switch being utilized.
25. FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
26. FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
27. If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
28. EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
29. **The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
30. **Emulex driver and BIOS available from <http://www.emulex.com>.**
31. **QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RQP.
- Oracle Cluster File System v1.x supported with Linux v2.4.9-E9, E10, E12, E16, E24, E25.
- Compaq servers that are rack-mountable (designated by Compaq with an "R") are supported.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Configuration information available on EMC PowerLink and Avatar: See the Case Study "Oracle 9i RAC on Linux Red Hat 7.1 and Red Hat 2.1 Advanced Server with CLARiON Storage Arrays" in the EMC Networked Storage Topology Guide.
- Host must be offline for CLARiON-licensed (Flare) upgrade and Storage Processor replacement.
- Driver v6.04.00 or above must be used with QLogic HBAs for direct attach configurations.
- Watchdog Timer should be disabled in ocmargs.ora
- Supported with QLogic driver v6.05.00.
- OCFS (Oracle Cluster File System) is not supported.
- Includes both Pentium PRO and XEON models
- OCFS (Oracle Cluster File System) is supported. Requires patch mount-2.11g-6i386.rpm (ocfs mount support).
- GAB disks (membership and service group heartbeat disks) are not supported.
- When VxVM is used, EMC recommends VxVM 3.2 update 2, VxFS 3.4 update 1 and above.
- Review single attach VxVM notes for PowerPath and DMP restrictions.
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- Oracle Cluster File System 1.x supported for 9i RAC 9.2.0.3. PowerPath 3.03
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- FC-AL and FC-SW can run concurrently on separate HBAs on the same Host.
- Single HBA zoning is required regardless of the switch being utilized.
- If no firmware/BIOS/driver is specified, refer to Base Connectivity information for minimum revision details.
- FC-AL for FC4700 requires Base Software or Access Logix 8.42.xx or higher.
- requires patch p2632931_9202_LINUX.zip (9.2.0.2 patch set).
- Requires patch p2646914_9202_LINUX.zip (Private Network Fix).
- PowerPath is not supported.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RQP.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.**
- Emulex driver and BIOS available from <http://www.emulex.com>.**
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- Includes both Pentium PRO and XEON models

IBM

IBM – SuSE Linux						
No.	Host System	Operating System	Cluster Software	Max # Nodes	Host Bus Adapter	Comments
1	eServer BladeCenter HS20 (Model 8678) ^{9, 10}	SuSE Linux SLES 8 SP2a (v2.4.19–SuSE.304) ^{2, 3}	Microsoft MSCS ^{4, 5, 6}	HA: 4	IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ^{11, 12} , Optical Pass–thru Module 02R9080 ^{7, 8}	See ¹

- EMC supports booting from cluster servers. Please refer to base connectivity table to determine boot support for desired server model.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiON–attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Best Practice configurations recommendations for MSCS Clusters are: Single HBA Zoning for each server or for each node in any given cluster, separate FA storage ports for each separate cluster to properly isolate the clusters from each other, use ESN Manager with Single HBA Zoning to provide additional LUN access control.
- Microsoft Cluster Server (MSCS) is the native cluster service available with Windows 2000 Advanced Server.
- Powerpath 3.0.5 supported with MSCS clusters on Windows 2003.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
 - Refer to Microsoft HCL for updated Windows 2000 SCSI clusters (<http://www.microsoft.com/hwtest/hcl>).
 - EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
 - Dual–port FC switch module. Can be used in place of Optical PassThru Module (OPM.)
 - Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.

Fibre Connectivity: Hub

Please refer to the Cables and Connectors section for more information. Please refer to the Base Connectivity Interoperability Application for details concerning kernel versions, minimum driver and BIOS / firmware revisions. Fanout represents the maximum initiators (host adapters) per array port. Fanin represents the number of array ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see the Connectrix Enterprise Storage Network Planning Guide, EMC Networked Storage Topology Guide, and CLARiON Open Systems Configuration Guide. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported with QLogic driver v6.05.00.
- Single HBA zoning is required regardless of the switch being utilized.
- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Host must be offline for CLARiiON-licensed (Flare) upgrade and Storage Processor replacement.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**

Fibre Connectivity: Switch

Fanout represents the maximum initiators (host adapters) per array port. Fanin represents the number of array ports visible to a single initiator (host adapter). In arbitrated loop environments, these numbers represent the maximum initiators per loop. In switch environments, these numbers are achieved through Zoning. For further details on Fanin/Fanout, see the Connectrix Enterprise Storage Network Planning Guide, EMC Networked Storage Topology Guide, and CLARiiON Open Systems Configuration Guide. For Switch Firmware levels and other fabric parameters, see Switched Fabric Topology parameters.

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"
- This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- EMC recommends that HBAs of different vendors not be used in the same host server.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- This HBA is equivalent to the QLogic QLA2340.
- This HBA is equivalent to the Emulex LP982.
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

- Maximum number of NWFS volumes that can be mounted is 64.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- ED-64 and ED-1032 not supported for FC5300.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.**
- FC-AL for CX200 requires the following:
If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.**
- For IBM Netfinity and xSeries Intel servers only.
- This HBA is equivalent to the qLogic QLA2340.
- This HBA is equivalent to the qLogic QLA2310.
- (QLA2200) For IBM xSeries and Netfinity servers only.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver v6.04.02 and BIOS 1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires QLogic driver v6.04.02 and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Firmware v2.5.1b or later required**
- Firmware 3.0.2a or later required.**
- Qlogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.**
- FC-AL for CX200, If the server is an HPQ Proliant DLxxx or Proliant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- Requires NWPALNM V.3.07A update from Novell website.**
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)**

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with Qlogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Firmware 3.0.2a or later required.
- EMC DS-32B2 or ED-12000B for "Extended Fabric License" use minimum 4.0.2a firmware, 1 x L2 or 2 x L1 ports per quad only.
- EMC DS-16B2 for "Extended Fabric License", use minimum 3.0.2f firmware, 1 ISL per quad only. Extended Fabric License can be used only in homogeneous Brocade fabric.
- Extended Fabric software license is bundled into DS-xB models. Optional Extended Fabric software license for all DS-xB switches ordered after July 4, 2001 require chargeable model DSBXFAB-0D.
- Firmware v2.5.1b or later required
- EMC DS-16B-00 contains multi-mode GBICs (850 nm Fibre Channel) "Extended Fabric License" feature can be utilized. EMC DS-16B-02 contains multi-mode GBICs (1310 nm Fibre Channel) "Extended Fabric License" feature can be utilized.
- Supported with QLogic driver v6.05.00.
- Single HBA zoning is required regardless of the switch being utilized.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- This kernel is supported with the Qlogic v6.04.01 driver included in the kernel.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)
- ED-64 and ED-1032 not supported for FC5300.

- Emulex driver and BIOS available from <http://www.emulex.com>.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- Host must be offline for CLARiON-licensed (Flare) upgrade and Storage Processor replacement.
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**

21. Requires firmware 5.05.00 (This firmware revision is only to be used on ES-4300)

iSCSI to FC Routing

No.	Operating System	Network Interface Card	Driver	Network Configuration	Bridge	Firmware Revision	Comments
1	Microsoft Windows 2000: Advanced Server SP4 ⁵ , Server SP4 ⁹ ; Microsoft Windows 2003: Enterprise Edition (Advanced Server) ⁵ , Standard Edition (Server) ⁵	Generic NIC 10/100, Generic NIC GE	Microsoft 1.01 ¹ , 2, 3, 4	LAN Only ^{9, 10}	Nishan IPS 3300, Nishan IPS 4300	4.1	See ^{6, 7, 8}

1. Booting over iSCSI is not supported.
2. Clusters are not supported.
3. Microsoft Dynamic Disks are not supported.
4. The maximum number of iSCSI LUNs supported per host system is 128.
5. EMC recommends that HBAs of different vendors not be used in the same host server.
6. This configuration requires completion of a Pre-Sales Questionnaire (PSQ).
7. PowerPath 3.0.5 is supported with different subnets for each path.
8. A maximum of 12:1 fan-in is supported.
9. Layer 2 or single subnet TCP/IP LAN
10. Requires a dedicated network for iSCSI storage only. The network should be design to have no packet loss or packet duplication.

1. Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
2. EMC recommends that HBAs of different vendors not be used in the same host server.
3. Powerpath supported on FC4500, FC4700, CX600, CX400, and CX200.
PowerPath Base supported on FC4500, CX200 only.
CLARiON and Symmetrix can co-exist in the SAN with the same server.
4. The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
5. This HBA is equivalent to the qLogic QLA2340.
6. Stratus ftServer OS release 2.1 or greater required for Stratus ftServers.
7. Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
8. Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
9. When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.
10. Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
11. Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
12. EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.

Microsoft Windows 2003			
No.	Operating System	Host Bus Adapter	Application Software
1	Microsoft Windows 2003: Enterprise Edition (Advanced Server) ^{1, 2} , Standard Edition (Server) ^{1, 2}	Emulex: LP10000-E, LP10000DC-E, LP1050-E, LP1050DC-E, LP8000-EMC ⁵ , LP9002-E (LP9002L-E), LP9802-E, LP9802DC-E, LP982-E; HPQ: A7298A (LP982), DS-KGPSA-CA (LP8000), DS-KGPSA-CB (LP8000), DS-KGPSA-CY (LP8000), Dual-port mezzanine controller card, FCA2101 (LP952), FCA2214 (QLA2340), FCA2214DC (QLA2342), FCA2354 (LP9002), FCA2355 (LP9002DC), FCA2384 (LP9802), FCA2404 (LP9802), FCA2404DC (LP9802DC), FCA2408 (LP982); IBM HS20 FC Exp Card(48P7061) with: 2 Port Switch Module 48P7062 ¹⁰ , Optical Pass-thru Module 02R9080 ^{8, 9} ; NEC: N8190-105 ¹¹ , N8803-031 (QLA2310F); QLogic: QLA2310F-E-SP, QLA2340-E-SP, QLA2342-E-SP	AccessLogix 02.05; Navisphere: Agent/CLI 6.5, Analyzer 6.5, Integrator 6.5 ⁶ , Manager Base 6.5, Manager, Event Monitor 6.5 ⁷ ; PowerPath: 3.0.5 ^{3, 4} , Base 3.0.5 ^{3, 4}

- EMC recommends that HBAs of different vendors not be used in the same host server.
- For Windows 2003 STORPort drivers, support is limited to the following configurations: 1 HBA with 1 path to 1 SP; 2 HBAs, one with a single path to SPA and the other with a single path to SPB. Refer to HBA guides for expected device behavior. [NOTE: Powerpath not currently supported with STORPort driver.]
- Powerpath supported on FC4500, FC4700, CX600, CX400, and CX200.
PowerPath Base supported on FC4500, CX200 only.
CLARiON and Symmetrix can co-exist in the SAN with the same server.
- PowerPath is currently supported only with QLogic SCSIPort miniport drivers and the Emulex full port driver.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- When flashing HBA bios on the HS20 FC Expansion card, you may receive the error message: "Error erasing flash at I/O address 2600 (this is the second port on the HBA)"

This is a known issue as the expansion card only has one flashable port. IBM is working to resolve this and this message can be ignored.

- Connection through an EMC SAN fabric is supported. See the Fibre Channel Section of this guide for supported switches in the SAN fabric.
- Ports from the 2 port switch module(48P7062) must be directly connected to ports on the EMC storage system.
- EMC does not support the Emulex equivalent of N8190-105. Check with NEC on where to download the latest supported firmware and boot BIOS for this adapter.

- ATF/CDE is not supported on CX200, CX400 or CX600 arrays. ATF/CDE and PowerPath cannot co-exist on the same server.
- EMC recommends that HBAs of different vendors not be used in the same host server.
- Powerpath supported on FC4500, FC5300, FC4700, CX600, CX400, and CX200.

CLARiON and Symmetrix can co-exist in the SAN with the same server.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- This HBA is equivalent to the qLogic QLA2340.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.

- Maximum number of NWFS volumes that can be mounted is 64.
- Powerpath supported on FC4500, FC4700, CX600, CX400, and CX200.
PowerPath Base supported on FC4500, CX200 only.
CLARiON and Symmetrix can co-exist in the SAN with the same server.
- NetWare NSS has 120 LUN per port limitation. If NSS will not be used, 128 LUNs is supported.
- FC-AL for CX200 requires the following:
If the server is an HPQ ProLiant DLxxx or ProLiant MLxxx series, then ONLY (G2) and (G3) servers are supported.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- QLogic driver obtained from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65 is required.
- FC-AL for CX200, If the server is an HPQ ProLiant DLxxx or ProLiant MLxxx series, then ONLY (G2) and (G3) servers are supported.

- This kernel is supported with PowerPath v3.0.2 b069. Driver v6.04.00 or above must be used with QLogic HBAs and Powerpath. Booting from EMC storage arrays is NOT supported with PowerPath.
- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Single HBA zoning is required regardless of the switch being utilized.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- Host must be offline for CLARiON-licensed (Flare) upgrade and Storage Processor replacement.
- CLARiON and Symmetrix can co-exist in the SAN with the same server.
- PowerPath Base is supported on the FC4500 and CX200 only.
- Requires BIOS v1.34 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- Requires QLogic driver v6.04.01 (included in 2.4.9-e.24 kernel) and BIOS v1.83 available from http://www.qlogic.com/support/oem_detail_all.asp?oemid=65.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**
- This kernel is supported with the QLogic v6.04.01 driver included in the kernel.
- This kernel is supported with PowerPath v3.0.2 via RPQ only.
- Supported with QLogic driver v6.05.00.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**

- EMC supports the following filesystems: ext2, ext3, reiserfs. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Requires rev1_sles8sp2a.patch for CLARiiON-attached hosts available from <ftp://ftp.emc.com/pub/elab/linux>.
- QLogic v6.x series drivers and Emulex driver v1.23a support persistent binding and only support Class 3.**
- CLARiiON and Symmetrix can co-exist in the SAN with the same server.
- PowerPath Base is supported on the FC4500 and CX200 only.
- PowerPath 3.0.3 b065 needs to be installed with the RPM "--noscripts" option prior to installing PowerPath 3.0.4 b012.
- Single HBA zoning is required regardless of the switch being utilized.
- FC-AL and FC-SW topologies can co-exist on the same server but not on same HBA, provided that different topologies are attached to different HBAs.
- The Emulex LP9XXX HBA family requires a host PCI bus capable of supplying 3.3 VDC bus power. The PCI slot can use either 3.3 VDC or 5.0 VDC signaling interfaces.
- Emulex driver and BIOS available from <http://www.emulex.com>.
- Use the boot option "acpi=oldboot" in SuSE SLES8 SMP configurations with the LP9802DC-E and LP9002DC-E adapters
- The LP9002-E now ships with the LP9002L-E low profile adapter.
- Shipped with Navisphere Manager. Integrator supports CA-Unicenter TNG 2.4, CA-Unicenter NSM 3.0, HP OpenView 6.1 or 6.3, and Tivoli NetView 6.0B or 7.1.
- Manager v6.x is web based GUI that resides on an FC4700, CX600, CX400 or CX200 Array and is downloaded to the browser when the storage processor of the array is accessed. The browser requires a Manager Client that supports Java 1.4.1_01. Manager includes two Windows components for management of non-FC4700, non-CX600, non-CX400, non-CX200 arrays from a Windows 2000 host.
- QLogic v6.x series drivers and Emulex driver v1.x support persistent binding and only support Class 3.**
- QLogic v6.x series drivers and Emulex driver v1.2x support persistent binding and only support Class 3.**

CLARiiON CX600/400

Base Connectivity

Do not use a LUN in the CLARiiON DAE2-ATA as a host OS boot device.

DG DG/UX DG

DG – DG DG/UX							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments
1	AViiON: AV25000, AV35000 ^{9, 10} , AV3750	PCI	DG DG/UX R4.20MU07 ^{2, 8}	Emulex LP8000-EMC ⁶	FC-AL, FC-SW	N	See ¹
2	AViiON: AV25000, AV35000, AV3750	PCI	DG DG/UX R4.20MU07 ²	Emulex LP8000-F1 ^{3, 4}	FC-AL, FC-SW ⁵	N	See ¹
3	AViiON: AV25000, AV35000, AV3750	PCI	DG DG/UX R4.20MU07	Emulex LP8000-EMC ^{6, 7}	FC-SW ⁵	N	

- For more information see <http://athena.europe.dg.com>
- The release notice for DG/UX (included with the software release at path: "/usr/release/dgux*.m) lists supported platforms.
- DG/UX automatically loads the firmware and BIOS onto the Emulex HBA during boot-up as needed.
- Only the Brocade FC switch connection is supported. Connectrix FC switch is not supported.
- DS-8B or DS-16B switches only; qualified with firmware v2.1.4a, v2.2, and v2.3.
- The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.
- Firmware Version 3.20x4.
- FC4700 is only supported on DG/UX 4.20 MU07.
Maximum of 2 fabrics, each with a maximum of 4 switches.
Maximum of 4 FC4700s per fabric.
Maximum of 16 HBAs per fabric.
Maximum of 32 HBAs per FC4700 SP.
Maximum of 6 DG/UX servers per FC4700.
Maximum of 4 HBAs per AV3750 server (2 per fabric).
Maximum of 4 HBAs per NUMA block (2 per fabric in non-clustered environments).
FA4500 may be mixed within the same fabric with FC4700 running Access Logix, but must be separately zoned.
- AViiON 25000/35000 servers are not supported for direct server connections to FC4700.
- ClarAlert is available to support FC4700 on AViiONS. ClarAlert is not compatible with other AViiON management software on the Navisphere management workstation.

EMC NAS EMC

EMC – EMC NAS							
No.	Host System	Host Bus	Operating System	Host Bus Adapter	Adapter Type	External Boot	Comments

- FC4700-2 and CX600 (CX600 requires EMC NAS release 5.0.9 or greater)
- Not field-replaceable.
- This HBA is for connecting to a disk array.
- Host Adapter Card is not field-replaceable.
- This HBA is for connecting to a Tape Library unit.
- CX600 (FC-AL or FC-SW) and CX400 (FC-SW)
