Guide to OpenVMS Version 7.0 CD–ROMs

Order Number: AA–QSBRA–TE

December 1995

This guide provides information about the operating system, documentation, and associated layered products CD–ROMs for OpenVMS Alpha and OpenVMS VAX.

Revision/Update Information:	This guide supersedes the *OpenVMS Version 6.2 CD–ROM User's Guide*.
Software Version:	OpenVMS Alpha Version 7.0 OpenVMS VAX Version 7.0

Contents

1 Operating System CD–ROMs

2 OpenVMS Documentation CD–ROM

Tables

Preface

Overview

This guide contains information on the OpenVMS Version 7.0 CD–ROMs and how to access OpenVMS documentation on the CD–ROM.

Document Structure

Chapter 1 lists the contents of the OpenVMS Version 7.0 CD–ROM package. It also includes pointers to the OpenVMS installation guides and general information on the OpenVMS binary CD–ROMs.

Chapter 2 describes the OpenVMS Documentation CD–ROM provided for Version 7.0. Information on how to access and read books from the CD–ROM is also included in this chapter.

Related Documents

For additional information on OpenVMS products and services, access the Digital OpenVMS World Wide Web site. Use the following URL:

```
http://www.openvms.digital.com
```

Refer to the following documents for detailed information about installation procedures and further information on Version 7.0 changes and enhancements:

- *OpenVMS Alpha Version 7.0 Upgrade and Installation Manual*

- *OpenVMS VAX Version 7.0 Upgrade and Installation Manual*

- *OpenVMS Version 7.0 Release Notes*

- *OpenVMS Version 7.0 New Features Manual*

- *OpenVMS Version 7.0 Cover Letter*

Reader's Comments

Digital welcomes your comments on this manual.

Print or edit the online form SYS$HELP:OPENVMSDOC_COMMENTS.TXT and send us your comments by:

Conventions

The name of the OpenVMS AXP operating system has been changed to OpenVMS Alpha. Any references to OpenVMS AXP or AXP are synonymous with OpenVMS Alpha or Alpha.

The following conventions are used to identify information specific to OpenVMS Alpha or to OpenVMS VAX:

Alpha	The Alpha icon denotes the beginning of information specific to OpenVMS Alpha.
VAX	The VAX icon denotes the beginning of information specific to OpenVMS VAX.
♦	The diamond symbol denotes the end of a section of information specific to OpenVMS Alpha or to OpenVMS VAX.

Throughout this manual, the following convention is used in examples of commands:

Unless otherwise indicated in the examples, commands are terminated by pressing the Return key.

1

Operating System CD–ROMs

This chapter contains information about the OpenVMS operating system CD–ROMs, including:

- Contents of the CD–ROM package

- Pointers to installation information on the OpenVMS operating system

- Directory structure of the OpenVMS Alpha and OpenVMS VAX operating system CD–ROMs

- Locations of layered products included on the operating system CD–ROMs

- Information on Product Licensing Agreements

- Information about the Alpha Firmware Version 3.4 CD–ROM

- Information about the OpenVMS Freeware CD–ROM

- Information about the ECU Diskette

1.1 OpenVMS CD–ROM Contents

For this release of OpenVMS, new customers will receive OpenVMS Version 6.2 with the OpenVMS Version 7.0 kit. Depending on your working environment and your application requirements, you can choose to install OpenVMS Version 6.2 or OpenVMS Version 7.0.

Refer to the *OpenVMS Version 6.2 CD–ROM User's Guide*, which is included in your Version 6.2 package, for information on the Version 6.2 CD–ROMs. Use this guide for information concerning the Version 7.0 CD–ROMs.

Depending on the platform and the offering you choose, the OpenVMS Version 7.0 CD–ROM package includes the following CD–ROMs and diskette:

- OpenVMS Alpha Version 7.0 Operating System Binaries CD–ROM

- OpenVMS VAX Version 7.0 Operating System Binaries CD–ROM

- OpenVMS Associated Layered Products CD–ROM

- OpenVMS Version 7.0 Documentation CD–ROM

- OpenVMS Freeware Version 2.0 CD–ROM

- Alpha Firmware Update Version 3.4 CD–ROM

- ECU Diskette Version 1.8

1.2 OpenVMS Version 7.0 Operating System Binaries

Alpha
The OpenVMS Alpha CD–ROM contains a bootable copy of the OpenVMS Alpha Version 7.0 operating system. It is installed using the POLYCENTER Software Installation utility, which is included with OpenVMS Alpha. Use the *OpenVMS Alpha Version 7.0 Upgrade and Installation Manual* to install or upgrade the OpenVMS Alpha operating system. Review the *OpenVMS Version 7.0 Release Notes* for changes and enhanced features, upgrade and compatibility information, and problems and restrictions. ♦

VAX
The OpenVMS VAX CD–ROM contains a bootable copy of the OpenVMS VAX Version 7.0 operating system and is installed using the VMSINSTAL utility. Use the *OpenVMS VAX Version 7.0 Upgrade and Installation Manual* to install or upgrade the OpenVMS VAX operating system. Review the *OpenVMS Version 7.0 Release Notes* for changes and enhanced features, upgrade and compatibility information, and problems and restrictions. ♦

1.2.1 Directories on the OpenVMS Operating System CD–ROMs

The top-level directories, documentation directories, and OpenVMS documentation file names for OpenVMS Alpha and VAX operating system CD–ROMs are listed in Table 1-1. Refer to Chapter 2 for more information about documentation and the OpenVMS Version 7.0 Documentation CD–ROM.

Table 1–1 Directory Structure on the OpenVMS Operating System CD–ROMs

Directory	File Name	Contents
OpenVMS Alpha Operating System		
[ALPHA070]		Product directory
[ALPHA070.DOCUMENTATION]		Product documentation in .PS and .TXT formats
	V70_ALPHA_INSTALL.[PS,TXT]	Alpha installation guide
	V70_REL_NOTES.[PS,TXT]	OpenVMS release notes
	V70_NEW_FEATURES.[PS,TXT]	OpenVMS new features guide
	V70_OVMS_SPD.[PS,TXT]	OpenVMS SPD
	CLUSTER_SPD.[PS,TXT]	Cluster SPD
	DECNET_SPD.[PS,TXT]	DECnet SPD
	RMS_SPD.[PS,TXT]	RMS Journaling SPD
	VOL_SHAD_SPD.[PS,TXT]	Volume Shadowing SPD

Table 1–1 (Cont.)   Directory Structure on the OpenVMS Operating System CD–ROMs

Directory	File Name	Contents
OpenVMS VAX Operating System		
[000000]		Product binary files
[DOCUMENTATION.V070]		Product documentation in .PS and .TXT formats
	V70_VAX_INSTALL.[PS,TXT]	VAX installation guide
	V70_REL_NOTES.[PS,TXT]	OpenVMS release notes
	V70_NEW_FEATURES.[PS,TXT]	OpenVMS new features guide
	V70_OVMS_SPD.[PS,TXT]	OpenVMS SPD
	CLUSTER_SPD.[PS,TXT]	Cluster SPD
	DECNET_SPD.[PS,TXT]	DECnet SPD
	RMS_SPD.[PS,TXT]	RMS Journaling SPD
	VOL_SHAD_SPD.[PS,TXT]	Volume Shadowing SPD

Layered and bundled products are included on the operating system CD–ROMs. Refer to Section 1.2.2 for a complete listing of these products.

1.2.2 Layered Products on the Alpha and VAX Version 7.0 CD–ROMs

For Version 7.0, OpenVMS is offering layered products on the Alpha and VAX operating system CD–ROMs, as well as on the Associated Layered Products CD–ROM. Refer to Section 1.3 for the associated layered products.

This layered product offering is for OpenVMS Version 7.0 only and may change for future versions. Updated versions of the layered products shipping with the operating system for Version 7.0 are available on the quarterly Software Products Libraries for Alpha and VAX.

The binaries and documentation files for each layered product are located in separate directories on the operating system CD–ROMs. Each layered product directory is set up in the following format:

[*product*]	Product directory
[*product.kit*]	Product binary files
[*product.documentation*]	Product documentation in .PS and .TXT files

The following example lists the directory structure for the DECwindows Motif Version 1.2-3 kit:

[DWMOTIF_ALPHA123]	DECwindows Motif for Alpha Version 1.2-3 directory
[DWMOTIF_ALPHA123.KIT]	Product binary files
[DWMOTIF_ALPHA123.DOCUMENTATION]	Product documentation in .PS and .TXT files

Table 1–2 lists the layered products offered on the Alpha and VAX operating CD–ROMs and their top-level directory name.

Product documentation includes release notes, installation guides, Software Product Descriptions (SPDs), and cover letters in PostScript (.PS) and text (.TXT) format for most of the layered products listed. Refer to Chapter 2 for further information on layered product documentation and the OpenVMS Version 7.0 Documentation CD–ROM.

Table 1–2   Layered Products and Their Top-Level Directories on the OpenVMS Alpha and VAX CD–ROMs

Product	Directory	Platform
DECamds for OpenVMS Alpha Version 7.0	[DECAMDS_ALPHA070]	Alpha
DECamds for OpenVMS VAX Version 7.0	[DECAMDS_VAX070]	VAX
DECnet/OSI[1] for Alpha Version 7.0	[DECNET_OSI_ALPHA070]	Alpha
DECnet/OSI[1] for VAX Version 7.0	[DECNET_OSI_VAX070]	VAX
DECwindows Motif for Alpha Version 1.2-3	[DWMOTIF_ALPHA123]	Alpha
DECwindows Motif for VAX Version 1.2-3	[DWMOTIF_VAX123]	VAX
DECwindows Motif for Alpha Version 1.2 Patch Kits	[DWMOTIF_ALPHA12]	Alpha
DECwindows Motif for VAX Version 1.2 Patch Kits	[DWMOTIF_VAX12]	VAX
Digital TCP/IP for Alpha Version 4.0	[TCPIP_ALPHA040]	Alpha
Digital TCP/IP for VAX Version 4.0	[TCPIP_VAX040]	VAX
Instruction Emulator	[EMULATOR]	Alpha
WIND/U for OpenVMS Alpha Version 3.0	[WINDU_ALPHA030]	Alpha
WIND/U for OpenVMS VAX Version 3.0	[WINDU_VAX030]	VAX

[1]The DECnet/OSI directory includes the following applications:

– FTAM
– OSAK
– VT

1.2.2.1 Instruction Emulator

The Instruction Emulator supplies code which simulates the execution of the following Alpha instructions if they are not implemented directly in hardware:

• LDBU

• LDWU

• STB

- STW

- SEXTB

- SEXTW

Some new versions of Alpha compilers are capable of generating these instructions if the code developer specifically requests it. If you run an image with these instructions in it, and your Alpha hardware does not support these instructions, the program will fail. Most programs will fail with a message like this:

```
%SYSTEM-F-OPCDEC, Opcode reserved to Digital fault at PC='location',
     PS='xxxxxx'
```

The software in this kit will prevent this failure by simulating the execution of these instructions. This simulation of an instruction is called "emulation."

Refer to the *OpenVMS Version 7.0 Release Notes* for further information on the Instruction Emulator.

1.2.3 Layered Product Licensing on the Operating System CD–ROMs

The following lists the licensing information for the products on the operating system CD–ROMs:

- DECamds Version 7.0 is included as part of the OpenVMS Cluster license.

- DECwindows Motif is part of the licensing for Digital NAS packages for OpenVMS.

- Digital TCP/IP is part of the licensing for Digital NAS packages for OpenVMS.

- DECnet/OSI is part of the licensing for Digital NAS packages for OpenVMS.

The layered products that are contained on the operating system CD–ROMs belong to Digital, with the exception of Wind/U Version 3.0.

For Wind/U licensing information and additional information on the developer's kit, contact Bristol Technology at:

241 Ethan Allen Highway, Ridgefield, CT 06877 USA
203 438-6969
email:info@bristol.com
http://www.bristol.com

1.3 Associated Layered Products CD–ROM

The Associated Layered Products CD–ROM includes layered products that enhance the OpenVMS operating system working environment. Table 1–3 lists the layered products included on this CD–ROM. Each layered product directory is set up in the following format:

[*product*]	Product directory
[*product.kit*]	Product binary files
[*product.documentation*]	Product documentation in .PS and .TXT files

The following example lists the directory structure for the DECmigrate kit:

[DECMIGRATE]	DECmigrate directory
[DECMIGRATE.KIT]	Product binary files
[DECMIGRATE.DOCUMENTATION]	Product documentation in .PS and .TXT files

Product documentation includes release notes, installation guides, Software Product Descriptions (SPDs), and cover letters in PostScript (.PS) and text (.TXT) format for most of the layered products listed. Refer to Chapter 2 for further information on layered product documentation and the OpenVMS Version 7.0 Documentation CD–ROM.

Table 1–3   Layered Products and Their Top-Level Directories on the Associated Layered Products CD–ROM

Product	Directory	Platform
DCE[1] for Alpha Version 1.3B	[DCE_ALPHA013B]	Alpha
DCE[1] for VAX Version 1.3B	[DCE_VAX013B]	VAX
DEC C/C++ XPG4 International Libraries	[VMSI18N_ALPHA070]	Alpha
DEC C/C++ XPG4 International Libraries	[VMSI18N_VAX070]	VAX
DECmigrate Version 1.1A	[DECMIGRATE]	Alpha
DECram for OpenVMS Version 2.2B	[DECRAM]	Alpha, VAX
Monitoring Performance History (MPH) Version 1.4	[MPH]	Alpha, VAX
SoftPC Version 4.0	[SOFTPC]	VAX
SoftWindows Version 1.0	[SOFTWINDOWS]	Alpha
System Healthcheck Version 1.1	[SYSTEM_HEALTHCHECK]	Alpha, VAX
X.25 for OpenVMS Alpha Version 1.1	[X25_011]	Alpha
X.25 Client for OpenVMS Alpha Version 1.2	[X25CLIENT_012]	Alpha

[1]DCE Version 1.3B for OpenVMS includes the following products:

– DCE Runtime Services
– DCE Cell Directory Server (CDS)
– DCE Security Server
– DCE Application Developer's Kit

1.3.1 Layered Product Licensing on the Associated Layered Products CD–ROM

The layered products that are contained on the Associated Layered Products CD–ROM belong to Digital.

The following products and libraries are included with the OpenVMS Base Operating System License:

• DCE Runtime Services

• Monitoring Performance History (MPH)

• DEC C/C++ XPG4 International Libraries

The following products and services are licensed separately. Contact your Digital account representative or your authorized reseller for Product Authorization Keys (PAKs).

- DCE Cell Directory Server (CDS), DCE Security Server, and DCE Application Developer's kits

- DECmigrate

- DECram

- SoftPC

- SoftWindows

- System Healthcheck

- X.25 for OpenVMS Alpha

- X.25 Client for OpenVMS Alpha

Refer to Section 1.7 for further information on product licensing.

1.4 OpenVMS Alpha Firmware

The OpenVMS Version 7.0 CD–ROM package includes the Alpha Systems Firmware Update Version 3.4 CD–ROM and printed Release Notes. Read the Firmware Update Release Notes before installing the firmware.

1.5 OpenVMS Freeware Version 2.0 CD–ROM

The OpenVMS Freeware CD–ROM contains free software tools, utilities, games, and products for OpenVMS systems. Binaries, source code, and documentation are included for most of the supplied software.

The CD–ROM includes the following features:

- Internally developed Digital tools as well as other popular tool packages

- Internet tools and utilities

- Motif applications

- Games

- Easy-to-use 4GL-based menu system

- Created in a Files–11 format

_____ **Note** _____

The OpenVMS Freeware Version 2.0 CD–ROM is included only in the OpenVMS Version 7.0 kit. The Version 6.2 kit does not contain the Version 1.0 Freeware CD–ROM as documented in the *OpenVMS Version 6.2 CD–ROM User's Guide*.

_____

1.6 ECU Diskette (Alpha Only)

Included in your OpenVMS Version 7.0 package is an ECU Diskette Version 1.8. Use this diskette if you intend to switch between operating systems on Alpha computers equipped with EISA buses (such as DEC 2000-300/500, Digital 2100 server Model A500MP/A600MP, and AlphaServer 1000 systems).

Do the following before switching from one operating system to another:

1. Insert the diskette.

2. Run the EISA Configuration utility from the diskette.

3. Remove the diskette.

4. Switch operating systems by following the procedure described in the hardware information provided with the computer.

1.7 Product Licensing

The layered products that are contained on the operating system CD–ROMs belong to Digital, with the exception of Wind/U Version 3.0 and the Freeware CD–ROM. Use of the software is authorized only if you have a valid software license from Digital for each of the products.

A License Management Facility (LMF) Product Authorization Key (PAK) allows you to access a software product. A PAK must be registered and loaded before you can install the associated software from this CD–ROM. Contact your Digital account representative or your authorized reseller for PAKs.

For Wind/U licensing information and additional information on the developer's kit, contact Bristol Technology at:

241 Ethan Allen Highway, Ridgefield, CT 06877 USA
203 438-6969
email:info@bristol.com
http://www.bristol.com

2

OpenVMS Documentation CD–ROM

2.1 Documentation CD–ROM Contents

The OpenVMS Documentation CD–ROM includes Bookreader, PostScript, and text files. The files are organized in the following directories:

- Bookreader files
  in the [DECW$BOOK] directory

- PostScript and text files
  in the [DOCUMENTATION] directory

- Archived files
  in PostScript format in the [OVMS_ARCHIVED] directory

2.2 Accessing the Bookreader Documentation

Bookreader documentation is stored in the directory [DECW$BOOK] on the OpenVMS Version 7.0 Documentation CD–ROM. Refer to Section 2.5 for information about how to access Bookreader documentation.

The following documentation is in Bookreader format:

- Full OpenVMS Version 7.0 Documentation Set

  This is a combined set of the Version 7.0 books and books from previous versions that have not been updated for Version 7.0.

- Layered-product documentation

  Refer to Table 1–2 and Table 1–3 for a complete list of the layered products included on the OpenVMS CD–ROMs.

- OpenVMS archived manuals

  Selected OpenVMS manuals have been archived and are offered in Bookreader format on the OpenVMS Archived Manuals Bookshelf.

2.3 Accessing PostScript and Text Files on the Documentation CD–ROM

PostScript (.PS) and text (.TXT) files are stored in the directory [DOCUMENTATION] on the OpenVMS Version 7.0 CD–ROM. The following documentation is in PostScript and text formats:

- PostScript files of selected OpenVMS books only updated for Bookreader

- PostScript and text files of the OpenVMS release notes, installation guides, new features, the documentation overview, and Software Product Descriptions (SPDs)

- PostScript and selected text files of the release notes, installation guides, and SPDs of the layered products on the OpenVMS CD–ROMs

To compliment the DECevent information in the OpenVMS documentation set, we have included the DECevent installation guide and release notes and selected DECevent Bookreader documentation on the documentation CD–ROM.

To print the PostScript and text documentation, mount the OpenVMS Documentation CD–ROM and enter the appropriate PRINT command.

Use commands similar to the following:

```
$ MOUNT dkb500:
$ PRINT dkb500:[DOCUMENTATION]V70_REL_NOTES.PS
$ DISMOUNT dkb500:
```

where:

dkb500: is the device name of the source drive that holds the CD–ROM
V70_REL_NOTES.PS is the name of the file to be printed

Table 2–1 lists the contents of this directory by document and file name.

2.4 Accessing Archived Documentation

The OpenVMS Version 7.0 CD–ROM contains archived OpenVMS documentation in PostScript (.PS) format. These manuals have been archived and are not planned to be revised. Archived PostScript documentation files are stored in the directory [OVMS_ARCHIVED].

Table 2–2 lists the OpenVMS archived books and their file names.

Table 2–2   OpenVMS Version 7.0 Archived Documents

The *PDP–11 TECO User's Guide* has been archived and is not available as a PostScript file, but can be ordered as a printed book through DECdirect. Refer to How To Order Additional Documentation in the front of this book.

2.5 Reading Books on the CD–ROM

If you have a workstation and have installed DECwindows Motif software, you can view the manuals in Bookreader format with DECwindows Bookreader.

During installation or upgrade, the DECwindows Motif software automatically creates a library directory for Bookreader on your system disk and defines the logical name DECW$BOOK to refer to this directory. When you start Bookreader, it looks for the library file in the directory defined by DECW$BOOK.

To read the Bookreader files on the OpenVMS Version 7.0 CD–ROM, use the following procedure:

1. Enter the following DCL command:

    DEFINE DECW$BOOK *device-name*:[DECW$BOOK]

    where:

    device-name is the name of the drive on which you have placed your OpenVMS CD–ROM. For example:

    ```
    $ DEFINE DECW$BOOK DKB700:[DECW$BOOK]
    ```

2. Define the DECW$BOOKSHELF logical name to point to the appropriate LIBRARY.DECW$BOOKSHELF. Use the following command to define DECW$BOOKSHELF:

    DEFINE DECW$BOOKSHELF *device-name*:-
    [DECW$BOOK]LIBRARY.DECW$BOOKSHELF

    where:

    device-name is the name of the drive on which you have placed your OpenVMS CD–ROM. For example:

    ```
    $ DEFINE DECW$BOOKSHELF -
    _$ DKB700:[DECW$BOOK]LIBRARY.DECW$BOOKSHELF
    ```

    (You can also copy the DECW$BOOK files from the CD–ROM to another location on your system. Always remember to define the DECW$BOOK and the DECW$BOOKSHELF logical names to point to the location of the files you want to read.)

3. Start Bookreader by choosing Bookreader from the Session Manager Applications window. You can also start Bookreader with the following command:

    ```
    $ RUN SYS$SYSTEM:DECW$BOOKREADER
    ```

    For more information, see the *DECwindows Motif for OpenVMS Applications Guide*.

For more information on Bookreader, see the *Using Bookreader* book on the *Getting Started* bookshelf in Bookreader.

---------------------------------- **Note** ----------------------------------

If you want to provide systemwide definitions for the DECW$BOOK and the DECW$BOOKSHELF logical names (that is, for processes other than your own), you need the SYSNAM privilege.
