Processor Restrictions

VAXstation 3520 and VAXstation 3540 are only supported with the VT terminals or remote X display. Local X display is not supported.

Memory Requirements

The SoftPC application requires a minimum working set of 2 MB. The minimum supported system memory for this application running in a standalone DECwindows environment with both the client and server executing on that same system is 6 MB. However, the use of this software in conjunction with increased memory capability improves performance.

Disk Space Requirements (Block Cluster Size = 1):

Disk space required for installation:	20,000 blocks
Disk space required for use (permanent):	20,000 blocks
Disk space for typical use (10 MB emulated disk):\	40,000 blocks)

These counts refer to the disk space required on the system disk. The sizes are approximate; actual sizes may vary depending on the user's system environment, configuration, and software options.

OPTIONAL HARDWARE

The software can use a local floppy disk drive with the following restrictions:

RX33 - Read/write high density. Read only low density. Note: RX33 not supported on machines with RQDX3 controllers.

RX23 - Read/write high density. Read-only low density.

CLUSTER ENVIRONMENT

This layered product is fully supported when installed on any valid and licensed VAXcluster* configuration without restrictions. The *HARDWARE REQUIREMENTS* sections of this product's Software Product Description and System Support Addendum detail any special hardware required by this product.

* V5.x VAXcluster configurations are fully described in the VAXcluster Software Product Description (29.78.xx) and include CI, Ethernet and Mixed Interconnect configurations.

SOFTWARE REQUIREMENTS

For Systems Using Terminals (No MOTIF Interface):

VMS Operating System V5.5

For Workstations Running MOTIF:

This product may run in either of the following ways:

- Stand-alone execution - running the X11 display server and the client application on the same machine.

- Remote execution - running the X11 display server and the client application on different machines.

VMS Tailoring

For VMS V5.x systems, the following VMS classes are required for full functionality of this layered product:

- VMS Required Saveset

- Network Support

For more information on VMS classes and tailoring, refer to the VMS Operating System Software Product Description (SPD 25.01.xx).

GROWTH CONSIDERATIONS

The minimum hardware/software requirements for any future version of this product may be different from the requirements for the current version.
